Reasons Of Ones Own

Rick Stedman

Reasons Of Ones Own:

31 Surprising Reasons to Believe in God Rick Stedman, 2017-07-01 In the style of C S Lewis Rick has given us a gift by pointing out the evidence for God's existence that can be found all around us if we know where to look Dr Mark W Baker Could Our Lives Be Surrounded by Surprising Clues to God's Existence We've all had doubts about God's existence or we know people who have What if we could uncover evidence of the reality of God that would bolster our faith or plant seeds of belief in the hearts of skeptics This 31 day intellectual journey reveals hints of the divine all around us in what we believe what we love what we have and what we know Discover how sports superheroes science and dozens of other topics point to unexpected clues of God's existence This carefully reasoned yet whimsical approach to a perplexing topic paves the way for meaningful dialogue between those who believe in God and those who are skeptical **Natural Law and Practical Rationality** Mark C. Murphy, 2001-06-11 Natural law theory has been undergoing a revival especially in political philosophy and jurisprudence Yet most fundamentally natural law theory is not a political theory but a moral theory or more accurately a theory of practical rationality According to the natural law account of practical rationality the basic reasons for actions are basic goods that are grounded in the nature of human beings Practical rationality aims to identify and characterize reasons for action and to explain how choice between actions worth performing can be appropriately governed by rational standards These standards are justified by reference to features of the human goods that are the fundamental reasons for action This book is a defence of a contemporary natural law theory of practical rationality demonstrating its inherent plausibility and engaging systematically with rival egoist consequentialist Kantian and virtue accounts **Electronic Commerce** Mr. Rohit Manglik, 2024-03-11 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Being Apart from Reasons Cláudio Jr. Michelon, 2006-03-09 Being Apart from Reasons deals with the question of how we should go about using reasons to decide what to do More particularly the book presents objections to the most common response given by contemporary legal and political theorists to the moral complexity of decision making in modern societies namely the attempt to release public agents from their argumentative burden by insulating a particular set of reasons from the general pool of reasons and assigning the former systematic priority over all other reasons That strategy is apparent both in Rawls claim that reasons concerning the right are systematically prior to reasons concerning the good and in Raz's claim that pre-emptive reasons are systematically prior to first order reasons The same strategy is also instantiated by certain arguments for the procedural value of law such as Jeremy Waldron's In the book each of those arguments for the insulation of reasons is objected to in order to defend the thesis the reasoning by public agents must always be as comprehensive as possible The remaining chapters object to those arguments mentioned above which aim at justifying the exclusion of certain

reasons from public agents decision making Emotions and Reasons Patricia S. Greenspan,2014-02-25 In *Emotions and Reasons* Patricia Greenspan offers an evaluative theory of emotion that assigns emotion a role of its own in the justification of action She analyzes emotions as states of object directed affect with evaluative propositional content possibly falling short of belief and held in mind by generalized comfort or discomfort *Types* Zemach,2021-11-01 This book consists of a series of applications to ontology the philosophy of mind and aesthetics of two nominalistic theses first that all the things we encounter houses cats people symphonies and also hair milk red and love are types and second that things are ontologically incomplete Types are material things that recur at several indices at which they are identical with other things thus in this world Man Mortal and today Jane Happy The Jupiter Symphony is a material thing that recurs at various times at homes and concert halls Like all things it is ontologically incomplete it is undetermined with respect to some properties therefore it can be interpreted that it is identical with some things more complete than it is Using these ideas new simple and metaphysically frugal solutions are offered to a plethora of questions that have beset philosophy ever since Plato

Autonomy and Community Jane Kneller,Sidney Axinn,1998-01-01 Shows how Kant's basic position applies to and clarifies present day problems of war race abortion capital punishment labor relations the environment and marriage

