**Computing and Philosophy in Asia** Soraj Hongladarom, 2009-03-26 This volume is a collection of selected papers presented at the Second Asia Pacific Computing and Philosophy Conference which was held in Bangkok Thailand in January 2005 The conference was organized by the Center for Ethics of Science and Technology Chulalongkorn University on behalf of the International Association of Computing and Philosophy [www.ia-cap.org](http://www.ia-cap.org) Computing have had a long relationship with philosophy starting from the problem of how symbols being manipulated in computing bear a relation to the outside world to those of artificial intelligence robotics computer simulation and so on Moreover as computer technologies have become thoroughly pervasive in today s environment there are also issues concerning social and ethical impacts brought about by them The papers in the volume represent a wide variety of concerns and various dimensions within which computing and philosophy are related Furthermore it also represents some of the first attempts to highlight cultural dimensions of computing and philosophy which became prominent when the conference was held for the first time within the milieu of an Asian culture The First Asia Pacific Computing and Philosophy was held in Canberra Australia Hence many of the papers in the volume address this added dimension Apart from the usual problems of how computers and human lives are interconnected the papers here also discuss how computers are related to human lives as lived in a specific culture Thus the book breaks a new ground and should be of interest to a wide range of scholars and students who are interested not only on computing and philosophy generally construed but also on this exciting new dimension of how the cultures of Asia the West

and others bear upon the traditional issues in computing and philosophy and on how this dimension raises some new concerns and agenda Among the topics discussed in this volume are political online forums in Saudi Arabia e democracy and structural transformation of public sphere the Buddhist informational person a glance into the lives of computerized generation in Thailand technology and journalism in the market local approaches and global potential of information ethics computer enhanced good life computer teaching ethics and many others

**Immersive Systemic Knowing** Raghav Rajagopalan, 2020-10-16

This book advances systems thinking by introducing a new philosophy of systemic knowing It argues that there are inescapable limits to rational understanding Humankind has always depended on extended ways of knowing to complement the rational analytic approach The book establishes that the application of such methods is fundamental to systemic practice The author advocates embracing two modes of consciousness intentionality which Western philosophy has long recognized and non intentional awareness which Eastern philosophy additionally highlights The simultaneity of these two modes of consciousness and the variety of knowings they spawn are harnessed for a more holistic systemic knowing Four practices from fields related to systems thinking are examined two contemporary action research methodologies from the US and the UK the Sumedhian Indian approach to inquiry about processes within groups and a technique of group psychotherapy originating in Eastern Europe Each of these systematically harnesses knowing using both modes of consciousness Therefore the author insists such approaches must be included in systemic practice in purposeful and methodical juxtaposition to rational analytic ways The book provides examples and guidelines for deployment All researchers and practitioners of systems thinking and action research must read this book Raghav has craftfully blended Eastern and Western wisdom He uses his immersion into Eastern ways of knowing practically to elaborate the systems philosophy in rich detail He has incorporated from cooperative inquiry as action research the idea of four ways of knowing practical propositional presentational and experiential to bolster the foundations of systems thinking SHANKAR SANKARAN Professor University of Technology Sydney Australia President International Society of Systems Sciences ISSS 2019 2020 This is a book with the potential to stimulate the emergence of a new paradigm Raghav shows that systems thinking can transcend rational analysis and incorporate other ways of knowing such as arts based methods also rather than be overly preoccupied with striving for change there is value in simply abiding which comes with a deep appreciation of the ecological relationships we are part of It s not that rational analysis is wrong it s that it is only part of a genuinely transformative practice GERALD MIDGLEY Co Director Centre for Systems Studies University of Hull former President ISSS 2013 14 Raghav Rajagopalan s writing on generating deep appreciation for the social and ecological interdependencies ties in closely with my own work The philosophical ideas he develops contain the tracings and essential tones of Gregory Bateson s idea of Mind as a process of living complexities reaching well beyond the notion of the body This book demonstrates outstanding erudition and deep compassion at the same time It should delight the adventurous reader unafraid of big questions NORA BATESON President

Eisner, 2000-01-30 Psychologist attorney Eisner puts psychotherapy on trial by critically examining its effectiveness through the lens of the scientific method From psychoanalysis to cognitive behavior therapy as well as the 500 or so other psychotherapies there is not a single experimental study that supports the effectiveness of psychotherapy over a placebo or religious healing Using both case examples and clinical research this book challenges the conclusion that there is empirical support for the notion that psychotherapy is effective      **The History of Tibet: The modern period, 1895-1959: the encounter with modernity** Alex McKay, 2003      Prisoners of Shangri-La Donald S.
