trepidation forcing citizens and leaders to grapple with controversial issues of race class and gender. Renowned scholar Harvard Sitkoff has devoted his life to the study of the civil rights movement becoming a key figure in global human rights discussions and an authority on American liberalism. *Toward Freedom Land* assembles Sitkoff's writings on twentieth century race relations representing some of the finest race related historical research on record. Spanning thirty five years of Sitkoff's distinguished career the collection features an in depth examination of the Great Depression and its effects on African Americans the intriguing story of the labor movement and its relationship to African American workers and a discussion of the effects of World War II on the civil rights movement. His precise analysis illuminates multifaceted racial issues including the New Deal's impact on race relations the Detroit Riot of 1943 and connections between African Americans Jews and the Holocaust.

Unfinished Business Michael J. Klarman, 2007-10 Michael J. Klarman author of *From Jim Crow to Civil Rights* which won the prestigious Bancroft Prize in American History is one of the leading authorities on the history of civil rights law in the United States. In *Unfinished Business* he illuminates the course of racial equality in America revealing that we have made less progress than we like to think. Indeed African Americans have had to fight for everything they have achieved. Klarman highlights a variety of social and political factors that have influenced the path of racial progress wars migrations urbanization shifting political coalitions and he looks in particular at the contributions of law and of court decisions to American equality. The author argues that court decisions tend to reflect the racial mores of the times which is why the Supreme Court has not been a heroic defender of the rights of racial minorities. And even when the Court has promoted progressive racial change its decisions have often been unenforced in part because severely oppressed groups rarely have the resources necessary to force the issue. Klarman also sheds light on the North South dynamic and how it has influenced racial progress arguing that as southerners have become more anxious about outside challenges to their system of white supremacy they have acted in ways that eventually undermined that system. For example as southern slave owners demanded greater guarantees for slavery from the federal government they alienated northerners who came to fear a slave power conspiracy that would interfere with their liberties. *Unfinished Business* offers an invaluable succinct account of racial equality and civil rights throughout American history.

The American Non-Dilemma Nancy DiTomaso, 2013-01-17 The Civil Rights movement of the 1960s seemed to mark a historical turning point in advancing the American dream of equal opportunity for all citizens regardless of race. Yet 50 years on racial inequality remains a troubling fact of life in American society and its causes are highly contested. In *The American Non Dilemma* sociologist Nancy DiTomaso convincingly argues that America's enduring racial divide is sustained more by whites preferential treatment of members of their own social networks than by overt racial discrimination. Drawing on research from sociology political science history and psychology as well as her own interviews with a cross section of non Hispanic whites DiTomaso provides a comprehensive examination of the persistence of racial inequality in the post Civil Rights era and how it plays out in today's economic and political context.

Taking Gunnar Myrdal's classic work on America's racial divide *The American Dilemma* as her departure point DiTomaso focuses on the white side of the race line. To do so she interviewed a sample of working middle and upper class whites about their life histories, political views and general outlook on racial inequality in America. While the vast majority of whites profess strong support for civil rights and equal opportunity regardless of race, they continue to pursue their own group-based advantage, especially in the labor market where whites tend to favor other whites in securing jobs protected from market competition. This opportunity hoarding leads to substantially improved life outcomes for whites due to their greater access to social resources from family, schools, churches and other institutions with which they are engaged. DiTomaso also examines how whites understand the persistence of racial inequality in a society where whites are on average the advantaged racial group. Most whites see themselves as part of the solution rather than part of the problem with regard to racial inequality. Yet they continue to harbor strong reservations about public policies such as affirmative action intended to ameliorate racial inequality. In effect, they accept the principles of civil rights but not the implementation of policies that would bring about greater racial equality. DiTomaso shows that the political engagement of different groups of whites is affected by their views of how civil rights policies impact their ability to provide advantages to family and friends. This tension between civil and labor rights is evident in Republicans' use of anti-civil rights platforms to attract white voters and in the efforts of Democrats to bridge race and class issues or civil and labor rights broadly defined. As a result, DiTomaso finds that whites are at best uncertain allies in the fight for racial equality. Weaving together research on both race and class along with the life experiences of DiTomaso's interview subjects, *The American Non Dilemma* provides a compelling exploration of how racial inequality is reproduced in today's society, how people come to terms with the issue in their day-to-day experiences and what these trends may signify in the contemporary political landscape.

