The New Localism Bruce Katz, Jeremy Nowak, 2018-01-09 The New Localism provides a roadmap for change that starts in the communities where most people live and work In their new book The New Localism urban experts Bruce Katz and Jeremy Nowak reveal where the real power to create change lies and how it can be used to address our most serious social economic and environmental challenges Power is shifting in the world downward from national governments and states to cities and metropolitan communities horizontally from the public sector to networks of public private and civic actors and globally along circuits of capital trade and innovation This new locus of power this new localism is emerging by necessity to solve the grand challenges characteristic of modern societies economic competitiveness social inclusion and opportunity a renewed public life the challenge of diversity and the imperative of environmental sustainability Where rising populism on the right and the left exploits the grievances of those left behind in the global economy new localism has developed as a mechanism to address them head on New localism is not a replacement for the vital roles federal governments play it is the ideal complement to an effective federal government and currently an urgently needed remedy for national dysfunction In The New Localism Katz

and Nowak tell the stories of the cities that are on the vanguard of problem solving Pittsburgh is catalyzing inclusive growth by inventing and deploying new industries and technologies Indianapolis is governing its city and metropolis through a network of public private and civic leaders Copenhagen is using publicly owned assets like their waterfront to spur large scale redevelopment and finance infrastructure from land sales Out of these stories emerge new norms of growth governance and finance and a path toward a more prosperous sustainable and inclusive society Katz and Nowak imagine a world in which urban institutions finance the future through smart investments in innovation infrastructure and children and urban intermediaries take solutions created in one city and adapt and tailor them to other cities with speed and precision As Katz and Nowak show us in *The New Localism* Power now belongs to the problem solvers

Urban Development in China under the Institution of Land Rights Jieming Zhu, 2019-09-17 How have the development and redevelopment of China's cities since the early 1950s transformed the settlements and fortunes of a fifth of the world's population Rapid urbanization since the 1980s has changed the nation from a rural society to an urban one marking it as one of the most significant transformations in history As a country with severe land scarcity land resources are intensively contested for during urbanization under the new regime of marketization This book focuses on the impact of the institution of land rights that have transitioned from private ownership to socialist state ownership and subsequently to public land leasing in the urban domain and to collective ownership in rural areas In the context of defining the relationship between the state and the market the gradualist transition of land rights gives rise to intriguing processes of place making The elaboration of these processes will engage several revealing conceptual notions land as a means of production land commodification ambiguous land rights incomplete land rights trading land use rights for land development rights institutional uncertainty land rent seeking and dissipating local developmental state danwei enterprises and more The newly created landed interests are embedded intricately within the urban spatial structure This book would especially be of interest to scholars interested in developmental economics urban planning geography public policies public management and sociology and also practitioners focusing on development and planning

European Cities Patrick Le Galès, 2002-08-08 European cities are on the rise and are taking advantage of the opportunities of the European integration and globalization processes But they also face economic changes social inequalities poverty and a new set of constraints Taking examples through the European Union *European Cities* explores the impact of the transformation of the nation states on cities and the change of local societies and local governments It argues that new modes of urban governance are emerging and that cities are becoming collective actors within European governance *European Cities* shows why and how the bulk of European cities still appear to be original forms of compromise aggregation representation of diverse interests and culture Different modes of governance are gradually being structured in most middle size European cities despite processes of social exclusion segregation accompanied by the increased mobility of some citizens Are Europeans going to invent a new form of institutionalized and territorialized

capitalism of which medium sized European cities will be one of the pillars and one of the actors Failing that the effects of changing scales could be expressed as profound transformations of the European urban model

European Societies Series
Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent

Policies for Managing Urban Growth and Landscape Change, 2005

Urban Spaces in Japan Christoph Brumann, Evelyn Schulz, 2012 Urban Spaces in Japan explores the workings of power money and the public interest in the planning and design of Japanese space Through a set of vivid case studies of well known Japanese cities including Tokyo Kobe and Kyoto this book examines the potential of civil society in contemporary planning debates Further it addresses the implications of Japan's biggest social problem the demographic decline for Japanese cities and demonstrates the serious challenges and exciting possibilities that result from the impending end of Japan's urban growth Presenting a synthetic approach that reflects both the physical aspects and the social significance of urban spaces this book scrutinizes the precise patterns of urban expansion and shrinkage In doing so it also summarizes current theories of public space urban space and the body in space which are relevant to both Japan and the wider international debate With detailed case studies and more general reflections from a broad range of disciplines this collection of essays demonstrates the value of cross disciplinary cooperation As such it is of interest to students and scholars of geography and urban planning as well as history anthropology and cultural studies

