Embryology of Flowering Plants: Terminology and Concepts, Vol. 3 T B Batygina, 2019-04-23 Plant embryology dealing with the regularities of initiation and the first stages of development of an organism is now flourishing because of the overall progress being made in natural sciences Such discoveries of the 20th century as production of plants from a single somatic cell experimental haploidy and parasexual hybridization were of general biological significance The combined efforts of embryologists geneticists and molecular biologists yielded the discovery of specific genes that control meiosis egg cell development and early stages of embryogenesis The tendency to synthesize data of embryology and genetics has become increasingly noticeable It is connected with the fact that the majority of problems connected with morphogenesis such as differentiation specialization the evaluation of features and the definition of the notions gene and feature and genotype and phenotype concern embryology and genetics embryogenetics in one way or another Evolutionary embryology has given rise to a new approach to the study of problems of adaptation in plants In connection with the problem of preserving biological diversity under conditions of ecological stress special attention is paid to ecological embryology revealing the critical periods in early ontogenesis and plasticity and tolerance of reproductive systems at the level of species and population The study of variability of morphogenesis and phenotype in population life cycle variations and the diversity of reproductive systems is the most important point in the population embryology of plants **Comparative Embryology of Angiosperms Vol. 1/2** Brij

M. Johri, Kunda B. Ambegaokar, Prem S. Srivastava, 2013-06-29 COMPARATIVE EMBRYOLOGY OF ANGIOSPERMS is a review of the developmental processes leading to sexual reproduction in flowering plants On the basis of embryological data and certain evidences from other areas of study it lays special emphasis on the relationship among and within the families and orders of angiosperms Occasionally inaccuracies in observation and interpretation are pointed out alternative interpretations offered gaps in our knowledge highlighted and prospects outlined The text is documented with 36 tables 376 figures and about 5000 literature citations which contribute to making this book comprehensive Besides students and research workers interested in angiosperm embryology taxonomists plant breeders agriculturists and horticulturists will also find much useful information in this treatise **Current Catalog** National Library of Medicine (U.S.), 1992-10 Current

Trends in the Embryology of Angiosperms Sant Saran Bhojwani, Woong-Young Soh, 2001-04-30 The revolutionary progress made in this fascinating field of sexual reproduction inspired this generously illustrated volume It includes 21 chapters written by experts covering all aspects of the embryology of angiosperms ranging from development isolation and structure of gametes to endosperm and seed development **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),

Recent Advances in Causes, Diagnosis, and Therapeutics for Congenital Heart Defects Xinxu Xu, DongZhu Xu, Lu Han, Lisa J. Martin, Cecilia W. Lo, 2025-02-27 Congenital heart disease CHD is one of the most common

major birth defects yet its causes remain poorly understood The interaction of genetic and environmental factors is widely accepted including gestational diabetes maternal exposures and medications during pregnancy Animal models illuminated environmental and genetic factors that disrupt heart development pathways However precise perturbations underlying human CHDs are still unclear Advanced genetic and genomic approaches have facilitated CHD diagnosis and therapies especially prenatal genetic testing which has enabled significant advances in early CHD diagnosis and screening As diagnosis and treatment improve survival into adulthood new research directions have emerged These include investigating the genetic basis of surgical outcomes and developing new therapies to improve quality of life We aim to bring together new findings ideas comments thoughts and perspectives from basic preclinical and clinical researchers in CHD Our goal is to deepen our understanding of recent advances in CHD s causes diagnosis and therapeutics We hope that the contributions to this Research Topic will aid in the molecular diagnosis and treatment of CHDs

Vol 2: Morphology, Physiology, and Development Niels Kristensen,2012-10-24 A comprehensive english language reference work on morphology physiology and development of the moths and butterflies of the world Written by a truly international team of specialists the overall level of expertise of the book is unsurpassed and several chapters present substantial amounts of original information The book is richly illustrated and all chapters have extensive bibliographies Volume I has been published in 1998 and covers the evolution systematics and biogeography of Lepidoptera The goal of both volumes is to provide an overview of the current state of knowledge of this outstandingly important insect group

Embryology of Flowering Plants: Terminology and Concepts, Vol. 2 T B Batygina,2005-01-11 This volume covers up to date notions of seed structure processes resulting to its formation syngamy triple fusion etc as well as of postseminal development seed dormancy and germination Great attention has been paid to the morphological and functional aspects of fertilization process and embryo and endospermogenesis

Recent Advances in Marine Biotechnology, Vol. 10 Milton Fingerman,2003-01-10 This book presents the most recent information on the molecular genetics of marine organisms It provides the reader a major thrust toward a better understanding of the present state of research on the molecular genetics of marine organisms

Seed Biology T.T.

Kozłowski,2012-12-02 Seed Biology Volume I Importance Development and Germination is a part of a three volume treatise which aims to bring together a large body of important information on seed biology Organized into six chapters this book begins with a discussion on the importance and characteristics of seeds Separate chapters follow that discuss the development of gymnosperm and angiosperm seeds as well as the anatomical mechanisms of seed dispersal Other chapters focus on the morphogenetic events involved in the germination and the scientific basis for the concept of physiological predetermination or seedling vigor including the potential application of this concept in agriculture forestry and management

of natural resources This work will be useful to various groups of research biologists and teachers including plant anatomists pathologists and physiologists as well as agronomists biochemists ecologists entomologists foresters and horticulturists

Ontogeny of Learning and Memory (PLE: Memory) Norman E. Spear, Byron A. Campbell, 2014-05-09 Originally published in 1979 this volume contains chapters prepared following a conference at SUNY Binghamton in 1977 The conference was the outcome of exciting new developments that had occurred in the ontogeny of learning and memory at the time as well as a long standing friendship between the editors Many changes had taken place in the years leading up to this volume and there were now many more researchers active in the field This volume reflected the rapidly changing state of this research area at the time and includes early contributions from researchers now well established in the field Contributions to Education Columbia University. Teachers College, 1914 Contributions to Education, 1914 **Recent Advances In Aquaculture**

James Muir, Ronald Roberts, 2019-06-26 It is a tribute to the vigour of research and development in aquaculture that we are able in a relatively short time to provide readers with a second volume in this series which has such a diversity of high calibre research and developments to report That the first volume was so well received has been a source of great satisfaction to the editors and supported their conviction as to the need for links to join the research laboratory to the fish farm by making current research available to a wider range of potential users *Carnegie Institution of Washington Publication*, 1920
