Race In Cyberspace:

Race in Cyberspace Beth Kolko, Lisa Nakamura, Gilbert Rodman, 2013-08-21 Groundbreaking and timely Race in Cyberspace brings to light the important yet vastly overlooked intersection of race and cyberspace Cybertypes Lisa Nakamura, 2013-09-13 First published in 2002 In Cybertypes Lisa Nakamura turns a sour assumption that the Net is color blind on its head Examining all facets of everyday web life she shows that racial and ethnic stereotypes or cybertypes are hardwired into our online interactions Identity tourists masquerade in chat rooms as Asian_Geisha or Alatiniolover Web directories sharply delimit racial categories Anonymous computer users are assumed to be white Lively provocative Cybertypes takes up computer relationship between race ethnicity and technology and offers a candid and nuanced understanding of identity in the information age Digital Diaspora Anna Everett, 2009-02-05 Traces the rise of black participation in cyberspace Law and Society Approaches to Cyberspace Paul Schiff Berman, 2017-11-28 During the past decade the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles considering fundamental questions about what law is how it is formed and its relation to cultural and technological change This collection brings together many of these seminal works which variously seek to interrogate assumptions about the nature of communication knowledge invention information sovereignty identity and community From the use of metaphor in legal opinions about the internet to the challenges posed by globalization and deterritorialization to the potential utility of online governance models to debates about copyright free expression and privacy this collection offers an invaluable introduction to cutting edge ideas about law and society in an online era In addition the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity **Artificial Intelligence and International Conflict in Cyberspace** Fabio Cristiano, Dennis Broeders, François Delerue, Frédérick Douzet, Aude Géry, 2023-05-11 This edited volume explores how artificial intelligence AI is transforming international conflict in cyberspace Over the past three decades cyberspace developed into a crucial frontier and issue of international conflict However scholarly work on the relationship between AI and conflict in cyberspace has been produced along somewhat rigid disciplinary boundaries and an even more rigid sociotechnical divide wherein technical and social scholarship are seldomly brought into a conversation This is the first volume to address these themes through a comprehensive and cross disciplinary approach With the intent of exploring the question what is at stake with the use of automation in international conflict in cyberspace through AI the chapters in the volume focus on three broad themes namely 1 technical and operational 2 strategic and geopolitical and 3 normative and legal These also constitute the three parts in which the chapters of this volume are organised although these thematic sections should not be considered as an analytical or a disciplinary

demarcation This book will be of much interest to students of cyber conflict AI security studies and International Relations The Open Access version of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
