*The Cost of Inclusion* Blake R. Silver, 2020-07-17 Young people are told that college is a place where they will find themselves by engaging with diversity and making friendships that will last a lifetime This vision of an inclusive diverse social experience is a fundamental part of the image colleges sell potential students But what really happens when students arrive on campus and enter this new social world *The Cost of Inclusion* delves into this rich moment to explore the ways students seek out a sense of belonging and the sacrifices they make to fit in Blake R Silver spent a year immersed in student life at a large public university He trained with the Cardio Club hung out with the Learning Community and hosted service events with the Volunteer Collective Through these day to day interactions he witnessed how students sought belonging and built their social worlds on campus Over time Silver realized that these students only achieved inclusion at significant cost To fit in among new peers they clung to or were pushed into raced and gendered cultural assumptions about behavior becoming the cool guy the nice girl the funny one the leader the intellectual or the mom of the group Instead of developing dynamic identities they crafted and adhered to a cookie cutter self one that was rigid and two dimensional Silver found that these students were ill prepared for the challenges of a diverse college campus and that they had little guidance from their university on how to navigate the trials of social engagement or the pressures to conform While colleges are focused on increasing the diversity of their enrolled student body Silver's findings show that they need to take a hard look at how they are failing to support inclusion once students arrive on campus
