Real Space Cowboys:

The Real Space Cowboys Ed Buckbee, Wally Schirra, 2005 In 1959 seven U S military fighter pilots were selected to train as America's first astronauts Alan Shepard Gordon Cooper Gus Grissom John Glenn Scott Carpenter Wally Schirra and Deke Slayton would become known as the Mercury Seven M7 These men who had jockeyed for the best flying jobs in the military began competing for rides on rockets Most would eventually vie for the ultimate ride to the moon The author Ed Buckbee who has enjoyed a 40 year association with the U S manned space flight program follows these brave men who pioneered the U S space program Through time and personal friendships he captures dreams of flying higher faster and farther than any one in the known universe Readers are invited behind the scenes to witness the competition between chimpanzees and astronauts and the conflict between NASA engineers designing capsules and those who would pilot them Through this book readers feel the collective will of a nation to defeat the Russians in an all out space race via an American team of 400 000 engineers technicians astronauts and support personnel who performed as if the country were at war The eras of Mercury Gemini and Apollo these were times of nobility and humility but also times of arrogance tension and from time to time humour Gotchas were commonplace astronaut pranks and a dubious answer to the question Are you a turtle resulted in a healthy bar tab But what of our first space heroes after the Apollo program was completed Accepting the call of Project Mercury meant a lifetime commitment Their work continued with motivational programs for youth through the U S Space Camp programs public programs at institutions such as the Smithsonian's National Air and Space Museum the U S Space 30th Anniversary Documentary on Skylab Gotcha film about Alan Shepard Space Camp Documentary Reach For The Stars 1997 Panel Discussion at Pensacola with Armstrong Shepard Lovell Aldrin 2002 Panel Discussion at Pensacola with the Mercury Astronauts Gotcha Documentary The Lighthouse Never Fails U S Space Documentary The Flight of Freedom 7 Mercury Astronauts Documentary The First Gotcha film of Apollo 12 Apollo 1 Ryan S. Walters, 2021-05-25 On January 27 1967 astronauts Gus Grissom Ed White and Roger Chaffee climbed into a new spacecraft perched atop a large Saturn rocket at Kennedy Space Center in Florida for a routine dress rehearsal of their upcoming launch into orbit then less than a month away All three astronauts were experienced pilots and had dreams of one day walking on the moon But little did they know nor did anyone else that once they entered the spacecraft that cold winter day they would never leave it alive The Apollo program would be perilously close to failure before it ever got off the ground But rather than dooming the space program this tragedy caused the spacecraft to be completely overhauled creating a stellar flying machine to achieve the program's primary goal putting man on the moon Apollo 1 is a candid portrayal of the astronauts the disaster that killed them and its aftermath In it readers will learn How the Apollo 1 spacecraft was doomed from the start with miles of uninsulated wiring and tons of flammable materials in a pure oxygen atmosphere along with a hatch that wouldn't open How due to political pressure the government contract to build the Apollo 1 craft went to a bidder with an inferior plan How public opinion polls

were beginning to turn against the space program before the tragedy and got much worse after Apollo 1 is about America fulfilling its destiny of man setting foot on the moon It s also about the three American heroes who lost their lives in the tragedy but whose lives were not lost in vain *Aurora 7* Colin Burgess,2015-08-28 TO A NATION enthralled by the heroic exploits of the Mercury astronauts the launch of Lt Cmdr Scott Carpenter on NASA s second orbital space flight was a renewed cause for pride jubilation and celebration Within hours that excitement had given way to stunned disbelief and anxiety as shaken broadcasters began preparing the American public for the very real possibility that an American astronaut and his spacecraft may have been lost at sea In fact it had been a very close call Completely out of fuel and forced to manually guide Aurora 7 through the frightening inferno of re entry Carpenter brought the Mercury spacecraft down to a safe splashdown in the ocean In doing so he controversially overshot the intended landing zone Despite his efforts Carpenter s performance on the MA 7 mission was later derided by powerful figures within NASA He would never fly into space again Taking temporary leave of NASA Carpenter participated in the U S Navy s pioneering Sealab program For a record 30 days he lived and worked aboard a pressurized habitat resting on the floor of the ocean becoming the nation s first astronaut aquanaut explorer Following extensive research conducted by noted spaceflight historian Colin Burgess the drama filled flight of Aurora 7 is faithfully recounted in this engrossing book along with the personal recollections of Scott Carpenter and those closest to the actual events *Sigma 7* Colin Burgess,2016-05-28 Colin Burgess offers a comprehensive yet personal look at the 1962 orbital mission of Wally Schirra aboard the spacecraft Sigma 7 the first book about this popular pioneering astronaut which explores his entire life and accomplishments This continues the *Pioneers in Early Spaceflight* series the volumes of which form an excellent record of Project Mercury s pioneering early phase of the Space Age Schirra s pre NASA life is examined as well as his training as a NASA astronaut and for his Mercury MA 8 flight The 6 orbit flight of Sigma 7 is fully covered from its origins through to the spacecraft s safe recovery from the ocean after a highly successful Mercury mission Schirra s participation on the Gemini 6 and Apollo 7 missions is also told but in brief and the book also relates his post NASA life and activities through to his passing in 2007 The Mercury Seven occupy a unique spot in the history of human spaceflight and Schirra is at last given his due as one of the contributing astronauts in this painstakingly researched book

