Roman, 1990-07-24 Since the 1950s social scientists have devoted serious attention to the relationship between alcohol and the workplace In recent years awareness of the tremendous costs both human and financial associated with alcoholism has led to a dramatic increase in both scholarly and practical interest in the field Although researchers working in this area are relatively few they have sustained a lively interest in the alcohol work nexus and have attracted others to the field through conferences where ideas and research strategies are exchanged The larger part of *Alcohol Problem Intervention in the Workplace* provides an up to date thorough examination of the problem the research and the possible solutions This volume is directed toward both practitioners and researchers providing a wide range of new data and new ideas that bear upon coping with alcohol problems in the workplace Part I addresses issues regarding the distribution and correlates of alcohol problems and alcohol use among employees Part II is centered on issues associated with Employee Assistance Programs And Part III is a general conclusion and overview offering suggestions and implications for the practitioner in the workplace Because this collection supplies the most current thinking and information on controlling alcohol problems in the workplace it will be of particular interest to human resource management and to employee assistance specialists who are now required to pass a certification examination *Alcohol and Drug Abuse as Encountered in Office Practice* Frank L. Iber, 1990-11-26 This book has been written to serve as a manual for physicians

practicing in a private office setting to recognize and recommend appropriate treatment for patients believed to be substance abusers. While it is not written for drug abuse specialists, it provides information regarding the diagnosis and treatments a competent concerned physician can provide without becoming immersed in addiction treatment. Topics discussed include the degree to which a physician should become involved when it is appropriate to refer, using other professions and volunteer groups and useful medications. Guidelines for recognizing substance abuse, testing to confirm the abuse, confronting the patient, and motivating the patient into specific treatment are also presented. Tables and illustrations are used to summarize major points, making this an extremely useful reference tool for internists and other non-specialist private practitioners.