The Neoliberal City Jason Hackworth, 2014-01-15 The shift in the ideological winds toward a free market economy has brought profound effects in urban areas The Neoliberal City presents an overview of the effect of these changes on today's cities The term neoliberalism was originally used in reference to a set of practices that first world institutions like the IMF and World Bank impose on third world countries and cities The support of unimpeded trade and individual freedoms and the discouragement of state regulation and social spending are the putative centerpieces of this vision More and more though people have come to recognize that first world cities are undergoing the same processes In The Neoliberal City Jason Hackworth argues that neoliberal policies are in fact having a profound effect on the nature and direction of urbanization in the United States and other wealthy countries and that much can be learned from studying its effect He explores the impact that neoliberalism has had on three aspects of urbanization in the United States governance urban form and social movements The American inner

city is seen as a crucial battle zone for the wider neoliberal transition primarily because it embodies neoliberalism's antithesis Keynesian egalitarian liberalism Focusing on issues such as gentrification in New York City public housing policy in New York Chicago and Seattle downtown redevelopment in Phoenix and urban landscape change in New Brunswick NJ Hackworth shows us how material and symbolic changes to institutions neighborhoods and entire urban regions can be traced in part to the rise of neoliberalism

Globalization and Governance Jon Pierre, 2013 To pun Pierre brings globalization down to earth After all the hype he serves as an experienced and trustworthy guide to the key question of how far nation states are forced to follow global trends His answers are nuanced well evidenced and thought provoking This should find a place on many reading lists Christopher Pollitt Katholieke Universiteit Leuven Belgium Jon Pierres Globalization and Governance takes on perhaps the most significant question in international political economy to what extent have nations governance structures been determined and shaped by the recent great forces of globalization In an ingenious analytical tour de force he looks at how three very different democracies Japan Sweden and the U S have dealt with the economy intergovernmental relationships and administrative reform when confronted by globalization trends His conclusion is a masterful elegant and convincing argument that boils down to somewhat but not as much as you or many other theorists might think This is an important sophisticated and ground breaking book about the interstices of international and domestic policymaking and political economy that challenges the conventional wisdom Is there any better kind in the study of governance Ellis Krauss University of California US Globalization and Governance makes a compelling case that domestic political economies can cope creatively distinctly and effectively with exogenous pressures for change However compelling and homogenizing global forces may appear to be the book shows that Sweden Japan and the United States continue to demonstrate an overwhelming resilience by entrenched domestic patterns plus powerful learning and adaptive capabilities This book is a welcome addition to the ongoing debates about globalization it is full of insights for specialists in both comparative politics and international relations T J Pempel University of California Berkeley US Globalization raises important questions about the governing capacity of domestic institutions In Globalization and Governance Jon Pierre studies the impact of international norms and prescriptions on domestic governance in Japan Sweden and the United States The empirical analysis is focused on economic governance administrative reform and intergovernmental relationships Drawing on

