Racism A Short History:

Racism George M. Fredrickson, 2015-09-15 Are antisemitism and white supremacy manifestations of a general phenomenon Why didn't racism appear in Europe before the fourteenth century and why did it flourish as never before in the eighteenth and nineteenth centuries Why did the twentieth century see institutionalized racism in its most extreme forms Why are egalitarian societies particularly susceptible to virulent racism What do apartheid South Africa Nazi Germany and the American South under Jim Crow have in common How did the Holocaust advance civil rights in the United States With a rare blend of learning economy and cutting insight George Fredrickson surveys the history of Western racism from its emergence in the late Middle Ages to the present Beginning with the medieval antisemitism that put Jews beyond the pale of humanity he traces the spread of racist thinking in the wake of European expansionism and the beginnings of the African slave trade And he examines how the Enlightenment and nineteenth century romantic nationalism created a new intellectual context for debates over slavery and Jewish emancipation Fredrickson then makes the first sustained comparison between the color coded racism of nineteenth century America and the antisemitic racism that appeared in Germany around the same time He finds similarity enough to justify the common label but also major differences in the nature and functions of the stereotypes invoked The book concludes with a provocative account of the rise and decline of the twentieth century's overtly racist regimes the Jim Crow South Nazi Germany and apartheid South Africa in the context of world historical developments This illuminating work is the first to treat racism across such a sweep of history and geography It is distinguished not only by its original comparison of modern racism's two most significant varieties white supremacy and antisemitism but also by its eminent readability

The Comparative Imagination George M. Fredrickson, 1997-12-10 In this collection of essays an eminent American historian of race relations discusses issues central to our understanding of the history of racism the role of racism and the possibilities for justice in contemporary society George M. Fredrickson provides an eloquent and vigorous examination of race relations in the United States and South Africa and at the same time illuminates the emerging field of comparative history history that is explicitly cross cultural in its comparisons of nations eras or social structures Taken together these thought provoking accessible essays several never before published bring new precision and depth to our understanding of racism and justice both historically and for society today The first group of essays in *The Comparative Imagination* summarizes and evaluates the cross national comparative history written in the past fifty years These essays pay particular attention to comparative work on slavery and race relations frontiers nation building and the growth of modern welfare states and class and gender relations The second group of essays represents some of Fredrickson's own explorations into the cross cultural study of race and racism Included are new essays covering such topics as the theoretical and cross cultural meaning of racism the problem of race in liberal thought and the complex relationship between racism and state based nationalism The third group contains Fredrickson's recent work on anti racist and black liberation movements in the

United States and South Africa especially in the period since World War II In addition Fredrickson s provocative introduction breaks significant new intellectual ground outlining a justification for the methods of comparative history in light of such contemporary intellectual trends as the revival of narrative history and the predominance of postmodern thought **Racism and Anti-Racism Today** Amanuel Elias,2024-05-02 Acknowledging efforts to dismantle racism at multiple levels this book examines racism and anti racism as interconnected rather than isolated issues proposing a framework for effective anti racist policy and practice **Louder Than Words** Brad Stephens,2021-11-18 Life is louder than words can ever express because from a biblical point of view the world is broken by humanity s rebellion against its creator Humanity is fragmented all the offspring of Adam and Eve are born loving death That is something that the modern age has tried to ignore and the postmodern age longs to embrace More to the point it is something that the church has tried to forget However we do so at our own peril This work is a snapshot of the development of fragmentation in the Western world It is also a map toward wholeness We cannot move forward if we do not know where we are or where we are going This searching for heart in a heartless world is an attempt to locate where we are on the map of history by examining the past through the corrective lenses of living faith so that we may be able to teach our children to have hope in hopeless times **White Supremacy** George M. Fredrickson,1981-01-15 The history of race relations on two continents is enormously enriched by this comparative study **A Short History of Relations Between Peoples** John Ellis,2024-10-15 A Short History of Relations Between Peoples traces how the cultural attitudes that different peoples and nations had toward each other have undergone a profound and positive change during the last 500 years For most of recorded history neighboring countries tribes and peoples everywhere in the world regarded each other with apprehension when not outright fear and loathing Tribal or racial attitudes were virtually universal no one group being much better or worse in this respect than any other and for good reason given the conditions of life before the modern era But in the last 500 years relations between different peoples have undergone a slow but profound change In this book John Ellis explains how a confluence of discoveries inventions explorations as well as social and political changes gave birth to a new attitude one expressed succinctly in the Latin phrase *gens una sumus* we are all one people This sentiment has by now become a modern orthodoxy however inconsistently or even hypocritically it may sometimes be espoused Ellis tells the story of how the transition happened setting out the crucial stages in its progress as well as the key events that moved it forward and identifying the individuals and groups that brought about the eventual dominance of this new outlook This is a compelling story in its own right but it is also a useful inoculation against the destructive ideas of today s race hustlers An accurate grasp of how this crucial change happened contradicts everything that they want us to believe Ideologies such as Critical Race Theory and Diversity Equity and Inclusion have everything touching on race and racism completely backwards The villains of their ignorant version of history are really the heroes In explaining how the historical record makes nonsense of CRT Ellis s book amounts to the most fundamental and

complete refutation of that pernicious ideology The Oxford Handbook of the History of Education John L. Rury, Eileen Tamura, 2019 This handbook offers a global perspective on the historical development of educational institutions systems of schooling educational ideas and educational experiences Its 36 chapters consider the field s changing scholarship while examining particular national and regional themes and offering a comparative perspective Each also provides suggestions for further research and analysis **The Oxford Encyclopedia of Women in World History** Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike
