phenomena their causes mechanisms and social costs Complex and multidimensional as it is social reality is best described from various perspectives For that reason a potentially interesting and fruitful interdisciplinary approach characterises the book It contains mainly texts of psychologists who work at the Jagiellonian University in Cracow The articles of sociologists lawyers and one theoretician of education broaden the horizon and thus contribute new insights to the entirety of the book The body of articles predominantly relates to Polish reality as well as stems from the experience of the Polish society in the period of political transformation No less interesting are the articles on the pathology of political discourse community policing problems in France and issues of social concern victims of violence problems of the elderly and collective behaviour The volume is of interest for social scientists and professionals as well as for students
