Pure Freedom:

Freedom's Embrace J. Melvin Woody, 2010-11-01 To be free is to escape all limitations and obstacles or so we think at first But if we probe further we discover that freedom embraces its own necessities a set of conditions without which it could not exist Freedom's Embrace explores these necessities of freedom J Melvin Woody surveys competing conceptions of freedom and traces debates about the nature and reality of freedom to confusions about knowledge humanity and nature that are rooted in some of the most fundamental assumptions of modern Western thought The preemption of freedom as an exclusively human privilege with all nature relegated to mechanical necessity is a fatal error that renders both humanity and nature equally unintelligible What distinguishes human beings from other animals is not freedom but the use of symbols which vastly extends the range of available options and enables us to envision freedom as an ideal by which customary institutions and norms may be judged and transformed By carefully surveying its necessary conditions and limitations Woody reconciles the salient competing conceptions of freedom and weaves them together into a richer and broader theory that resolves old controversies and opens the way toward an ethics of freedom that can meet the challenges of relativism and nihilism that arise from recognizing the historicity and malleability of culture

Interface Branden Hookway, 2014-04-04 A cultural theory of the interface as a relation that is both ubiquitous and elusive drawing on disciplines from cultural theory to architecture In this book Branden Hookway considers the interface not as technology but as a form of relationship with technology The interface Hookway proposes is at once ubiquitous and hidden from view It is both the bottleneck through which our relationship to technology must pass and a productive encounter embedded within the use of technology It is a site of contestation between human and machine between the material and the social between the political and the technological that both defines and elides differences A virtuoso in multiple disciplines Hookway offers a theory of the interface that draws on cultural theory political theory philosophy art architecture new media and the history of science and technology He argues that the theoretical mechanism of the interface offers a powerful approach to questions of the human relationship to technology Hookway finds the origin of the term interface in nineteenth century fluid dynamics and traces its migration to thermodynamics information theory and cybernetics He discusses issues of subject formation agency power and control within contexts that include technology politics and the social role of games He considers the technological augmentation of humans and the human machine system discussing notions of embodied intelligence Hookway views the figure of the subject as both receiver and active producer in processes of subjectification The interface he argues stands in a relation both alien and intimate vertiginous and orienting to those who cross its threshold

Experience Scott Lash, 2018-06-29 This book is a radical plea for the centrality of experience in the social and human sciences Lash argues that a large part of the output of the social sciences today is still shaped by assumptions stemming from positivism in contrast to the tradition of interpretative social enquiry pioneered by Max Weber These assumptions are particularly central to economics with its emphasis on homo

economicus the utility maximizing actor but they have infiltrated the other social sciences too Lash argues for a social sciences based not in positivism's utilitarian a priori but instead in the a posteriori of grounded and embedded subjective experience His wide ranging account starts from considerations of ancient experience via Aristotle's technics continues through a politics of Hannah Arendt's a posteriori public sphere and concludes with the contemporary with technological experience on the one hand and with Chinese post ontological thought in which the ten thousand things themselves are doing the experiencing on the other This original book by a leading social and cultural theorist will be of great interest to students and scholars in sociology cultural studies and throughout the social sciences

The Nature of the Self Paul Gulian

Cobben,2009-08-17 In the contemporary practical philosophy recognition is one of the central concepts Humans are thematized as individuals who recognize one another as moral and legal persons The central problem of the globalized multicultural societies is how to harmonize the legal persons who are free and equal with moral persons who may have their unique identity In *The Nature of the Self* the thesis is elaborated that in the contemporary discussion a central dimension of recognition is lacking All forms of moral and legal recognition presuppose the recognition at a more fundamental level the recognition of the body by the mind The systematic development of this relation can be performed with the help of a critical reconstruction of Hegel's project in the *Phenomenology of Spirit* and the *Philosophy of Right* This reconstruction results in a differentiated concept of the self in three forms of the self corresponding with three forms of recognition and their institutional embodiment This concept of the self not only competes with the position of Jürgen Habermas and Axel Honneth as it is explicitly elaborated but also with the one of John Rawls

Marx and Hegel on the Dialectic of the Individual and the Social Sevgi Dogan,2018-08-15

Marx and Hegel on the Dialectic of the Individual and the Social is a detailed investigation of the major works of Hegel and the young Marx with exploring how the concept of the individual is positioned within their ontologies and how this positioning is reflected in their related political views Instead of contrasting a Marxist understanding of the individual with that of a liberal thinker Sevgi Dogan chooses to take Hegel's theory of the state as representative of the modern state which Marx criticizes The decision to be in opposition to Hegel rather than some other liberal thinkers is important for two reasons First since Marx has developed many of his early ideas in critical interaction with Hegel this comparative approach enables the book to present a more thorough and well grounded exposition of Marx's arguments Second since Hegel himself has also criticized the concepts of liberal ideology in many respects differentiating Marx's arguments from those of Hegel's enables the book to

underline how and why Hegel's critique of liberal ideology falls short of actually empowering individuals in the way that Marx's account does