Space Enterprise Phillip Harris,2009-12-29 In *Space Enterprise Living and Working Offworld* Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in contemporary and future space developments

especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies *Inventing the American Astronaut* Matthew H. Hersch, 2012-10-08 Who were the men who led America's first expeditions into space Soldiers Daredevils The public sometimes imagined them that way heroic military men and hot shot pilots without the capacity for doubt fear or worry However early astronauts were hard working and determined professionals organization men who were calm calculating and highly attuned to the politics and celebrity of the Space Race Many would have been at home in corporate America and until the first rockets carried humans into space some seemed to be headed there Instead they strapped themselves to missiles and blasted skyward returning with a smile and an inspiring word for the press From the early days of Project Mercury to the last moon landing this lively history demystifies the American astronaut while revealing the warring personalities raw ambition and complex motives of the men who were the public face of the space program *War of the Worlds: New Millennium* Douglas Niles, 2025-06-25 First the Mars probe picked up an anomaly Then NASA saw some strange activity and many stargazers noticed meteorites rocketing towards earth A cylinder surreptitiously landed in Wisconsin then another and another and then invasion from Mars The War of the Worlds had begun War of the Worlds New Millennium follows in the great tradition of Wells original masterpiece Niven and Pournelle's Footfall and V the mini series It is the story of an alien invasion of earth as told from numerous viewpoints a writer in rural Wisconsin a soldier in the field a science advisor to the president As tripods leave a swath of destruction across the Americas Washington groups some of its great minds to solve the problem as the Pentagon throws at the invaders the latest hardware the military has to offer At stake is the survival of the human race and the dominion of planet earth Filled with techno thriller like detail War of the Worlds New Millennium merges Clancy with Clarke for a truly page turning science fiction thriller At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied

Freedom 7 Colin Burgess, 2013-09-27 Inevitably there are times in a nation's history when its hopes fears and confidence in its own destiny appear to hinge on the fate of a single person One of these pivotal moments occurred on the early morning of May 5 1961 when a 37 year old test pilot squeezed himself into the confines of the tiny Mercury spacecraft that he had named Freedom 7 On that historic day U S Navy Commander Alan Shepard carried with him the hopes prayers and anxieties of a nation as his Redstone rocket blasted free of the launch pad at Cape Canaveral hurling him upwards on a 15 minute suborbital flight that also propelled the United States into the bold new frontier of human space exploration This book tells the enthralling story of that pioneering flight as recalled by many of the participants in the Freedom 7 story including Shepard himself with anecdotal details and tales never before revealed in print Although beaten into space just three weeks earlier by the Soviet cosmonaut Yuri Gagarin Alan Shepard's history making mission aboard Freedom 7 nevertheless provided America's first tentative step into space that would one day see its Apollo astronauts including Alan Shepard walk on the Moon

Personality Capture and Emulation William Sims Bainbridge, 2013-11-12 Personality Capture and Emulation is the

gateway to an amazing future that actually may be achieved enabling the preservation and simulation of human personalities at progressively higher levels of fidelity This challenge is no longer the province merely of uninhibited visionaries but has become a solid field of research drawing upon a wide range of information technologies in human centered computing and cyber human systems Even at modest levels of accomplishment research in this emerging area requires convergence of cognitive social and cultural sciences in cooperation with information engineering and artificial intelligence thus stimulating new multidisciplinary perspectives Therefore this book will inspire many specific research and development projects that will produce their own valuable outcomes even as the totality of the work moves us closer to a major revolution in human life Will it ever really be possible to transfer a human personality at death to a technology that permits continued life Or will people come to see themselves as elements in a larger socio cultural system for which a societal information system can provide collective immortality even after the demise of individuals A large number and variety of pilot studies and programming projects are offered as prototypes for research that innovators in many fields may exploit for the achievement of their own goals Together they provide an empirical basis to strengthen the intellectual quality of several current debates at the frontiers of the human and information sciences

