Finance at the Threshold Christopher Houghton Budd,2016-04-15 Every banking crisis whatever its particular circumstances has two features in common with every previous one Each has been preceded by a period of excessive monetary ease and by ill thought out regulatory changes For many the recent hiatus in inter bank lending has been seen as a blip enormous in size and global in scope but nonetheless a blip Finance at the Threshold offers a unique perspective from an English economic and monetary historian In it the author asks Why did the banks stop lending to one another and why now Was it merely a matter of over loose credit due to the relaxation of traditional prudence or did global finance find itself at its limits Have government bail outs saved the day or merely postponed the problem Christopher Houghton Budd offers a radical view of the global financial crisis spanning a wide gamut of current thinking He argues that we need above all to overcome the left right divide so much taken for granted today and promote financial literacy to young people His contribution to the Transformation and Innovation Series claims that global finance has brought us to the limits of what
