Always, Rachel Rachel Carson, Dorothy E. Freeman, 2022-03-08 These letters between the pioneering environmentalist and her beloved friend reveal a vibrant caring woman behind the scientist Los Angeles Times Rachel Carson author of *The Silent Spring* has been celebrated as the pioneer of the modern environmental movement Although she wrote no autobiography she did leave letters and those she exchanged sometimes daily with Dorothy Freeman some 750 of which are collected here are perhaps more satisfying than an account of her own life In 1953 Carson became Freeman's summer neighbor on Southport Island ME The two discovered a shared love for the natural world their descriptions of the arrival of spring or the song of a hermit thrush are lyrical but their friendship quickly blossomed as each realized she had found in the other a kindred spirit To read this collection is like eavesdropping on an extended conversation that mixes the mundane events of the two women's family lives with details of Carson's research and writing and later her breast cancer Few who read these letters will forget these remarkable women and their even more remarkable bond Publishers Weekly Darting fresh sensuous pleasingly elliptical at times these letters also serve to tether the increasingly deified Carson firmly to earth just where she'd want to be Kirkus Reviews starred review It is not often that a collection of letters reveals character emotional depth personality indeed intellect and talent as well as a full biography might these letters do all that The New York Times Book Review Provides insight into the creative process and a look into the daily lives of two intelligent perceptive women whose family responsibilities were at times almost crushing Library Journal Dotted with vivid observations of the natural world and perceptive commentary on friendship family fame and life itself Always Rachel will appeal to readers interested in biography and women's studies as well as those drawn to nature writing and the history of the environmental movement Booklist Online Lost Woods Rachel Carson, 1999-09-15 Discover the previously uncollected works of *Silent Spring* author Rachel Carson considered one of the best nature writers of the 20th century Lyric descriptive informative and moving The New York Times When Rachel Carson died of cancer in 1964 her four books including the environmental classic *Silent Spring* had made her one of the most famous people in America This anthology of previously uncollected writings is a priceless addition to our knowledge of Rachel Carson her affinity with the natural world and her life Featuring nature writing speeches field notebook passages and letters this collection is an invaluable insight to Carson's thought and philosophy and a treasure

trove for environmentalists **Rachel Carson** Kathleen V. Kudlinski, 1989-05-01 Rachel Carson scientist author and environmentalist Rachel Carson was always fascinated by the ocean As a child she dreamed of it and longed to see it As a young woman she felt torn between her love for nature and her desire to pursue a writing career Then she found a way to combine both Rachel had a talent for writing and talking about science in a way that everyone could understand and enjoy With her controversial book *Silent Spring* Rachel Carson changed the way we look at our planet Contains black and white illustrations Kudlinski has admirably captured the driving force of spirit of a shy but courageous woman in a succinct respectful approach Booklist About the Women of Our Time series International in scope the Women of Our Time series of biographies cover a wide range of personalities in a variety fields More than a history lesson these books offer carefully documented life stories that will inform inspire and engage Rachel Carson Linda Lear, 1998-09-15 A biography of the environmentalist chronicles her development from biologist and nature writer to muckraker and champion of ecological causes **Rachel Carson** Arlene Rodda Quaratiello, 2010 This readable and up to date biography traces the famous environmentalist s development as a writer from earliest childhood through the publication of her best known work *Silent Spring* 1962 **Rachel Carson** Linda Lear, 2009 By drawing on previously unavailable sources and on interviews with those who knew her Linda Lear gives a compelling portrait of this heroic woman illuminating the origin of her connection with nature and of her determination to save what she loved Lear reveals the unexpected influence of Carson s early experience with industrial pollution and examines her life changing encounter with the possibility of global extinction in the frightening days of the early Cold War The book follows Carson s efforts to become a marine biologist at a time when women were unwelcome in the academic community It shows how her connections with nature were confirmed and strengthened through her work as a government scientist and editor where her views about the potential dangers of synthetic chemical pesticides evolved By the late 1950s Carson had transformed colorless government research into three brilliant popular books about the sea including *The Sea Around Us* and had become the most respected science writer in America Rachel Carson challenged the culture of her time and in the process shaped a powerful social movement that altered the course of American history *Rachel Carson* E. A. Tremblay, 2003 A biography of the biologist who helped initiate the environmental movement The History and Poetics of Scientific Biography Thomas Söderqvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today s publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will

be welcomed by those interested in the genre of science biography and who wish to re-examine its history, foundational problems and theoretical implications. Borrowing approaches and methods from cultural studies and the history, philosophy and sociology of science, the contributions cover a broad range of subjects, periods and locations. By presenting such a rich diversity of essays, the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day. In so doing, it provides a compelling overview of the history of the genre, suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests.

A Biographical Encyclopedia of Scientists and Inventors in American Film and TV since 1930 A. Bowdoin Van Riper, 2011-09-15

Films that dramatize historical events and the lives of historical figures, whether they are intended to educate or to entertain, play a significant role in shaping the public's understanding of the past. In *A Biographical Encyclopedia of Scientists and Inventors in American Film and TV since 1930*, A. Bowdoin Van Riper focuses on the dramatized portrayals of a particular group of historical figures: scientists, engineers and inventors that have appeared on American film and television screens. This volume analyzes individual portrayals, the public images of particular scientists and inventors, and the ideas about science and technology that collectively they represent. In this first in-depth study of how historic scientists and inventors have been portrayed on screen, Van Riper catalogs nearly 300 separate performances and includes essays on the screen images of more than 80 historic scientists, inventors, engineers and medical researchers. The individuals covered include Isaac Newton, Benjamin Franklin, Thomas Edison, Albert Einstein, Marie Curie, Dian Fossey and Bill Gates. Arranged chronologically by the subject's date of birth, entries for each individual explain their major contributions to science and technology, analyze the ways in which they've been portrayed in film and on television, and conclude with a complete list of screen portrayals and a discussion of suggestions for further reading.

