Race Conflict And The International Order From Empire To United Nations:

Race, Conflict and the International Order Hugh Tinker, 1977 While there are many books on race issues this is the first extended study to examine race as a factor in international relations The waning of white imperial domination in the second half of this century has changed the balance of forces and perhaps even more important the ideology of international relations The white nations are on the defensive the Black and brown demand recognition of the equality of races The author begins with a discussion of the ideology of white racism and describes how it was institutionalized in the U S A the British Empire and other European colonies He examines the major twentieth century wars as the catalyst in the break up of the imperial system In surveying the post imperial development of pressures and conflicts he pays particular attention to the United Nations as the arena in which these are most strongly operative He then shows the connection between international relations and the internal contemporary situation in the West where racial dominance is exercised within the metropolitan countries that have attracted Third World labour and where the United States is wrestling with the demands of its colonised peoples In analyzing the ways and means in which the Third World probes the weaknesses of the West he shows how the powerless may exert pressure on the powerful He demonstrates that race however amorphous as a category of political and social analysis is emerging as the dominant force in the late twentieth century This has been highlighted by the evolution of the Rhodesian problem since the mid 1960s and the dramatic developments of September 1976 form the climax of the book Hugh Tinker is Professor of Politics at the University of Lancaster He was formerly Senior Research Fellow at the Institute of Commonwealth Studies University of London Professor of Government and Politics at the University of London and Director of the Institute of Race Relations His most recent books are *A New System of Slavery* 1974 *Separate and Unequal* 1976 and *The Banyan Tree Overseas Emigrants from India Pakistan and Bangladesh* *Human Rights in the Twentieth Century* Stefan-Ludwig Hoffmann, 2010-12-13 Has there always been an inalienable right to have rights as part of the human condition as Hannah Arendt famously argued The contributions to this volume examine how human rights came to define the bounds of universal morality in the course of the political crises and conflicts of the twentieth century Although human rights are often viewed as a self evident outcome of this history the essays collected here make clear that human rights are a relatively recent invention that emerged in contingent and contradictory ways Focusing on specific instances of their assertion or violation during the past century this volume analyzes the place of human rights in various arenas of global politics providing an alternative framework for understanding the political and legal dilemmas that these conflicts presented In doing so this volume captures the state of the art in a field that historians have only recently begun to explore

Barbarians and Civilization in International Relations Mark B. Salter, 2002-09-20 The terrorist attacks in New York and Washington have led to popular conceptions of Muslims as terrorists Some commentators have harked back to the Clash of Civilizations argument outlined by Samuel Huntington which argued that after the collapse of the Cold War culture would

become the main axis of conflict for civilisational alliances Mark Salter takes issue with Huntington's theory and explains how the terms of his argument are part of an imperialist discourse that casts other civilisations as essentially barbarian Although many commentators have engaged with Huntington's claims few have pursued the political implications of his argument Barbarians and Civilisation offers a decisive exploration of the colonial rhetoric inherent in current political discourse Charting the usefulness of concepts of culture and identity for understanding world politics Salter brilliantly illustrates the benefits and the limitations of the civilised barbarian dichotomy in international relations **The**

International Legal Order's Colour Line William A. Schabas, William Schabas, 2023 The International Legal Order's Colour Line charts the development of regulation on racism and racial discrimination in international law Outlining landmark resolutions and their development the book challenges the narrative that human rights are a creation of the Global North while demonstrating the decisive contribution of the Global South Japan, Race and Equality Naoko Shimazu, 2009 This

study explores the Japanese motivations in raising the proposal for racial equality at the 1919 Paris Peace Conference This is the first comprehensive analysis of an historically significant event which has not been given adequate scholarly attention in the past The story which unfolds underlines the complexity of politics and diplomacy surrounding the racial equality proposal and analyses the effect of the failure of the proposal on Japan's politics in the 1920s and 1930s **Competing Visions of**

