In the Pursuit of Winning Masood Zangeneh,Alex Blaszczyński,Nigel Turner,2007-11-25 Gambling is an underrecognized problem from both a clinical and a public health point of view It is not uncommon for an adolescent or adult to participate in one form of gambling or another on a regular basis be it the lottery card playing for money sports wagering or gambling on electronic gaming

devices Nor is it uncommon for such participation to reach excessive or destructive proportions with negative effects on the individual's psychological, social, economic and family life. The results of the National Research Council's 2000 review of empirical studies suggest that 85% of adolescents report having gambled during their lifetime with 73% of adolescents reporting having gambled in the past year. Despite gains in knowledge concerning the correlates and risk factors associated with severe gambling problems among youth during the past ten years, a general lack of public and parental awareness exists. This raises serious mental health and public policy concerns. Written from an international perspective, this book covers gambling research and interventions in the following categories: role of helpline services; a Jungian transpersonal approach to treatment; cognitive therapy for problem gambling; pharmacological interventions for problem gambling; desensitization; biofeedback as treatment for problem gambling; binge gambling; pathological gambling; past and contemporary Aboriginal peoples' experiences with gambling; problem gambling counselor certification; measurement of outcomes in problem gambling; treatment overview of teen gambling; related issues from leading researchers.

The Better Way To Win Linda Seger, Th.D., 2011-01-20. The Better Way to Win is about the movement from linear competitive thinking to a new way of thinking which Seger calls Web thinking based on the dual images of the spider web and the World Wide Web. In this provocative book, Seger shows that Web thinking is not only more humane but also more effective and more likely to bring lasting success. The metaphor that shapes our thinking is being transformed by the technologies we use and by the growing power of women in the world. Linda Seger shows us how to build upon this fundamental shift to create more richly satisfying and connected lives. Sally Helgesen, author of *The Web of Inclusion*. This book is a small gem. If this were required reading for managers and taught in MBA, the world would become a better place. Web Thinking is a key business philosophy and lifestyle paradigm for twenty-first century information societies. Hazel Henderson, author of *Beyond Globalization*.

Wisdom of the Psyche Ginette Paris, 2016-02-22. The first edition of *Wisdom of the Psyche* engaged with one of the main dilemmas of contemporary psychology and psychotherapy: how to integrate findings and insights from neuroscience and medicine into an approach to healing founded upon activation of the imagination. In this revised edition, Ginette Paris refocuses her attention on the modern lack of desire to become adult and updates the book with brand new neuroscientific research. Paris uses cogent and passionate argument as well as stories from patients to demonstrate that the human psyche seeks to destroy relationships and lives as well as to sustain them. She makes clear that the way out of those destructive states does not start with an upward positive wilful effort of the ego but with an opening of the imagination and aims to foster the dialogue between psychotherapists and neuroscientists. In clear and accessible language, Paris describes how depth psychology can be seen as a subject of the humanities rather than the sciences and explains how gaining an understanding of neuroscience will not necessarily make us psychologically wiser. A unique and powerful book, *Wisdom of the Psyche* will be fascinating reading for Jungian and depth psychologists, psychotherapists, analysts and others in the helping professions as well as students and

those in training and readers with an interest in psychology and neuroscience who want to create an inner life worth living

Ginn, Donald E. Palumbo, C.W. Sullivan III, 2013-08-20 Reversing a common science fiction cliché *Farscape* follows the adventures of the human astronaut John Crichton after he is shot through a wormhole into another part of the universe Here Crichton is the only human being going from being a member of the most intelligent species on our planet to being frequently considered mentally deficient by the beings he encounters in his new environment John Crichton befriends a group of beings from various species attempting to escape from imprisonment aboard a living spaceship The series which broke many of the so called rules of science fiction follows Crichton's attempts to survive in worlds that are often hostile to him and his friends Their adventures center on each being's attempt to find a way home The essays in this volume explore themes running throughout the series such as good and evil love and sex and what it means to be a hero as well as the various characters populating the series including the villains and even the ship itself **Jung and the Jungians on Myth** Steven F.

Walker, 2002 In this book Steven Walker carefully leads the reader through the fundamentals of the psychology that underlies Jung's theory of myth He defines key terms and distinguishes dream from fantasy in psychological experience He then traces the lineage of Jungian theory from Jung through such disciples as Van Franz and Neumann to contemporary archetypal psychology By applying Jungian psychology to an array of myths to illustrate core concepts of this theoretical tradition Walker fills a conspicuous gap in the current literature on Jung from back cover Leaders of the Light in the Age of Great Awakening Don P. Valeri, 2025-09-15 Many seers mystics astrologers philosophers even theologians have foreseen a new age

that is birthing on planet Earth Some call it the Age of Great Awakening which is the term used in this book It will be an age in which spirituality will prevail and not religion politics finance and material gain that now predominate human thinking It will encompass and affect every facet of our lives especially those who currently rule over humanity Why do we have so many Evil corrupt psychopath people ruling over us In this age a new breed or species of Leaders will emerge This book is about those emerging leaders what they will look like how they will behave ethically and what they will have to face and confront in the decades to come A good portion of the book deals with our flawed understanding of leadership and what can be called leadership from the shadows Here the words of Carl Jung are worth remembering In order to know the light we must first

experience the darkness And it is this darkness that so many are now living through But as this wise person also said As far as we can discern the sole purpose of human existence is to kindle a light in the darkness of mere being
