**Electoral Politics and Africa's Urban Transition** Noah L. Nathan, 2019-02-28 Two aspects of contemporary urban life in Africa are often described as sources of political change the emergence of a large urban middle class and high levels of ethnic diversity and inter ethnic social contact Many expected that these factors would help spark a transition away from ethnic competition and clientelism toward more programmatic elections Focusing on urban Ghana this book shows that the growing middle class and high levels of ethnic diversity are not having the anticipated political effects Instead urban Ghana is stuck in a trap clientelism and ethnic voting persist in many urban neighborhoods despite changes to the socio economic characteristics and policy preferences of voters Through a unique examination of intra urban variation in patterns of electoral competition Nathan explains why this trap exists demonstrates its effects on political behavior and explores how new democracies like Ghana can move past it

**Business and Social Crisis in Africa** Antoinette Handley, 2019-11-21 Much of the time when confronted with a crisis of national dimensions businesses do exactly what we expect them to do they look to their own survival Occasionally however firms in some contexts go beyond this Based on qualitative country based fieldwork in Eastern and Southern Africa Antoinette Handley examines how African businesses can be key responders to wider social and political crises often responding well in advance of the state She reveals the surprising ways in which business responses can be focused not on short term profits but instead on ways that assist society in resolving that crisis in the long term Taking African businesses in Kenya Uganda Botswana and South Africa as case studies this detailed exploration of the private sector response to crises including HIV AIDS and political violence crises introduces the concept of relative business autonomy exploring the conditions under which it can emerge and develop when and how it may decline and how it might contribute to a higher level of overall societal resilience

*The Foundations of Ethnic Politics* Henry E. Hale, 2008-06-30 Despite implicating ethnicity in everything from civil war to economic failure researchers seldom consult psychological research when addressing the most basic question What is ethnicity The result is a radical scholarly divide generating contradictory recommendations for solving ethnic conflict Research into how the human brain actually works demands a revision of existing schools of thought Hale argues ethnic identity is a cognitive uncertainty reduction device with special capacity to exacerbate but not cause collective action problems This produces a new general theory of ethnic conflict that can improve both understanding and practice A deep study of separatism in the USSR and CIS demonstrates the theory's potential mobilizing evidence from elite interviews three local languages and mass surveys The outcome significantly reinterprets nationalism's role in CIS relations and the USSR's breakup which turns out to have been a far more contingent event than commonly recognized

**Political Science in South Africa** Peter Vale, Pieter Fourie, 2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies SAAPS and Politikon the South African Journal of Political Studies celebrate their 40th anniversary Also in April 2014 South Africa celebrates twenty years since the advent of the post

Apartheid democracy and the birth of the rainbow nation This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this country Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities The fourteen contributions evaluate the state of the discipline s and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans understanding of their own polity as well as its place in the world The implications are uncomfortable and pose interesting challenges for South African scholarship pedagogy and national self reflection This book was published as a special issue of Politikon **Advances in Comparative-Historical Analysis** James Mahoney, Kathleen Thelen, 2015-07-02

Against the backdrop of an explosion of interest in new techniques for data collection and theory testing this volume provides a fresh programmatic statement about comparative historical analysis It examines the advances and distinctive contributions that CHA has made to theory generation and the explanation of large scale outcomes that newer approaches often regard as empirically intractable An introductory essay locates the sources of CHA s enduring influence in core characteristics that distinguish this approach such as its attention to process and its commitment to empirically grounded deep case based research Subsequent chapters explore broad research programs inspired by CHA work new analytic tools for studying temporal processes and institutional dynamics and recent methodological tools for analyzing sequences and for combining CHA work with other approaches This volume is essential reading for scholars seeking to learn about the sources of CHA s enduring influence and its contemporary analytical and methodological techniques **Politics for Profit** David

Szakonyi, 2020-07-09 Businesspeople run for and win elected office around the world with roughly one third of members of parliament and numerous heads of states coming directly from the private sector Yet we know little about why these politicians choose to leave the private sector and what they actually do while in government In Politics for Profit David Szakonyi brings to bear sweeping quantitative and qualitative evidence from Putin era Russia to shed light on why businesspeople contest elections and what the consequences are for their firms and for society when they win The book develops an original theory of businessperson candidacy as a type of corporate political activity undertaken in response to both economic competition and weak political parties Szakonyi s evidence then shows that businesspeople help their firms reap huge gains in revenue and profitability while prioritizing investments in public infrastructure over human capital The book finally evaluates policies for combatting political corruption **Comparative Politics** Mark Irving Lichbach, Alan S.

