anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco science fiction novels These novels are John Christopher's *The Death of Grass* 1956 J G Ballard's *The Drought* 1965 Brian Aldiss's *Earthworks* 1965 and John Brunner's *The Sheep Look Up* 1972 all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious This book examines how even the smallest damage caused by human beings to the environment negatively affects them other living beings and the ecosystem they need to live and flourish In conjunction with these the factors and conditions that push characters in the novels to ignore and harm the environment are also scrutinised While examining how and why the environmental problems in the novels have arisen it is evaluated whether the authors propose solutions to these problems and if so what they are [John Brunner](#) Jad Smith,2013-01-30 Under his own name and numerous pseudonyms John Brunner 1934 1995 was one of the most prolific and influential science fiction authors of the late twentieth century During his exemplary career the British author wrote with a stamina matched by only a few other great science fiction writers and with a literary quality of even fewer importing modernist techniques into his novels and stories and probing every major theme of his generation robotics racism drugs space exploration technological warfare and ecology In this first intensive review of Brunner's life and works Jad Smith carefully demonstrates how Brunner's much neglected early fiction laid the foundation for his classic *Stand on Zanzibar* and other major works such as *The Jagged Orbit* *The Sheep Look Up* and *The Shockwave Rider* Making extensive use of Brunner's letters columns speeches and interviews published in fanzines Smith approaches Brunner in the context of markets and trends that affected many writers of the time including Brunner's uneasy association with the New Wave of science fiction in the 1960s and 70s This landmark study shows how Brunner's attempts to cross fertilize the American pulp tradition with British scientific romance complicated the distinctions between genre and mainstream fiction and between hard and soft science fiction and helped carve out space for emerging modes such as cyberpunk slipstream and biopunk [Science Fiction in Translation](#) Ian Campbell,2022-01-01 *Science Fiction in Translation Perspectives on the Global Theory and Practice of Translation* focuses on the process of translation and its implications The volume explores the translation of works of science fiction SF from one language to another and the translation of SF tropes terms and ideas of SF theory into cultures outside the West Providing a comprehensive examination of the state of translation into English the essays consider how representative the body of translated work of SF is from the source language culture It also considers the social political and economic choices in selecting a work to translate The book illustrates the dramatic growth both in SF production outside the Anglosphere the translation of works from other languages into English and the practice of translating English language SF into other languages Altogether the essays map the theory practice and business of SF translation around the world [Reading Science Fiction](#) James Gunn,Marleen Barr,Matthew Candelaria,2018-01-19 Science Fiction is illuminated by world class scholars and fiction writers who introduce the history concepts and contexts necessary to understanding the genre Their

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-12-10 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject
