The application of a medical remedy against poisoning 2 as pronounced by Tsiblha Karma Yolde to the first king of Tibet Nyatri Tsenpo circa 300 B C clearly demonstrates that the early inhabitants of Tibet had knowledge of the therapeutic value of herbs and minerals even during that time Medical knowledge continued to be passed on by means of various oral traditions and has kept alive the knowledge of numerous remedies over many centuries Before Buddhism and the present Tibetan script were introduced to Tibet the Bon religious and cultural traditions flourished in the region of Shang Shung in southwestern Tibet The legendary Bon master and cultural founder Tonpa Shenrab Miwoche was born in Purang

Tibet at the time of the Lord Buddha The Bon master authored many important medical literatures such as Sojay Kyi Do Ghu Sorig Chegyud Daser Sojay Nadbum Nagpo3 Sojay Manbum Karp4 Sothab Chedbum Trawo5 and Tsawa Thukbum Khangon6 and he established the foundation for the development of the Bon medical tradition His eldest son Chebu Trishey learned the art of medicine from his father and later became a very important figure in the development of the Bon medical system At that time Bon religion and culture were at their height and shamanistic ways of healing were very popular throughout Tibet They undoubtedly influenced the existing Tibetan medical knowledge and practices The Gyueshi Four Tantras which is the fundamental text of Tibetan medicine contains mantras and the names of some medicinal substances compounds and diseases in the original Bon language This is a clear indication of the influence of Bon on Tibetan medicine We can therefore assume that there was knowledge and practices of medicine before the reign of King Lha Thothori Nyentsen and before the introduction of the present Tibetan script during the 7th century **Fundamentals of Tibetan Medicine -** Dr. Lobsang Tsultrim, Dr. Tenzin Dakpa, 2017-03-23 The first edition of the Fundamentals of Tibetan Medicine published in 1981 has remained one of the most popular and widely used publications on Tibetan Medicine available in English In 1995 a second revised edition was published in response to an increasing interest in Tibetan Medicine and a greater demand for literature on the subject The need for a third revised edition was again felt and in 1996 the Director of Men Tsee Khang appointed us to expand and revise the book However due to our other Institutional responsibilities we could not begin work on the project until the summer of 1997 We are pleased to bring out this book started initially during the Directorship of Mr Tsering Tashi and completed with the encouragement of our current Director Mr Pema Dadhul Arya The support of both Directors has been invaluable In this third Edition as in the Second alterations additions and deletions have been made to material from the edition preceding it The material in Part One has been divided into four distinct chapters with the addition of an introductory section on the history of Tibetan Medicine Where new information has been added from the rGyudbZhi or its commentary Vaidurya sNgon po and the original text was too complicated or technical for the purposes of an introductory book such as this we have attempted to simplify the material without sacrificing the essential points In doing so errors or omissions may have occurred for which we take full responsibility When it seemed useful we have condensed material into tables We have updated some photos from the previous edition and also have added a pronunciation guide to Tibetan medical terms It is our sincere desire that all who read this book will benefit from it and experience good health Dr Lobsang Tsultrim Dr Tenzin Dakpa Sources of Tibetan Tradition Kurtis R. such knowledge been defined by scholars and cultural actors Are religion and medicine the best terms by which scholars can grapple with knowledge about the sacred and the self destiny and disease Medicine and Memory in Tibet Theresia Hofer, 2018-03-15 Only fifty years ago Tibetan medicine now seen in China as a vibrant aspect of Tibetan culture was considered a feudal vestige to be eliminated through government led social transformation Medicine and Memory in Tibet examines medical revivalism on the geographic and sociopolitical margins both of China and of Tibet's medical establishment in Lhasa exploring the work of medical practitioners or amchi and of Medical Houses in the west central region of Tsang Due to difficult research access and the power of state institutions in the writing of history the perspectives of more marginal amchi have been absent from most accounts of Tibetan medicine Theresia Hofer breaks new ground both theoretically and ethnographically in ways that would be impossible in today s more restrictive political climate that severely limits access for researchers She illuminates how medical practitioners safeguarded their professional heritage through great adversity and personal hardship Religion and the Subtle Body in Asia and the West Geoffrey Samuel, Jay Johnston, 2013-04-12 Subtle body practices are found particularly in Indian Indo Tibetan and East Asian societies but have become increasingly familiar in Western societies especially through the various healing and vogic techniques and exercises associated with them This book explores subtle body practices from a variety of perspectives and includes both studies of these practices in Asian and Western contexts The book discusses how subtle body practices assume a quasi material level of human existence that is intermediate between conventional concepts of body and mind Often this level is conceived of in terms of an invisible structure of channels associated with the human body through which flows of quasi material substance take place Contributors look at how subtle body concepts form the basic explanatory structure for a wide range of practices These include forms of healing modes of exercise and martial arts as well as religious practices aimed at the refinement and transformation of the human mindbody complex By highlighting how subtle body practices of many kinds have been introduced into Western societies in recent years the book explores the possibilities for new models of understanding which these concepts open up It is a useful contribution to studies on Asian Religion and Philosophy Soundinas in Tibetan Medicine International Association for Tibetan Studies. Seminar, 2007 This collection of studies on the anthropology and history of Tibetan medicine provides fascinating new insights into both dynamic developments and historical continuities in medical knowledge and practice that have been manifest in a range of traditional and contemporary Tibetan societies The Mirror of Beryl Sangye Desi Gyatso, 2016-05-17 Composed while its author was the ruler of Tibet Mirror of Beryl is a detailed account of the origins and history of medicine in Tibet through the end of the seventeenth century Its author Desi Sangye Gyatso 1653 1705 was the heart disciple and political successor of the Great Fifth Dalai Lama and the author of several highly regarded works on Tibetan medicine including his Blue Beryl a commentary on the foundational text of Tibetan medicine The Four Tantras In the present historical introduction Sangye Gyatso traces the sources of influence on Tibetan

medicine to classical India China Central Asia and beyond providing life stories extensive references to earlier Tibetan works on medicine and fascinating details about the Tibetan approach to healing He also provides a commentary on the pratimoksha bodhisattva and tantric Buddhist vows Desi Sangye Gyatso s Mirror of Beryl remains today an essential resource for students of medical science in Tibet Religion, Medicine and the Human Embryo in Tibet Frances Garrett, 2008-04-24 This book explores the cultural history of embryology in Tibet in culture religion art and literature and what this reveals about its medicine and religion Filling a significant gap in the literature this is the first in depth exploration of Tibetan medical history in the English language It reveals the prevalence of descriptions of the development of the human body from conception to birth found in all forms of Tibetan religious literature as well as in medical texts and in art By analysing stories of embryology Frances Garrett explores questions of cultural transmission and adaptation How did Tibetan writers adapt ideas inherited from India and China for their own purposes What original views did they develop on the body on gender on creation and on life itself The transformations of embryological narratives over several centuries illuminate key turning points in Tibetan medical history and its relationship with religious doctrine and practice Embryology was a site for both religious and medical theorists to contemplate profound questions of being and becoming where topics such as pharmacology and nosology were left to shape secular medicine The author argues that in terms of religion stories of human development comment on embodiment gender socio political hierarchy religious ontology and spiritual progress Through the lens of embryology this book examines how these concerns shift as Tibetan history moves through the formative renaissance period of the twelfth through to the seventeenth centuries Proceedings of the Tenth Seminar of the IATS, 2003.