Reality, Reason, and Rights Douglas B. Rasmussen,Aeon J. Skoble,Douglas J. Den Uyl,2011-01-01 Tibor R Machan one of the most prolific and wide ranging philosophers of our time has been known internationally for decades through his public speaking opinion columns and of course his scholarly writing This collection of essays seeks to explore Machan's philosophical ideas by considering some of the basic issues with which he has been concerned throughout his long and highly productive career The essays range from those concerned with the nature of reality and knowledge to those dealing with the nature of the political legal order Topics such as the character of human nature free choice and responsibility the justification of individual rights and the place of justice in the contemporary welfare state among other basic issues are discussed in these essays Because Machan himself dealt with questions of central importance the essays should appeal to a wide range of interests and disciplines in philosophy and related fields But the essays are also written by people accomplished in their own right and thus seek not only to comment on Machan but to make their own contribution to enduring philosophical issues The volume should be of value to both students and faculty alike *A Companion to the Philosophy of Action* Timothy O'Connor,Constantine Sandis,2012-08-02 *A Companion to the Philosophy of Action* offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative

but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks Creating a Shared Morality Heather Salazar,2021-10-18 In *Creating a Shared Morality* Heather Salazar develops a consistent and plausible account of ethical constructivism that rivals the traditional metaethical theories of realism and subjectivism without lapsing into subjectivism as do previous constructivist attempts Salazar's Enlightenment argues that all people have moral obligations and that if they reflect well they will naturally come to care about others as extensions of themselves Enlightenment resolves difficulties within constructivism builds bridges between the two traditional Western views of metaethics and employs concepts from Eastern Buddhist philosophy It embraces universal morality while elevating the importance of autonomy diversity and connectedness Constructivist enlightenment entails understanding the interdependence of people on others such that we are all co responsible for the world in which we live **The Anxiety of Freedom** Uday Singh Mehta,2018-03-15 The enduring appeal of liberalism lies in its commitment to the idea that human beings have a natural potential to live as free and equal individuals The realization of this potential however is not a matter of nature but requires that people be molded by a complex constellation of political and educational institutions In this eloquent and provocative book Uday Singh Mehta investigates in the major writings of John Locke the implications of this tension between individuals and the institutions that mold them The process of molding he demonstrates involves an external conformity and an internal self restraint that severely limit the scope of individuality Mehta explores the centrality of the human imagination in Locke's thought focusing on his obsession with the potential dangers of the cognitive realm Underlying Locke's fears regarding the excesses of the imagination is a political anxiety concerning how to limit their potential effects In light of Locke's views on education Mehta concludes that the promise of liberation at the heart of liberalism is vitiated by its constraints on cognitive and political freedom Mimesis and Reason Gregg Daniel Miller,2011-09-23 Complicating the standard interpretation of Habermas as a proceduralist *Mimesis and Reason* uncovers the role that mimesis or imitation plays as a genuinely political force in communicative action Through a penetrating examination of Habermas's use of themes and concepts from Plato George Herbert Mead and Walter Benjamin Gregg Daniel Miller reconstructs Habermas's theory to reveal a new postmetaphysical articulation of reason that lays the groundwork for new directions in political theory *Moral Perception and Particularity* Lawrence A. Blum,1994-01-28 This collection of Laurence Blum's essays examines the moral import of emotion motivation judgement perception and group identifications *Political Neutrality* Roberto Merrill,Daniel Weinstock,2014-07-31 The topic of neutrality on the good is linked rather closely to the ideal of political liberalism as formulated by John Rawls Here internationally renowned authors in several cases among the most prominent names to be found in contemporary political theory present a collection of ten essays on the idea of liberal neutrality **Religion, Politics and Law** Bart Labuschagne,2009-03-16 Modern liberal democracies in the West living under the rule of law and protection of human rights cannot articulate the very values from which they derive their

legitimacy These pre political and pre legal preconditions cannot be guaranteed let alone be enforced by the state but constitute nevertheless its moral and spiritual infrastructure Until recently a common background and horizon consisted in Christianity but due to secularisation and globalisation society has become increasingly multicultural and multireligious The question can and should be raised how religion relates to these sources of normative order in society how religion politics and law relate to each other and how social cohesion can be attained in society given the growing varieties of religious experiences In this book a philosophical account of this question is carried out on the one hand historically from Plato to the Enlightenment on the other hand systematically and practically