Zuckerman, 2009-02-02 Comparative Politics Rationality Culture and Structure is a revised second edition of the volume that guided students and scholars through the intellectual demands of comparative politics Retaining a focus on the field s research schools it now pays parallel attention to the pragmatics of causal research Mark Lichbach begins with a review of

discovery explanation and evidence and Alan Zuckerman argues for explanations with social mechanisms Ira Katznelson writing on structuralist analyses Margaret Levi on rational choice theory and Marc Ross on culturalist analyses assess developments in the field s research schools Subsequent chapters explore the relationship among the paradigms and current research the state culturalist themes and political economy the international context of comparative politics contentious politics multi level analyses nested voters endogenous institutions welfare states and ethnic politics The volume offers a rigorous and exciting assessment of the past decade of scholarship in comparative politics     Precolonial Legacies in Postcolonial Politics Martha Wilfahrt, 2022-12-22 West Africa s precolonial kingdoms left behind social norms and identities that affect elite behavior and subnational development today     State-Directed Development Atul Kohli, 2004-08-30 Why have some developing country states been more successful at facilitating industrialization than others An answer to this question is developed by focusing both on patterns of state construction and intervention aimed at promoting industrialization Four countries are analyzed in detail South Korea Brazil India and Nigeria over the twentieth century The states in these countries varied from cohesive capitalist mainly in Korea through fragmented multiclass mainly in India to neo patrimonial mainly in Nigeria It is argued that cohesive capitalist states have been most effective at promoting industrialization and neo patrimonial states the least The performance of fragmented multiclass states falls somewhere in the middle After explaining in detail as to why this should be so the study traces the origins of these different state types historically emphasizing the role of different types of colonialisms in the process of state construction in the developing world     Contradictions of Democracy Nicholas Rush Smith, 2019-01-17 Despite being one of the world s most vibrant democracies police estimate between five and ten percent of the murders in South Africa result from vigilante violence This is puzzling given the country s celebrated transition to democracy and massive reform of the state s legal institutions Where most studies explain vigilantism as a response to state or civic failure in *Contradictions of Democracy* Nicholas Rush Smith illustrates that vigilantism is actually a response to the processes of democratic state formation In the context of densely networked neighborhoods vigilante citizens often interpret the technical success of legal institutions for instance the arrest and subsequent release of suspects on bail as failure and work to correct such perceived failures on their own Smith also shows that vigilantism provides a new lens through which to understand democratic state formation Among young men of color in some parts of South Africa fear of extra judicial police violence is common Amid such fear instead of the state seeming protective it can appear as something akin to a massive vigilante organization An insightful look into the high rates of vigilantism in South Africa and the general challenges of democratic state building *Contradictions of Democracy* explores fundamental questions about political order the rule of law and democratic citizenship     Handbook of Urban Politics and Policy Ronald K. Vogel, 2024-07-05 This authoritative Handbook provides a comprehensive overview of research into urban politics and policy in cities across the globe Leading scholars examine the position of urban politics within political science

and analyse the critical approaches and interdisciplinary pressures that are broadening the field      **Why Ethnic Parties Succeed** Kanchan Chandra, 2007-02-15 Why do some ethnic parties succeed in attracting the support of their target ethnic group while others fail In a world in which ethnic parties flourish in both established and emerging democracies alike understanding the conditions under which such parties rise and fall is of critical importance to both political scientists and policy makers Drawing on a study of variation in the performance of ethnic parties in India this book builds a theory of ethnic party performance in patronage democracies Chandra shows why individual voters and political entrepreneurs in such democracies condition their strategies not on party ideologies or policy platforms but on a headcount of co ethnics and others across party personnel and among the electorate      *Bankers, Bureaucrats, and Central Bank Politics* Christopher Adolph, 2013-04-15 Adolph illustrates the policy differences between central banks run by former bankers relative to those run by bureaucrats      Warlords and Coalition Politics in Post-Soviet States Jesse Driscoll, 2015-07-02 The break up of the USSR was unexpected and unexpectedly peaceful Though a third of the new states fell prey to violent civil conflict anarchy on the post Soviet periphery when it occurred was quickly cauterized This book argues that this outcome had nothing to do with security guarantees by Russia or the United Nations and everything to do with local innovation by ruthless warlords who competed and colluded in a high risk coalition formation game Drawing on a structured comparison of Georgian and Tajik militia members the book combines rich comparative data with formal modeling treating the post Soviet space as an extraordinary laboratory to observe the limits of great powers efforts to shape domestic institutions in weak states
