friend of the Soviet Union he stood closer to Lenin than to Morgenthau In this book Charles Jones makes sense of Carr's distinctive form of realism by examining his rhetoric and the reciprocal relationship between theory and policy making in his writings Close attention is paid to the period from 1936 when Carr left the Foreign Office through his subsequent career as a one man foreign ministry at Aberystwyth the Ministry of Information and above all The Times culminating in the final frustration of his schemes for continued British world power in 1947      **Impediments to the Prevention and**

International Norms and the Resort to War Gregory A. Raymond,2020-08-27 This book offers a fresh perspective on timeless questions concerning anarchy and order power and principle and public and private morality by taking a novel approach to the study of the onset of war Rather than looking at the distribution of wealth military might or other material capabilities to explain the onset of war this book focuses instead on how international norms affect the use of military force Critical of the realist assumption that international legal norms are unable to curb hostilities without a powerful central authority to enforce their injunctions it contends that the normative context within which national leaders act sets the tone for world politics by communicating commonly accepted understandings about the limits of permissible action Using quantitative analyses of the relationships between war initiation norms and various types of armed conflict the author calls into question realist beliefs regarding international norms demonstrating that restrictive normative orders reduce the likelihood of war
