Compelling Interest Mitchell J. Chang,Daria Witt,James Jones,Kenji Hakuta,2003-03-12 In recent years American colleges and universities have become the locus of impassioned debates about race conscious social policies as conflicting theories clash over the ways to distribute the advantages of higher education in a fair and just manner Just below the surface of these policy debates lies a complex tangle of ideologies histories grievances and emotions that interfere with a rational analysis of the issues involved As never before the need for empirical research on the significance of race in American society seems essential to solving the manifest problems of this highly politicized and emotionally charged aspect of American higher education The research evidence presented in this book has a direct relevance to those court cases that challenge race conscious admission policies of colleges and universities Though many questions still need to be addressed by future research the empirical data collected to date makes it clear that affirmative action policies do work and are still very much needed in American higher education This book also provides a framework for examining the evidence pertaining to issues of

fairness merit and the benefits of diversity in an effort to assist courts and the public in organizing beliefs about race and opportunity

Examining Racial and Ethnic Diversity in American Higher Education J. Clint Kinkead, 2011 Most higher education scholars associate access to higher education with the Associate Colleges sector While Associate College ACs better known to the public as community colleges have a long standing and well documented relationship with access regional universities are also agents of access The Carnegie Foundation for the Advancement of Teaching terms these regional institutions as Master's Colleges and Universities MCUs From the data presented in this work I argue that the ambitious goals of the American Graduation Initiative cannot be reached without the collaboration of these two institutional types Contains 4 tables

Diversity Leadership in Higher Education Adalberto Aguirre, Jr., Ruben O. Martinez, 2006 Promoting diversity as a core value among social groups is one of the major challenges faced by institutions of higher education in the United States By focusing on racial and ethnic minorities in higher education this monograph provides a view of diversity as a positive and dynamic social force in society that promotes its integration as a core value and process Diversity leadership challenges higher education to move beyond co-optation strategies in which diversity is viewed as a descriptive and static organizational element to the adoption of transformational strategies in which diversity is viewed as a dynamic and positive process Through the promotion and development of diversity leadership institutional leadership is seen as building capacity to promote inclusive learning and workplace environments in colleges and universities As demographic shifts in US society create an ever expanding context in which the well being of the nation becomes increasingly linked to the social and cultural groups that have been systematically excluded from full participation in American society the need for positive cultural and structural changes that foster their inclusion in higher education becomes an important challenge to address This volume provides an overview of the context for diversity leadership roles and practices in higher education It argues for an alignment between institutions of higher education and the diverse populations they serve in this country This is volume 32 number 3 of the ASHE Higher Education Report a bi-monthly journal published by Jossey Bass See our entire list of ASHE Higher Education Report titles for a wide variety of critical issues facing Higher Education today

Promoting Racial and Ethnic Diversity in the Faculty , The Racial Crisis in American Higher Education William A. Smith,Philip G. Altbach,Kofi Lomotey,2012-02-01 Why is it that as we enter the twenty first century the nation s predominantly white colleges and universities continue to be settings where people of color feel unwelcome and marginalized The contributors to this volume dissect a variety of structural and attitudinal factors that are prevalent in the higher education community organizational constructs and value orientations which seem to hark more to the past than to the future They comment on the political social and economic factors that have shaped academic culture and buttressed its quietly efficient maintenance of racially discriminatory practices The American system of higher education is often regarded as the best in the world Smith Altbach and Lomotey have edited a volume that implicitly asks how much better still it could be if it

embraced people of color and provided them with a supportive and nurturing environment one which encouraged them to reach their fullest creative and intellectual potential Indeed this will probably be the most significant challenge that the academy faces in the twenty first century William B Harvey Vice President and Director Office of Minorities in Higher Education American Council on Education Washington D C

Race and Higher Education Annie Howell, Frank Tuitt, 2003-01-01 The contributors to *Race and Higher Education* guide educators toward an understanding of how changes in the student population call for new approaches to classroom instruction and address the need for new pedagogical practices in increasingly diverse college classrooms Over the last few decades U S colleges and universities have witnessed increasing diversity in their student bodies Yet faculty members operating on the notion that one pedagogy fits all students continue to employ traditional modes of instruction This adherence to outdated pedagogies has created potentially harmful learning environments for all students and particularly for students of color *Race and Higher Education* addresses this persistent problem guiding educators toward a better understanding of how changes in the student population have resulted in the need for new approaches to classroom instruction By including voices from inside classrooms along with analyses from scholarly researchers this volume provides college and university teachers administrators students and scholars with a critical instrument for improving higher education

La Belle, 1996-01-01 La Belle and Ward address a major question confronting American higher education How do colleges and universities best prepare students for common citizenship in a diverse democratic state while also nurturing their groups cultures values and institutional participation The authors clarify current debates about diversity and the content of curriculum what one commentator calls the culture wars The book includes an overview of ethnicity intergroup relations and related concepts the history and development of multiculturalism and ethnic studies in higher education in the United States and an analysis of the issues related to diversity in higher education particularly as they relate to tensions between ethnic studies and multicultural efforts

Locks, 2013-09-05 As scholars and practitioners in higher education attempt to embrace and lead diversity efforts it is imperative that they have an understanding of the issues that affect historically underrepresented students. Using an intersectional approach that connects the categories of race, class, and gender, *Diversity and Inclusion on Campus* comprehensively covers the range of college experiences from gaining access to higher education to successfully persisting through degree programs. Authors Winkle-Wagner and Locks bridge research, theory, and practice related to the ways that peers, faculty, administrators, and institutions can and do influence racially and ethnically underrepresented students' experiences. This book is an invaluable resource for future and current higher education and student affairs practitioners working toward full inclusion and participation for all students in higher education. Special features: Chapter Case Studies: cases written by on-the-ground practitioners help readers make meaningful connections between theory, research, and practice. Coverage of Theory and Research: each chapter provides a systematic treatment of the literature and research related to underrepresented students' experiences of getting into college, getting through college, and getting out of college. Discussion Questions: questions encourage practitioners and researchers to explore concepts in more depth, consider best practices, and make connections to their own contexts.
