BK1: Utilizing Periodical/Journal Materials

Throughout the years, everything is in continuous development and innovation. In architecture, innovation and development are very vital and important because this will show that someone's idea is adapting to the new world. But with continuous development, it is normal to lose ideas especially in this time because everything is already produced. However, in architecture, innovation is something to look forward to and since architecture is all about giving connection to people, infrastructures, and surroundings, architects came up with the idea of sentiment architecture. This is using spaces or facades to connect and serve as bridge for participation. This includes activities with the help of modern technology to gain the attention of the public and to have an interaction with them. It is like a park but with the help of technology. This can be seen such as holograms as façade of a building, or interactive tablets or a public park. With that new architectural innovation, we can give opportunities to people to appreciate more the spaces that were built for them because it will make them feel that they belong to that space. This can also be seen in our daily lives. Sometimes we are discouraged or demotivated because we lack ideas or will to move because we think that everything that is happening in our lives are the same and it is just repeating but with the help of other people, we can innovate output or innovate will for ourselves to move forward. And sometimes we just focus on ourselves and shutdown other people because they tend to seem like everyone else but in order for us to grow as an individual, we also need someone who could give us another perspective in life and with that help, we can be in constant or continuous innovation, development, and growth which might give us new ideas.