Answering the Call Nathaniel R. Jones, 2010-03-01
Jones, a trailblazing African American judge, delivers an urgently needed perspective on American history. A passionate and informative account. Booklist starred review. *Answering the Call* is an extraordinary eyewitness account from an unsung hero of the battle for racial equality in America, a battle that far from ending with the great victories of the civil rights era, saw some of its signal achievements in the desegregation fights of the 1970s and its most notable setbacks in the affirmative action debates that continue into the present in Ferguson, Baltimore and beyond. Judge Nathaniel R. Jones's groundbreaking career was forged in the 1960s. As the first African American assistant US attorney in Ohio, as assistant general counsel of the Kerner Commission and beginning in 1969 as general counsel of the NAACP. In that latter role, Jones coordinated attacks against Northern school segregation, a vital divisive and poorly understood chapter in the movement for equality, twice arguing in the pivotal US Supreme Court case *Bradley v. Milliken* which addressed school desegregation in Detroit. He also led the national response to the attacks

against affirmative action spearheading and arguing many of the signal legal cases of that effort Answering the Call is a stunning inside story of the contemporary struggle for civil rights Essential reading for understanding where we are today underscoring just how much work is left to be done Vernon E Jordan Jr civil rights activist A forthright testimony by a witness to history Kirkus Reviews Racial Equality in America John Hope Franklin,1976 An eloquent reminder from a distinguished Black historian that the dream of racial equality in America remains unrealized **The Black-White Achievement Gap** Rod Paige,Elaine WITTY,2010-02-01 When it comes to race in America we must face one uncomfortable but undeniable fact Almost 50 years after the birth of the civil rights movement inequality still reigns supreme in our classrooms At a time when African American students trail their white peers on academic tests and experience high dropout rates low college completion rates and a tendency to shy away from majors in hard sciences and mathematics the Black White achievement gap in our schools has become the major barrier to racial equality and social justice in America In fact it is arguably the greatest civil rights issue of our time The Black White Achievement Gap is a call to action for this country to face up to and confront this crisis head on Renowned former Secretary of Education Rod Paige believes we can close this gap In this thought provoking book he and Elaine Witty trace the history of the achievement gap discuss its relevance to racial equality and social justice examine popular explanations and offer suggestions for the type of committed leadership and community involvement needed to close it African American leaders need to rally around this important cause if we are to make real progress since students academic performance is a function not only of school quality but of home and community factors as well The Black White Achievement Gap is an unflinching and long overdue look at the very real problem of racial disparity in our schools and what we must do to solve it Race Relations in America Nikki Khanna,Noriko Matsumoto,2021-06-14 This book is an essential resource for anyone who wants to understand race in America drawing on research from a variety of fields to answer frequently asked questions regarding race relations systemic racism and racial inequality This work is part of a series that uses evidence based documentation to examine the veracity of claims and beliefs about high profile issues in American culture and politics This particular volume examines the true state of race relations and racial inequality in the United States drawing on empirical research in the hard sciences and social sciences to answer frequently asked questions regarding race and inequality The book refutes falsehoods misunderstandings and exaggerations surrounding these topics and confirms the validity of other assertions Assembling this empirical research into one accessible place allows readers to better understand the scholarly evidence on such high interest topics as white privilege racial bias in criminal justice media bias housing segregation educational inequality disparities in employment racial stereotypes and personal attitudes about race and ethnicity in America The authors draw from scholarly research in biology genetics medicine sociology psychology anthropology and economics among many other fields to answer these questions and in doing so they provide readers with the information to enter any conversation about American race relations in the 21st century as informed citizens **Racism**
