Reality TV Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine

the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America

How Real Is Reality TV? David S. Escoffery, 2014-12-03 American viewers are attracted to what they see as the non scripted unpredictable freshness of reality television But although the episodes may not be scripted the shows are constructed within a deliberately designed framework reflecting societal values The political economic and personal issues of reality TV are in many ways simply an exaggerated version of everyday life allowing us to identify perhaps more closely than we care to admit with the characters onscreen With 16 essays from scholars around the world this volume discusses the notion of representation in reality television It explores how both audiences and producers negotiate the gulf between representations

and truth in reality shows such as Survivor The Apprentice Big Brother The Nanny American Idol Extreme Makeover Joe Millionaire and The Amazing Race Various identity categories and character types found in these shows are discussed and the accuracy of their television portrayal examined Dealing with the concept of reality audience reception gender roles minority portrayal and power issues the book provides an in depth look at what we see or think we see in reality TV

Taking Back Desire: A Psychoanalytic Approach to Queerness and Neoliberalism on Screen James Lawrence Slattery, 2025-05-13 Taking Back Desire studies film television and video art texts through a Lacanian prism to restore a sense of queer as troubling identity and resistance to neoliberal forms of inclusion James Lawrence Slattery illuminates how the framing of desire identity enjoyment resistance and knowledge contribute to the investment in neoliberal formations of being and success despite the corrosive effects neoliberalism has had for much of society The book does not read queerness on screen as a discernible group of characters or narrative formulas but as a point that meaning fails in the visual and temporal field Examining the interrelation of the real the imaginary and the symbolic in contemporary politics and contemporary media Slattery investigates how a diverse selection of moving image texts forge queerness as a relationship to the lack while crucially resisting the creation of a new or definitive canon Taking Back Desire will be essential reading for academics and scholars of Freudian and Lacanian psychoanalysis queer theory late capitalism film television and media studies sexuality studies critical race theory cultural studies and feminist theory

American Remakes of British Television Carlen Lavigne, Heather Marcovitch, 2011-03-31 Ever since Norman Lear remade the BBC series Till Death Us Do Part into All in the Family American remakes of British television shows have become part of the American cultural fabric Indeed some of the programs currently said to exemplify American tastes and attitudes from reality programs like American Idol and What Not to Wear to the mock documentary approach of The Office are adaptations of successful British shows Carlen Lavigne and Heather Marcovitch's American Remakes of British Television Transformations and Mistranslations is a multidisciplinary collection of essays that focuses on questions raised when a foreign show is adapted for the American market What does it mean to remake a television program What does the process of Americanization entail What might the success or failure of a remade series tell us about the differences between American and British producers and audiences This volume examines British to American television remakes from 1971 to the present The American remakes in this volume do not share a common genre format or even level of critical or popular acclaim What these programs do have in common however is the sense that something in the original has been significantly changed in order to make the program appealing or accessible to

American audiences The contributors display a multitude of perspectives in their essays British to American television remakes as a whole are explained in terms of the market forces and international trade that make these productions financially desirable Sanford and Son is examined in terms of race and class issues Essays on Life on Mars and Doctor Who stress television's role in shaping collective cultural memories An essay on Queer as Folk explores the romance genre and also talks about differences in national sexual politics An examination of The Office discusses how the American remake actually endorses the bureaucracy that the British original satirised

Reality Television and the Art of Trivialising Work Health, Safety and Wellbeing Trajce Cvetkovski, 2024-07-30 This book aims to assess the extent to which work health safety and wellbeing HSW considerations are trivialised on the popular Australian reality TV programme The Block Reality TV as a genre plays a core feature in media and cultural studies but there has not been any research on the impact of reality TV on safety culture or how HSW issues are portrayed in popular media This research remedies this deficiency and demonstrates contestants are workers on The Block who perform workplace activities The work related activities are concerned with construction building and renovation work and specifically participants engage in what are seemingly routine or ordinary everyday life activities namely housing construction and domestic or home dwelling renovations It supports the argument claim that contestants on reality TV are defined as workers and this definition of worker can be extended to other genres The book ultimately demonstrates that reality television is trivialising HSW for the purposes of satisfying audience desire to consume popular culture and these activities perpetuate a poor image of best safety practice

Fashioning Models Joanne

Entwistle, Elizabeth Wissinger, 2013-08-01 The fashion model's hold on popular consciousness is undeniable. How did models emerge as such powerful icons in modern consumer culture? This volume brings together cutting edge articles on fashion models examining modelling through race, class and gender as well as its structure as an aesthetic marketplace within the global fashion economy. Essays include treatments of the history of fashion modelling exploring how concerns about racial purity and the idealization of light skinned black women shaped the practice of modelling in its early years. Other essays examine how models have come to define femininity through consumer culture. While modelling's global nature is addressed throughout, chapters deal specifically with model markets in Australia and Tokyo where nationalist concerns colour what is considered a pretty face. It also considers how models glamorize consumption through everyday activities and neoliberal labour forms via reality TV. With commentaries from industry professionals who experienced the cultural juggernaut of the supermodels, the final essay situates their impact within the rise of brand culture and the globalization of fashion markets since 1990. Accessible and highly engaging, *Fashioning Models* is essential reading for students and scholars of fashion and related disciplines.

The Television Entrepreneurs Raymond Boyle, Lisa W. Kelly, 2016-03-03 With business seemingly everywhere on television, from the risks of the retail and restaurant trade to pitching for investment or competing to become the next apprentice, *The Television Entrepreneurs* draws upon popular business oriented shows such as *The Apprentice* and *Dragons Den* to explore the relationship between television and business. Based on extensive interviews with key industry and business figures and drawing on new empirical research into audience perceptions of business, this book examines our changing relationship with entrepreneurship and the role played by television in shaping our understanding of the world of business. The book identifies the key structural shifts in both the television industry and the wider economy that account for these changing representations whilst examining the extent to which television's developing interest in business and entrepreneurial issues is simply a response to wider social and economic change in society. Does a more commercial and competitive television marketplace, for instance, mean that the medium itself, through a particular focus on drama, entertainment and performance, now plays a key role in re-defining how society frames its engagements with business, finance, entrepreneurship, risk and wealth creation? Mapping the narratives of entrepreneurship constructed by television and analysing the context that produces them, *The Television Entrepreneurs* investigates how the television audience engages with such programmes and the possible impact these may have on public understanding of the nature of business.

Relocating Television Jostein Gripsrud, 2012-07-26 For over half a century television has been the most central medium in Western democracies, the political, social and cultural centrepiece of the public sphere. Television has therefore rarely been studied in isolation from its socio-cultural and political context; there is always something important at stake when the forms and functions of television are on the agenda. The digitisation of television concerns the production, contents, distribution and reception of the medium, but also its position in the overall, largely digitised media system and public sphere where the