A Biographical Encyclopedia of Scientists and Inventors in American Film and TV since 1930 will be of interest to anyone concerned with the depiction of historical events and historical figures in film and television, and to anyone interested in the public understanding of science and technology.

Rachel Carson and Her Book That Changed the World Laurie Lawlor, 2014-08-31

A biography of the pioneering scientist and environmentalist Rachel Carson, author of *Silent Spring*. Once you are aware of the wonder and beauty of earth, you will want to learn about it, wrote Rachel Carson. Determined and curious even as a child, Rachel Carson's fascination with the natural world led her to study biology and pursue a career in science at a time when very few women worked in the field. This lyrical, illustrated biography follows Carson's journey from a girl exploring the woods to a woman working to help support her family during the Great Depression, to a journalist and pioneering researcher investigating and exposing the harmful effects of pesticide overuse. Best known for writing *Silent Spring*, Rachel Carson was a major figure in the early environmental movement, and her work brought a greater understanding of the impact humans have on our planet. *Rachel Carson and Her Book That Changed the World* offers a glimpse at the early life that shaped her interest in nature and

the way one person's determination can inspire others to fight for real change. An author's note delves into how *Silent Spring* helped shape the modern environmental movement and inspired a generation of readers to get involved in conservation. Detailed source notes and a list of recommended reading are included. A National Science Teachers Association Outstanding Science Trade Book, A Bank Street Best Children's Book of the Year, John Burroughs Riverby Award, Green Earth Book Award Honor Book.

Rachel Carson and Her Sisters Robert K Musil, 2014-04-01. In *Rachel Carson and Her Sisters* Robert K Musil redefines the achievements and legacy of environmental pioneer and scientist Rachel Carson, linking her work to a wide network of American women activists and writers and introducing her to a new contemporary audience. Rachel Carson was the first American to combine two longstanding but separate strands of American environmentalism: the love of nature and a concern for human health. Widely known for her 1962 best seller *Silent Spring*, Carson is today often perceived as a solitary great woman whose work single-handedly launched a modern environmental movement. But as Musil demonstrates, Carson's life's work drew upon and was supported by already existing movements, many led by women in conservation and public health. On the fiftieth anniversary of her death, this book helps underscore Carson's enduring environmental legacy and brings to life the achievements of women writers and advocates such as Ellen Swallow Richards, Dr. Alice Hamilton, Terry Tempest Williams, Sandra Steingraber, Devra Davis, and Theo Colborn, all of whom overcame obstacles to build and lead the modern American environmental movement.

Early American Nature Writers Daniel Patterson, 2007-11-30. At a time when the environment is of growing concern to students and general readers, nature writing is especially meaningful. This book profiles the literary careers of 52 early American nature writers such as John James Audubon, Ralph Waldo Emerson, Caroline Stansbury Kirkland, Thomas Jefferson, Henry David Thoreau, and Mabel Osgood.

Wright Each entry is written by an expert contributor and discusses the writer's life and works. Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading. Global warming, pollution, and other issues have made the environment a topic of constant discussion these days. Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion. Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces. At a time when students are being encouraged to read and write about nonfiction, these masterworks of early American nature writing are all the more important. This book gives students and general readers a welcome introduction to early American nature writers.

Women of Science John S. Croucher, 2019-12-15 An investigation into the lives of some of the more remarkable women in the history of scientific discovery.

Macmillan Dictionary of Women's Biography Jennifer Uglow, 1991-06-27 The enthusiastic response to the Dictionary has prompted this second, substantially enlarged, revised, and updated edition. It now contains essential details of the lives of over 2000 women from all periods, cultures, and walks of life, from queens to cooks, engineers to entertainers, pilots to poisoners. The new entries include women who have hit the headlines in the past five years, from Cory Aquino to Madonna, but the historical coverage has also been broadened in response to new research, and a special new feature is the extended treatment of women from Third World countries. With subsections for further reading, comprehensive subject index, and bibliographical survey, the Macmillan Dictionary of Women's Biography is an invaluable reference source and a fascinating bedtime read.

Rachel Carson and Her Book That Changed the World Laurie Lawlor, 2014-07 For use in schools and libraries only. Retells the story of Rachel Carson, a pioneering environmentalist who wrote and published *Silent Spring*, the revolutionary book pointing out the dangerous effects of chemicals on the living world.

Listening to Crickets Candice F. Ransom, 1993-01-01 For use in schools and libraries only. Examines the life of the marine biologist and science writer whose book *Silent Spring* changed the way we look at pesticides.

Rachel Carson: Extraordinary Environmentalist Jill C. Wheeler, 2012-08-15 In this title, examine the life of courageous environmentalist and author of *Silent Spring*, Rachel Carson. Readers will enjoy digging into Carson's personal story, beginning with her childhood writing stories and exploring the Allegheny River near her home in Pennsylvania. Students can trace Carson's success from her education at PCW and Woods Hole to her roles with the Bureau of Fisheries and the FWS before her writing career took hold. Engaging text and photos offer insight on topics such as marine biology, pesticide use, and the birth of the EPA. While a timeline, glossary, and index supplement the text, an entertaining science activity allows readers to try their own hands on experience based on the science that inspired this woman's groundbreaking career. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.