Critical Thinking Skills Stella Cottrell, 2023-03-23 The ability to demonstrate critical thinking is essential for students who seek to achieve good grades at university but it typically creates a lot of confusion and anxiety Critical Thinking Skills provides an easy to follow step by step guide to developing analytical reasoning skills and applying them to tasks such as reading note making and writing A complex subject is broken down into easy to understand blocks with clear explanations good examples and plenty of activities to develop understanding at each stage Students can use this book to Critically assess other people s arguments Recognise flawed reasoning Evaluate the material used to support arguments Apply critical thinking when reading writing and making notes Write excellent essays and reports The 4th edition features a new section on argument mapping techniques which help readers to visualize the structures of an argument It also contains new and updated examples that link to current affairs showing the importance of critical thinking as a lifelong skill Written by internationally renowned author Stella Cottrell this is an essential resource for students looking to refine their thinking reading and writing skills

Can Virtue Make Us Happy? Otfried Hoffe, 2010-03-17 In Can Virtue Make Us Happy The Art of Living and Morality Otfried Hoffe one of Europe s best known philosophers offers a far reaching and foundational work in philosophical ethics Hoffe uses clear accessible language to present common understandings of happiness and freedom while illuminating the blind alleys in the history of philosophy What has priority good ends or right action Is freedom always anarchy Is it possible to think of a freedom enhanced by morality Is morality merely a euphemism for stupidity Does humanity have a good or a bad character Is there such a thing as evil Hoffe offers no simple formulas but provides enlightened philosophical reflection to fuel the reader s own examination of these questions

Book Jacket Self, Reason, and Freedom Andrea Christofidou, 2013-01-03 Freedom and its internal relation to reason is fundamental to Descartes philosophy in general and to his Meditations on First Philosophy in particular Without freedom his entire enquiry would not get off the ground and without understanding the r le of freedom in his work we could not understand what motivates key parts of his metaphysics Yet not only is freedom a relatively overlooked element but its internal relation to reason has gone unnoticed by most studies of his philosophy Self Reason and Freedom A New Light on Descartes Metaphysics by defending freedom s internal relation to reason sheds new light on Descartes metaphysics and restores the often dismissed Fourth Meditation to the core of his metaphysics as he conceived it Implicit in that relation is a

rejection of any authority external to reason Andrea Christofidou shows how this lends strength and explanatory force to Descartes enquiry and reveals his conception of the unity of the self and of its place in the world Self Reason and Freedom A New Light on Descartes Metaphysics is essential reading for students and scholars of Descartes and anyone studying seventeenth century philosophy Causalism Carolina Sartorio,2023 Carolina Sartorio argues for a naturalistic conception of agency and free agency that unifies them under the thesis that actions free actions are behaviors that have the right kinds of causes or explanations The result is a compelling view of practical agency taking in key metaphysical notions such as causation grounding absences and powers **From Valuing to Value** David Sobel,2016-11-03 Subjective accounts of well being and reasons for action have a remarkable pedigree The idea that normativity flows from what an agent cares about that something is valuable because it is valued has appealed to a wide range of great thinkers But at the same time this idea has seemed to many of the best minds in ethics to be outrageous or worse not least because it seems to threaten the status of morality Mutual incomprehension looms over the discussion From Valuing to Value written by an influential former critic of subjectivism owns up to the problematic features to which critics have pointed while arguing that such criticisms can be blunted and the overall view rendered defensible In this collection of his essays David Sobel does not shrink from acknowledging the real tension between subjective views of reasons and morality yet argues that such a tension does not undermine subjectivism In this volume the fundamental commitments of subjectivism are clarified and revealed to be rather plausible and well motivated while the most influential criticisms of subjectivism are straightforwardly addressed and found wanting