The 1960s on Film Jim Willis, Mark Miller, 2021-10-11 The 1960s on Film tells the narrative of the 1960s through the lens of the movie camera analyzing 10 films that focus on the people events and issues of the decade Films create both an impression of and at times for younger audiences a primary definition of events people and issues of an era The 1960s on Film examines the 1960s as the decade was presented in ten films that focused on that decade This book analyzes both what the films have to say about the era and how close they come to accurately depicting it For example films such as Mississippi Burning and Selma tell the story of racial conflict and hope for reconciliation in the 1960s Other films such as The Right Stuff and Hidden Figures show the deep fascination America had at that time with the burgeoning space program and NASA while Easy Rider analyzes the role of rock music and drugs among young people of the decade The Deer Hunter studies the controversies surrounding the war in Vietnam

To a Distant Day Chris Gainor, 2020-04-01 Insightful instructive and definitely worth the read Greg Andres Journal of the Royal Astronomical Society of Canada As someone who has been teaching a course on space exploration for many years and has visited most of NASA's space centers I have found plenty of new and valuable material in To a Distant Day I recommend the book to all who wish to know more about the conditions people and discoveries between 1890 and 1960 that led to the space age Pangratios Papacosta Physics Today Although the dream of flying is as old as the human imagination the notion of rocketing into space may have originated with Chinese gunpowder experiments during the Middle Ages Rockets as both weapons and entertainment are examined in this engaging history of how human beings acquired the ability to catapult themselves into space Chris Gainor's irresistible narrative introduces us to pioneers such as Konstantin Tsiolkovsky Robert Goddard and Hermann Oberth who pointed the way to the cosmos by generating the earliest wave of international enthusiasm for space

exploration It shows us German engineer Wernher von Braun creating the V 2 the first large rocket which though opening the door to space failed utterly as the wonder weapon it was meant to be From there Gainor follows the space race to the Soviet Union and the United States giving us a close look at the competitive hysteria that led to Sputnik satellites space probes and finally human flight into space in 1961 As much a story of cultural ambition and personal destiny as of scientific progress and technological history To a Distant Day offers a complete and thoroughly compelling account of humanity's determined efforts sometimes poignant sometimes amazing sometimes mad to leave the earth behind My Inaugural Address at the Great White Throne Judgment of the Dead Alvin Miller, 2011-12-03 An unusual perspective on current End Times events as prophesied in the Book of Revelation including the Rapture and the Tribulation updated and expanded to over 600 pages

Selecting the Mercury Seven Colin Burgess, 2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism This work provides biographical details of all thirty two finalists for the seven coveted places as America's pioneering astronauts All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities Most had served as wartime fighter and bomber pilots some were test pilots on top secret and sophisticated aviation projects while others were fleet admirals prisoners of war and proposed pilots for spaceflight programs such as the Dyna Soar X 20 The names of all 32 finalists have been kept secret until very recently Selecting the Mercury Seven also relates the history and difficulties behind the initial choice of candidates The lives motivations military careers and achievements of the unsuccessful twenty five finalists are explored first in fully authorized biographies Test pilots for the U S Navy Air Force and Marine Corps each man has a fascinating and very different story to tell All thirty two men had to endure meticulous demeaning and brutal week long medical examinations at the Lovelace Clinic in New Mexico This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio where they were subjected to extreme fitness and physiological testing the sole purpose of which was to sort out the Supermen from the near supermen The final part of the book examines the accomplishments and spaceflights of the seven successful candidates bringing their amazing stories right up to date

Lab Coats in Hollywood David A. Kirby, 2013-02-08 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick's 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick's scientific verisimilitude in 2001 came courtesy of his science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don't consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines

the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action *Into That Silent Sea* Francis French, Colin Burgess, 2007 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles Realizing Tomorrow Chris Dubbs, Emeline Paat-Dahlstrom, 2020-04-01 U S A F Chief of Staff 2013 Professional Reading List Selection Nearly forty years passed between the Apollo moon landings the grandest accomplishment of a government run space program and the Ansari X PRIZE winning flights of SpaceShipOne the greatest achievement of a private space program Now as we hover on the threshold of commercial spaceflight authors Chris Dubbs and Emeline Paat Dahlstrom look back at how we got to this point Their book traces the lives of the individuals who shared the dream that private individuals and private enterprise belong in space Realizing Tomorrow provides a behind the scenes look at the visionaries the crackpots the financial schemes the legal wrangling the turf battles and underpinning the entire drama the overwhelming desire of ordinary people to visit outer space A compelling story of the pioneers of commercial spaceflight and their efforts to open the final frontier to everyone this book traces the path to private spaceflight even as it offers an instructive entertaining and cautionary note about its future
