Recollections VI R. Jaenicke,G. Semenza,2000-11-09 These volumes are of interest to bioscientists and to historians alike Many authors both as individuals and as scientists lived and worked in the age of extremes in the so called short 20th century and yet contributed significantly to the unprecedented development of life sciences in this period These oral histories set against a backdrop of the Second World War Holocaust and Stalinist terror are thus of interest and relevance to older and younger generations alike Perhaps the lessons learned from these first hand accounts may contribute in some way to ensuring that future scientists can enjoy the fascination of science undisturbed by the avoidable tragedy of man made events The contributors to this volume in the Comprehensive Biochemistry series encompass a wide variety of experiences in many different countries and in very different fields of biochemistry Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so Others have been closely engaged in organizational matters both nationally and internationally All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors have lived and worked It was an extremely exciting time for the life sciences It was also a period of major and often tragic historical events that deeply affected the life and work of the generation to which our contributors belong *Selected Topics in the History of Biochemistry G.*

Topics in the History of Biochemistry - Personal Recollections V, 1997 *Selected Topics in the History of Biochemistry*, 1983 Ensnared between Hitler and Stalin David K Zimmerman, 2022-12-21 In the 1930s hundreds of scientists and scholars fled Hitler's Germany. Many found safety but some made the disastrous decision to seek refuge in Stalin's Soviet Union. The vast majority of these refugee scholars were arrested, murdered or forced to flee the Soviet Union during the Great Terror. Many of the survivors then found themselves embroiled in the Holocaust. *Ensnared between Hitler and Stalin* explores the forced migration of these displaced academics from Nazi Germany to the Soviet Union. The book follows the lives of thirty-six scholars through some of the most tumultuous events of the twentieth century. It reveals that not only did they endure the chaos that engulfed central Europe in the decades before Hitler came to power but they were also caught up in two of the greatest mass murders in history. David Zimmerman examines how those fleeing Hitler in their quests for safe harbour faced hardship and grave danger including arrest, torture and execution by the Soviet state. Drawing on German, Russian and English sources, *Ensnared between Hitler and Stalin* illustrates the complex paths taken by refugee scholars in flight. *Selected Topics in the History of Biochemistry* G. Semenza, A.J. Turner, 2004-12-13 **Selected Topics in the History of Biochemistry. Personal Recollections. V** G. Semenza, R. Jaenicke, 1997-07-24 The Editors invited selected authors who had participated in or observed the explosive development of biochemistry and molecular biology particularly in the second half of this century to record their personal recollections of the times and circumstances in which they did their work. The authors were given a completely free rein with respect to both content and style and the editors have made no attempt to impose any sort of uniformity in the chapters. Each reflects the flavour of the personality of the author. The contributors to this volume encompass a wide variety of experiences in many different countries and in very different fields of biochemistry. Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so. Others have been closely engaged in organisational matters both nationally and internationally. All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors lived and worked. It was an extremely exciting time for life sciences. **Selected Topics in the History of Biochemistry**, 1990
