New Homes In A New Land:

New Homes in a New Land Ethel Hander Geue, 2009-06 This work is essentially a compilation of information gleaned from the passenger lists of ships that arrived at Galveston between the years 1847 and 1861 It is also the story of the German immigration to Texas during this formative period of Texas history *HC 289 - Disposal of Public Land for New Homes* Great Britain. Parliament. House of Commons. Committee of Public Accounts, 2015 The Department for Communities and Local Government cannot demonstrate the success of the land disposal programme in addressing the housing shortage or achieving value for money because it does not collect information on the actual number of houses built or under construction the proceeds from land sold or whether the parcels of land were sold at market value Instead it chose to focus only on a notional number for potential capacity for building houses on the land sold by individual departments in order to determine success The Department also counted towards the programme's target the capacity of land sold before the programme had even started It did not collect basic information necessary to oversee the programme effectively and where it did collect programme level data there were omissions and inconsistencies With much greater ambitions for land disposals in the new Parliament the Department must address the weaknesses in the current programme and the Department has accepted that it needs to improve its general monitoring If it is to oversee the new programme effectively then this must specifically include tracking sale proceeds and progress with the actual construction of new homes and overseeing the programme in a way that gives Parliament and the taxpayer much greater assurance over the value for money achieved from all disposals

these matters might be more readily ignored by a candidate concerned primarily to prepare for an examination A massive amount of research and scholarship has gone into the book with impressive citation of cases articles and case notes and of other text books This newcomer on the scene is a considerable addition to the ranks of serious text books on land law and the author is to be congratulated The New Law Journal The scope of this work is ambitious it is a bold attempt to take the study of land law forward much more than a basic land law text book it would be a pleasure to be able to teach a course requiring students to cover the substance or the bulk of it whether in one or more modules a difficult blend of background and history massive referencing discussion of statute and case law all wrapped up in a text that is not too difficult to absorb The Law Teacher A most interesting and ground breaking book Michael Cardwell University of Leeds At last a brilliant land law book I think the approach is marvellous and will strongly recommend it to my students Keith Gompertz University of Central England takes a more modern approach to the area I am very impressed with the style layout and format It will be a good teaching tool and I am looking forward to using it Alison Dunn Newcastle Law School not baffling in the way land law texts tend to be Helen Taylor University of Teesside Excellent Professor Edward Burn City University **School Life** ,1933
