Gender Equality in a Global Perspective Anders Ortenblad, Raili Marling, Snjezana Vasiljevic, 2017-01-06 Gender Equality in a Global Perspective looks to discuss whether Gender Equality can be adopted as it has been defined in international documents anywhere or whether it needs to be adapted in a more local context discuss which factors and perspectives need to be taken into account when adapting Gender Equality to specific contexts suggest research approaches for studies on whether a universal Western concept of Gender Equality fits in certain specific contexts and finally suggests challenges to the existing interpretation of Gender Equality e.g. theory of intersectionality and the development of legal and policy framework This book is situated within the tradition of comparative gender studies While most other such books take up and compare various ways of implementing or not implementing gender equality this book studies and compares whether or not and to what extent a specific definition of Gender Equality GE could be adopted by various nations Thus all chapter contributors will engage with the same definition of GE which will be presented within the book and discuss the possibilities and constraints related to applying such a definition in their particular national context The readers will learn about the problems of applying a universal concept of Gender Equality and the possible reasons for and modes of adapting Gender Equality to different

contexts Gender Equality in a Global Perspective looks to maintain a critical and reflexive stance towards the issues raised and will seek to present multiple perspectives and open ended answers As such it hopes to contribute to the international discussion of human rights more broadly and Gender Equality specifically The intended audience is not limited only to but will include policy makers scholars and students with an interest in Gender issues Organizational Theory Political Science Human Development Policy Analysis Globalization and other management sub disciplines Global Perspectives on Motherhood, Mothering and Masculinities Andrea Moraes,Tola Olu Pearce,2021-06-01 The two phenomena highlighted in this edited volume motherhood mothering and masculinities are each recent areas of development in critical Feminist and Men s Studies In contributing to these areas of gender studies this book draws attention to the fact that much can also be gained when we explore relationships between them an idea that may not readily come to mind While femininities and masculinities are co constructed motherhood and mothering bring additional perspectives to the study of femininity that affect the construction of masculinity in complex ways The 12 chapters in this volume allow readers to ponder some of these complexities and may suggest other issues that require investigation Spanning many continents the essays have both a global and historical reach emphasising cultural differences and historical changes Of import is the idea that mothers have agency and are active in constructions affecting their lives They are able to bring motherhood out of the shadows as they strive to build re evaluate or alter their roles within families and communities These have an impact on developments in masculinities The book is divided into three parts and the chapters investigate a wide range of issues including cultural constructs gender in parent child relationships non binary developments the impact of war on mothering decolonisation struggles and much more

Development draws upon this framework to explore the effects of globalization on development in diverse geographical contexts. It explores how women's and men's lives are gendered in specific spaces as well as across multiple landscapes. Traveling from South Asia to sub-Saharan Africa to North America and the Caribbean, the contributions illustrate the link between gender and global development, including economic livelihoods, policy measures, and environmental change. Divided into three sections, *Global Perspectives on Gender and Space* showcases the following issues: One, the impact of neoliberal policies on transnational migration, public services, and microfinance programs; Two, feminist and participatory methodologies employed in the evaluation of land use, women's cooperatives, and liberation struggles; and Three, gendered approaches to climate change, natural disasters, and conservation in the global South. A feminist lens is the common thread throughout these sections, that weaves gender into the very fabric of everyday life, providing a common link between varied spaces around the globe by mapping gendered patterns of power and social change. This timely volume provides geographic comparisons and case studies to give empirically informed insights on processes and practices relevant to feminism and development. It illustrates ways to empower individuals and communities through transnational struggles and grassroots organizations while emphasizing human rights and gender equity and will be of interest to those studying Geography, Development Studies, International Relations, and Gender Studies.
