whose building blocks are one dimensional extended objects called strings rather than the zero dimensional point particles  
that form the basis for the standard model of particle physics The phrase is often used as shorthand for Superstring theory as  
well as related theories such as M theory By replacing the point like particles with strings an apparently consistent quantum  
theory of gravity emerges Moreover it may be possible to unify the known natural forces gravitational electromagnetic weak  
nuclear and strong nuclear by describing them with the same set of equations Studies of string theory have revealed that it  
predicts higher dimensional objects called branes String theory strongly suggests the existence of ten or eleven in M theory  
space time dimensions as opposed to the usual four three spatial and one temporal used in relativity theory      Forthcoming