survey data documents and interviews the analysis finds that domestic institutions still intrinsically shape domestic governance International norms towards deregulation and market based administrative reform confront domestic institutions with prescriptions for reform but the three countries provide only very few examples of unmitigated domestic implementation What Jon Pierre calls the microfoundations of globalization the assessment adoption or rejection of international norms and ideas in vogue is a complex process where domestic institutions and path dependencies remain at the helm The most important exception to this pattern is governance during financial crises where countries are dependent on conditioned support from transnational institutions This insightful and informative book will appeal to researchers academics post graduate as well as undergraduate students in governance political economy and international relations Can Neighbourhoods Save the City? Frank Moulaert, Erik Swyngedouw, Flavia Martinelli, Sara Gonzalez, 2010-07-12 Instead of a top down approach this book looks at the impact of bottom up neighbourhood based initiatives It analyses and documents a variety of innovative local urban strategies in European cities and their impact on wider urban socio economic and political restructuring processes *Crafting Constitutional Democracies* Edward Schneier, 2006-05-12 By examining the institutions of government through the lens of constitution making *Crafting Constitutional Democracies* provides a broad and insightful introduction to comparative politics Drawn from a series of lectures given in Jakarta Indonesia on the drafting of the U S constitution the book illustrates the problems faced by generations of founders through numerous historic and contemporary examples Both Indonesia in 1999 and the United States in 1789 faced the same basic issue how to construct a central government for a large and diverse nation that allowed the majority of the people to govern themselves without intruding on the rights of minorities What kinds of institutions make for good government What factors need to be considered in designing a government Author Edward Schneier explores these questions through a rich variety of examples from both recent and historic transitions to democracy Drawing frequently upon the arguments of the American Federalist Papers and more contemporary theories of democratization *Crafting Constitutional Democracies* lucidly explores the key questions of how and why democracies succeed and fail A concluding chapter on constitutional change and decline raises provocative and important questions about the lessons that citizens of the world's older democracies might take from the struggles of the new *Development Theory* Jan Nederveen Pieterse, 2010 Written by one of the leading authorities in the field the Second Edition of this successful book Situates students in the expanding field of development theory Provides an unrivalled guide to the strengths and weaknesses of competing theoretical approaches Explains key concepts Examines the shifts in theory Offers an agenda for the future In this book the author brings a huge range of experience and knowledge about the relationship between the economically advanced and the emerging developing nations *The Work of Cities* Susan E. Clarke, Gary L. Gaile, 1998 In a pathbreaking study based on four case studies Cleveland Tacoma Syracuse and Jacksonville authors Susan E Clarke and Gary L Gaile show how cities play a vital role in empowering citizens to adapt and serve as

catalysts for a global economy THE WORK OF CITIES is essential reading for anyone who cares about our metropolitan communities Reinventing Race, Reinventing Racism John J. Betancur, Cedric Herring, 2012-11-08 Reinventing Race Reinventing Racism provides fresh theoretical insights and policy solutions that address intractable new forms of racism This accessible book tackles important and timely issues that continue to affect the lives of Americans of all shades and ethnicities

The Imagined Economies of Globalization Angus Cameron, Ronen Palan, 2004 Shortlisted for the Inaugural International Political Economy Group annual book prize amongst the most important books yet written on globalization Review of International Political Economy In this original and very accessible work Cameron and Palan make a major contribution to the narrative turn in political economy Skillfully combining sustained theoretical critiques and contemporary empirical analyses this politically engaged book promotes a paradigm shift that sheds new light on the changing relations among the economy the political and the social It will quickly become a major reference point for its account of globalization as a persuasive story and a flawed reality I recommend it unreservedly Bob Jessop How do theories discussions and debates about globalisation shape the very subject they reflect on How are conceptions of the state society and politics are changing in the age of globalisation This book critically introduces the main contemporary debates on globalization and demonstrates how conventional versions or narratives of globalization have served to shape policy responses at both state and corporate levels Rather than accepting the disintegration of the state thesis the authors present an alternative transition from the nation state as a homogenous imagined community to a more complex and fluid series of normative economic spaces or imagined economies They illustrate how this respatialization of the contemporary state is rapidly taking shape in concrete institutions processes people and places serving to recast the boundaries of the social political and economic in fundamental ways By accessibly demonstrating the way in which the discourse of globalization has itself become an integral part of the politics of globalization The Imagined Economies of Globalization serves as an ideal introduction to key contemporary debates in politics international relations geography international political economy and sociology **Locality and Identity** Jane Holder, Donald McGillivray, 2019-01-15 First published in 1999 this volume is concerned with how issues of identity and locality globalization and ethics valuing the environment environmental justice and the use of traditional and new legal forms cross the disciplines of law ethics geography political science and social theory Necessarily diverse the collection both explores and confronts the limitations of law that prevent recognition of the relationship between humans and nature

Regional and Local Economic Development in South Africa Etienne Louis Nel, 2019-07-23 First published in 1999 this volume responds to the recent application of Local Economic Development around the world and examines its impact in South Africa in the wake of the nation's recent political transition Etienne Louis Nel observes how the initiative is taking on a dual form of community led and authority led initiatives Nel explores the issue through areas including South Africa's space economy a case study of Stuttenheim and local economic development in East London
