Luft,2019-06-14 Since the 1970s I have pursued three

separate but overlapping and sometimes simultaneous careers 1 philosopher writer teacher historian of the long nineteenth century 1789 1914 2 editor translator photographer publisher biographer encyclopedist 3 cataloging librarian rare books and special collections librarian historian of medicine Somehow these three vocations have garnered me some acclaim even an

entry in Who's Who in America. Each of them has resulted in some published or presented works. Because these works have been scattered in a wide variety of venues, some of which have gone out of print or have otherwise become generally unavailable, and of course with the oral presentations being gone as soon as they are given, I have thought it wise to select, epitomize, and bring them together in one place here. Thus, what follows in these volumes is what I consider to be the most important of my shorter works.

George Santayana's Philosophy of Religion Edward W. Lovely, 2012-09-28

George Santayana (1862-1952), of Spanish descent and generally claimed to be in the canon of American philosophers, was substantially influenced by his Roman Catholic origins in his philosophical disposition toward the value of tradition, religious symbols, and dogma. His philosophical project sustained a respectful attitude toward the spiritual value of orthodox religion, while the thrust of his philosophy was naturalistic and materialistic throughout. There is a perception by some scholars that Santayana's philosophy evolved from a humanistic perspective to a more spiritual one in his later years. It is the position of this thesis that his philosophy, at the core depicting a harmonious striving toward individual happiness, remained essentially consistent from his earliest publication of *Interpretations of Poetry and Religion* and *The Life of Reason* through his later works of *Scepticism* and *Animal Faith*, *Realms of Being*, *Domination and Powers*, and *The Idea of Christ in the Gospels*. Santayana's philosophical approach is both phenomenological and social constructionist in its methodology, significantly preempting the methodology of social constructionist theology and a post-modern interpretation of religion. His idiosyncratic phenomenological approach is compared with a benchmark methodology of Edmund Husserl, the generally accepted founder of the phenomenological method. There are also important similarities between Santayana's phenomenological approach and those of Charles Sanders Peirce and Alfred North Whitehead. The basis for the comparison of the phenomenological methodology of Santayana and Husserl is their mutually similar fundamental theory of intuited essence. Santayana's contribution to religious studies is not only philosophical but also theological, where he has utilized Christian theological language in transposing and interpolating his philosophy of religion to the Christian drama of the salvational Christ. Santayana's essay *Ultimate Religion* reflects his perspective of a disillusioned but still spiritual vision incorporating the piety, discipline, and spirituality of a life of reason. Within the framework of this model, Santayana's philosophy of religion is developed and explored. Finally, the relevance of Santayana's philosophy of religion to contemporary religious studies and selected religious issues is addressed with a delineation and discussion of some important aspects of his philosophical vision.

The Realm of Reason Christopher Peacocke, 2003-11-27

The *Realm of Reason* develops a new general theory of what it is for a thinker to be entitled to form a given belief. The theory locates entitlement in the nexus of relations between truth, content, and understanding. Peacocke formulates three principles of rationalism that articulate this conception. The principles imply that all entitlement has a component that is justificationaly independent of experience. The resulting position is thus a form of rationalism generalized to all kinds of content. To show how these principles are realized in specific domains

Peacocke applies the theory in detail to several classical problems of philosophy including the nature of perceptual entitlement induction and the status of moral thought These discussions involve an elaboration of the structure of entitlement in ways that have applications in many other areas of philosophy He also relates the theory to classical and recent rationalist thought and to current issues in the theory of meaning reference and explanation In the course of these discussions he proposes a general theory of the a priori The focus of the work lies in the intersection of epistemology metaphysics and the theory of meaning and will be of interest both to students and researchers in these areas and to anyone concerned with the idea of rationality The Realm of Essence George Santayana,1974 **Rosicrucian Christianity** Max Heindel,1909