Philosophy of Mind in the Early and High Middle Ages Margaret Cameron, 2018-07-06 *Philosophy of Mind in the Early and High Middle Ages* provides an outstanding overview to a tumultuous 900 year period of discovery innovation and intellectual controversy that began with the Roman senator Boethius c480-524 and concluded with the Franciscan theologian and philosopher John Duns Scotus c1266-1308. Relatively neglected in philosophy of mind this volume highlights the importance of philosophers such as Abelard, Duns Scotus and the Persian philosopher and polymath Avicenna to the history of philosophy of mind. Following an introduction by Margaret Cameron twelve specially commissioned chapters by an international team of contributors discuss key topics, thinkers and debates including mental perception, Avicenna and the intellectual abstraction of intelligibles, Duns Scotus' soul, will and choice in Islamic and Jewish contexts, perceptual experience, the systematization of the passions, the complexity of the soul and the problem of unity, the phenomenology of immortality, morality and the self. Essential reading for students and researchers in philosophy of mind, medieval philosophy and the history of philosophy. *Philosophy of Mind in the Early and High Middle Ages* is also a valuable resource for those in related disciplines such as Religion.

A Hope for Philosophy I Ye Xiushan, 2022-10-20 As the final work by Ye Xiushan, one of the most famous philosophers and philosophy scholars in China, this two-volume title scrutinizes the historical development of both Chinese and Western philosophies, aiming to explore the convergence between the two philosophical traditions. Combining the historical examination and argumentation based on philosophical problematics, the two-volume set expounds the key figures and schools and critical thoughts in both Western and Chinese philosophical histories. In this first volume, the author investigates the intellectual heritage of ancient Greece and Thales of Miletus as the cradle of European philosophy, freedom in Greek philosophy, reason and negation in classical German philosophy and the relationship between epistemology and ontology in the philosophical history, thereby illuminating the core spirit of Western philosophy and theoretical quandary facing the contemporary European philosophy. This title will appeal to scholars, students and general readers interested in philosophical history, comparative philosophy, Chinese philosophy and Western philosophy ranging over Greek philosophy, German classic philosophy and contemporary continental philosophy.

The Sublime and its Teleology Donald Loose, 2011-11-25 What are we talking about when we qualify something as sublime? Is it just a qualification of the beautiful in its most touching degree? Is it a qualification of something outside there anyway? Is it a feeling or a reflecting judgment on aesthetic appreciation? And can we reduce the sublime to the aesthetic? The authors of this book all take the analysis of Kant in *Critique of the Power of Judgment* as their primary reference. The argument of this book, however, is to show in what way the Kantian legacy on this topic is still a main stream of inspiration for contemporary thinking, whether in line with Kant or overcoming his primary impetus for modern philosophy of freedom in a critical reception.

Notebooks for an Ethics Jean-Paul Sartre,1992-10 In the famous conclusion to Being and Nothingness Jean Paul Sartre announced that he would devote his next philosophical work to moral problems Although he worked on this project in the late 1940s Sartre never completed it to his satisfaction and it remained unpublished until after his death in 1980 Presented here for the first time in English Notebooks for an Ethics is Sartre s attempt to articulate a moral philosophy In the Notebooks he addresses any number of themes and topics relevant to an effort to formulate a concrete and revolutionary socialist ethics among them the differences between force and violence the relationship of means and ends and the relationship of oppression and alienation Most important he tries to show that there can be an authentic mutual recognition among free individuals where no one steals another s freedom While remaining committed to the basic principles of Being and Nothingness Sartre here seeks to locate the foundation for action in history

and society The Notebooks thus form an important bridge between the early existentialist Sartre and the later Marxist social thinker of the Critique of Dialectical Reason Sartre grapples anew with such central issues as authenticity and the relation of alienation and freedom to moral values In dealing with fundamental modes of relating to the Other among them violence entreaty demand appeal refusal and revolt he highlights the notions of conversion and creation as they figure in the necessary transition from individualism to historical consciousness The Notebooks themselves are complemented here by two appendixes one on the good and subjectivity the other on the problem of blacks in the United States as a case study of oppression

Recognition - German Idealism as an Ongoing Challenge Christian Krijnen, 2013-10-24 There has been an intensive debate in recent years particularly in political philosophy on how the concept of recognition *Anerkennung* can bring insight into understanding social and political relationships and answering ethical questions Proponents of this philosophy seek to apply German Idealism especially Hegel to the arguments of recognition in order to solve contemporary problems However does the present debate incorporate sufficiently the requirements of the idealist philosophy which it pretends to inherit and update As a new paradigm for philosophy claiming to actualize German idealist philosophy it provokes questions about the foundation of the principle of recognition itself as well as about which philosophical method provides the best means for addressing recognition In *Recognition German Idealism as an Ongoing Challenge* renowned authors address this fascinating and far reaching questions in discussion with Kant Fichte Schelling and Hegel Contributors include Robert Brandom Paul Cobben Simon Critchley Pirmin Stekeler Weithofer Kenneth Westphal Klaus Vieweg Erzs bet R sza Christian Krijnen Heikki Ik heimo Donald Loose Kurt Walter Zeidler Jean Christophe Merle Sasa Josifovic Arthur Kok Emiliano Acosta

Going Against the Flow Alan M. Laibelman, 2004 Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation Building upon a metaphysical scheme first explicated in *The Other Perennial Philosophy A Metaphysical Dialectic* Alan M Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components