Noncitizen Power Tendayi Bloom,2023-08-10 In Noncitizen Power Tendayi Bloom applies her novel politics of noncitizenism to global governance Noncitizenism advocates examining political institutions from the perspectives of those who must live and act despite them Noncitizen power may be essential in addressing some of our world's apparently most intractable challenges By analysing civil society engagement in the 2018 UN Global Compact for Migration Bloom examines how far those with the most direct experiences of difficulties arising from migration governance can contribute to shaping it Interrogating its underlying narratives and how human agency is understood within them she highlights how politics from grassroots activism to global deliberations necessarily involves real people This book introduces some of those engaging in noncitizen politics providing a critical contribution to contemporary debates on solidarity participation legitimacy and justice in the international system and in migration politics

We're Here Because You Were There Ian Patel,2021-04-13 What are the origins of the hostile environment for immigrants in Britain Drawing on new archival material from the Foreign and Commonwealth Office Ian Sanjay Patel retells Britain's recent history in an often shocking account of state racism that still resonates today In a series of post war immigration laws Britain's colonial and Commonwealth citizens from the Caribbean Asia and Africa were renamed immigrants In the late 1960s British officials drew upon an imperial vision of the world to contain what it saw as a vast immigration crisis involving British citizens passing legislation to block their entry As a result British citizenship itself was redefined along racial lines fatally compromising the Commonwealth and exposing the limits of Britain's influence in world politics Combining voices of so called immigrants trying to make a home in Britain and the politicians diplomats and commentators who were rethinking the nation Ian Sanjay Patel excavates the reasons why Britain failed to create a post

imperial national identity The reactions of the British state to post war immigration reflected the shift in world politics from empires to decolonization Despite a new international recognition of racial equality Britain s colonial and Commonwealth citizens were subject to a new regime of immigration control based on race From the Windrush generation who came to Britain from the Caribbean to the South Asians who were forced to migrate from East Africa Britain was caught between attempting both to restrict the rights of its non white colonial and Commonwealth citizens and redefine its imperial role in the world Despite Britain s desire to join Europe which eventually occurred in 1973 its post imperial moment never arrived subject to endless deferral and reinvention Civilizational Discourses in Weapons Control Ritu Mathur,2020-07-11 This book seeks to decolonize practices of arms control and disarmament In this endeavor it seeks to problematize our understanding of time and civilization as rhetorical resources The need for such an undertaking can be premised on the claim that while problems of modernity ethnocentrism and universalism are now a central concern within the field of international relations these ideas are scarcely debated or contested within the field of arms control and disarmament The singular focus on technological innovations and specific policy oriented agreements in practices of arms control and disarmament appears to stymie the need for such engagements This book is an invitation to explore intersecting discourses on colonialism racialism nationalism and humanitarianism within a historically grounded terrain of weapons control An understanding of these practices is vital not to prescribe any standards of civilization or exceptionalism in weapons control but to be cognizant through critique of the dangers embedded in any effort at reconstellating the constitutional nuclear order Encyclopedia of the Cold War Ruud van Dijk,William Glenn Gray,Svetlana Savranskaya,Jeremi Suri,Qiang Zhai,2013-05-13 Between 1945 and 1991 tension between the USA its allies and a group of nations led by the USSR dominated world politics This period was called the Cold War a conflict that stopped short to a full blown war Benefiting from the recent research of newly open archives the Encyclopedia of the Cold War discusses how this state of perpetual tensions arose developed and was resolved This work examines the military economic diplomatic and political evolution of the conflict as well as its impact on the different regions and cultures of the world Using a unique geopolitical approach that will present Russian perspectives and others the work covers all aspects of the Cold War from communism to nuclear escalation and from UFOs to red diaper babies highlighting its vast ranging and lasting impact on international relations as well as on daily life Although the work will focus on the 1945 1991 period it will explore the roots of the conflict starting with the formation of the Soviet state and its legacy to the present day **The American Predicament** A.M.
