Ferguson, 2023-06-08 *Race Gender Sexuality and Social Class* Fourth Edition is an anthology of readings that explores the ways these social statuses shape our experiences and impact our life chances in society today Organized around broad topics identity power and privilege social institutions etc rather than categories of difference race gender class sexuality to underscore the idea that social statuses often intersect with one another to produce inequalities and form the bases of our identities in society The text features readings by leading experts in the field and reflects the many approaches scholars and researchers use to understand issues of diversity power and privilege Included with this title LMS Cartridge Import this title's instructor resources into your school's learning management system LMS and save time Don't use an LMS You can still access all of the same online resources for this title via the password protected Instructor Resource Site **Gender, Ethnicity, and Health Research** Sana Loue, 1999-08-31 Health researchers routinely evaluate health and illness across subgroups defined by their sex gender ethnicity and race All too often these classifications are proffered as an explanation for any differences that may be detected for example in access to care frequency of disease or response to treatment Relatively few researchers however have examined what these classifications mean on a theoretical level or in the context of their own research Assume for example that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites This conclusion may mean little without an examination of the various underlying issues Is there such a construct as race at all How were whites and African Americans classified as such Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate underutilization among African Americans To what extent are socioeconomic status and method of payment related to the less frequent use Are there differences in the manner in which health care providers present the various treatment options to

whites and to African Americans that could account for these differences in utilization Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization Is the racial classification a surrogate measure for another variable that has remained unidentified and unmeasured All too often unfortunately such issues are ignored or lightly dismissed with an entreaty for additional research

Race, Gender, and Political Representation Beth Reingold, Kerry Lee Haynie, Kirsten Widner, 2021. It is well established that the race and gender of elected representatives influence the ways in which they legislate, but surprisingly little research exists on how race and gender interact to affect who is elected and how they behave once in office. This book takes up the call to think about representation in the United States as intersectional and it measures the extent to which political representation is simultaneously gendered and raced. Drawing on original data on the presence, policy leadership, and policy impact of Black women and men, Latinas and Latinos, and White women and men in state legislative office in the late twentieth and early twenty-first centuries, this book demonstrates what an intersectional approach to identity politics can reveal.

Black Women and Public Health Stephanie Y. Evans, Sarita K. Davis, Leslie R. Hinkson, Deanna J. Wathington, 2022-03-01. 2022 CHOICE Outstanding Academic Title. *Black Women and Public Health* creates an urgently needed interdisciplinary dialogue about issues of race, gender, and health. An enduring history of racism, sexism, and dehumanization of Black women's bodies has largely rendered the health needs of the Black community inaudible and invisible. Grounded in the lived experiences and expertise of Black women, this collection bridges gaps between researchers, practitioners, educators, and advocates. Black women's public health work is a regenerative practice, one that looks backward, inward, and forward to improve the quality of life for Black communities in the United States and beyond. The three dozen authors in this volume offer analysis, critique, and recommendations for overcoming longstanding and contemporary challenges to equity in public health practices.

Intersections of Race, Gender, and Precarity Stephanie M. Baran, 2022-01-28. In *Intersections of Race, Gender, and Precarity: Navigating Insecurities in an American City*. Stephanie Baran argues that when it comes to assistance, the United States government often creates more problems than it solves. These institutions are not in the business of creating a pathway for people to escape poverty; often, they compound that poverty instead. Through a two-year ethnographic study of poverty and insecurity in Milwaukee, Wisconsin, the author shows how people navigate situations of poverty through interviews with recipients and organizations as well as those working at a local community pantry. Consequently, research uncovered how local food organizations with connections to the Milwaukee Chapter of the Black Panther Party hide their more radical roots to protect food donations from white donors, in essence protecting white fragility. People are far closer to experiencing poverty than they realize, as shown by the Government Shutdown of 2019 and the ongoing COVID-19 pandemic, and typically have incomplete and inaccurate ideas of poverty as well as how people can experience upward mobility. *Intersections of Race, Gender, and Precarity* reveals this gap through a focus on how all these factors show up in Milwaukee, Wisconsin.
