belonging Let's Talk About Race in the Early Years gives practitioners the language and tools they need to create an environment where all children can shine and is essential reading for all early years professionals *Race Awareness in Young Children* Lev Ernestovich El'Sgol'ts,1964 **Race, Color, and the Young Child** John Williams,J. Kenneth Morland,2018-08-25 A social developmental psychologist and a social anthropologist describe what is known and what needs to be investigated concerning the development of race and color concepts in young children The authors summarize the results of their fifteen year research and integrate their findings with those of other investigators to provide in a single source a much needed summary of the research literature and a more comprehensive theoretical analysis than has appeared previously Originally published in 1976 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value *Race, Ethnicity, and Gender* Joseph F. Healey,Eileen O'Brien,2007-05-08 The Second Edition of *Race Ethnicity and Gender Selected Readings* offers comprehensive varied and highly readable views of the problems of racism and sexism in American society Editors Joseph F Healey and Eileen T O'Brien present a variety of perspectives on some of the most pressing problems facing American society racism and prejudice inequality and discrimination and assimilation and pluralism This new edition includes historical perspectives case studies of minority groups a strong emphasis on gender clashing perspectives on contemporary problems and a chapter on solutions *Race, Gender, Sexuality, and Social Class* Susan J. Ferguson,2013 *Race Gender Sexuality and Social Class Dimensions of Inequality* edited by renowned researcher and scholar Susan Ferguson presents a contemporary and compelling overview of race ethnicity gender and social class issues in the United States today Taking an intersectional approach the book is organized topically rather than focusing on specific race ethnic subgroups The content is framed around the themes of identity experiences of race class gender or sexuality difference inequality and social change or personal empowerment with historical context threaded throughout to deepen the reader's understanding With engaging readings and cutting edge scholarship the collection is not only refreshingly contemporary but also relevant to students lives **Race Attitudes in Children** Bruno Lasker,1929 *Psychology and Race* Peter Watson,2017-09-05 Since the problems of race relations are worldwide the international origins and perspectives of this excellent and timely book are especially advantageous More research has been done in the United States than elsewhere on the psychology of race relations so it is appropriate that a plurality of the chapters of this book are by American authors a stellar group that includes leading contributors to our contemporary knowledge of the topic Contributors from the English speaking Commonwealth countries are next in number followed by authors from the United Kingdom where race related issues have only recently become a salient concern of politics and social ethics The editor has assigned topics to his carefully chosen author experts not by country or region but by matching the expertise of each author against a need for

coherent analysis of the important aspects of psychology and race Psychology and Race is divided into two major parts The first half of the book looks at the interracial situation itself The first section concentrates on the majority or dominant group and describes the development and measurement of racial awareness and prejudice and techniques for reducing prejudice the second section focuses on the reactions of subordinate or minority groups and the third deals with specific aspects of interpersonal interaction attitudes behavior and performance when the people concerned are of different races The book also looks at those areas of life where race is relevant and where psychology can help in an understanding of the situation The scope of this volume the distinction of its authors and the hardheaded sense of reality it brings to the discussion of these extremely complex issues will make it an invaluable resource not only for teachers and students but also for everyone concerned in any way with this most pressing issue of our times
