Race For Theory And The Biophobia Hypothesis:

Race for Theory and the Biophobia Hypothesis Melvin D. Williams, 1996 *Race for Theory and the Biophobia Hypothesis* Melvin D. Williams, 1998 Race and those other socially divisive creations concepts tropes ideologies and behaviors that have enabled human beings to dominate Earth and other species are now obsolete because of weapons technology and internationalism The big brained animal must transform and transcend his or her culture with the Ecological Revolution or become extinct The production and reproduction of social inferiority is maladaptive in a global village Status superiority and inferiority threaten the human race Human beings can no longer deny defy and defile their animal kinship in their own endless search for security If human beings fail to change they may leave the Earth to other social animals who have evolved better paradigms of social cooperation and ecological fitness **The Monochrome Society** Amitai Etzioni, 2021-02-09 Amitai Etzioni is one of the most influential social and political thinkers of our day a man synonymous with the ideas of communitarianism In this book Etzioni challenges those who argue that diversity or multiculturalism is about to become the governing American creed On the surface America may seem like a fractured mosaic but the country is in reality far more socially monochromatic and united than most observers have claimed In the first chapter Etzioni presents a great deal of evidence that Americans whites and African Americans Hispanics and Asian Americans new immigrants and decedents of the Pilgrims continue to share the same core of basic American values and aspirations He goes on to show that we need not merely a civil but also a good society one that nurtures virtues He assesses key social institutions that can serve such a society ranging from revived holidays to greater reliance on public shaming The most effective sources of bonding and of shared ideas about virtue he insists throughout come from the community not from the state Etzioni also challenges moral relativists who argue that we have no right to impose our moral values on other societies He responds to those who fear that a cohesive community must also be one that is oppressive authoritarian and exclusive And he explores and assesses possible new sources and definitions of community including computer mediated communities and stakeholding in corporations By turns provocative and reassuring the chapters here cut to the heart of several of our most pressing social and political issues The book is further evidence of Etzioni's enduring place in contemporary thought [A Companion to Psychological Anthropology](#) Conerly Casey, Robert B. Religious Affects Donovan O. Schaefer,2015-11-13 In *Religious Affects* Donovan O Schaefer challenges the notion that religion is inextricably linked to language and belief proposing instead that it is primarily driven by affects Drawing on affect theory evolutionary biology and poststructuralist theory Schaefer builds on the recent materialist shift in religious studies to relocate religious practices in the affective realm an insight that helps us better understand how religion is lived in conjunction with systems of power To demonstrate religion s animality and how it works affectively Schaefer turns to a series of case studies including the documentary *Jesus Camp* and contemporary American Islamophobia Placing affect theory in conversation with post Darwinian evolutionary theory Schaefer explores the extent to which nonhuman animals have the capacity to practice religion linking human forms of religion and power through a new analysis of the chimpanzee waterfall dance as observed by Jane Goodall In this compelling case for the use of affect theory in religious studies Schaefer provides a new model for mapping relations between religion politics species globalization secularism race and ethics *Bookseller* ,1998

Writing for an Endangered World Lawrence Buell,2009-07-01 The environmental imagination does not stop short at the edge of the woods Nor should our understanding of it as Lawrence Buell makes powerfully clear in his new book that aims to reshape the field of literature and environmental studies Emphasizing the influence of the physical environment on individual and collective perception his book thus provides the theoretical underpinnings for an ecocriticism now reaching full power and does so in remarkably clear and concrete ways Writing for an Endangered World offers a conception of the physical environment whether built or natural as simultaneously found and constructed and treats imaginative representations of it as acts of both discovery and invention A number of the chapters develop this idea through parallel studies of figures identified with either natural or urban settings John Muir and Jane Addams Aldo Leopold and William Faulkner Robinson Jeffers and Theodore Dreiser Wendell Berry and Gwendolyn Brooks Focusing on nineteenth and twentieth century writers but ranging freely across national borders his book reimagines city and country as a single complex landscape
