Selected writings. Vol. 1 E. T. A. Hoffmann, 1969 Walter Benjamin Walter Benjamin, 1996 **The Afterlife of Texts in Translation** Edmund Chapman, 2019-11-14 The Afterlife of Texts in Translation Understanding the Messianic in Literature reads Walter Benjamin's and Jacques Derrida's writings on translation as suggesting that texts exist within a process of continual translation Understanding Benjamin's and Derrida's concept of afterlife as overliving this book proposes that reading Benjamin's and Derrida's writings on translation in terms of their wider thought on language and history suggests that textuality itself possesses a messianic quality Developing this idea in relation to the many rewritings and translations of Don Quixote particularly the multiple rewritings by Jorge Luis Borges Edmund Chapman asserts that texts consist of a structure of potential for endless translation that continually promises the overcoming of language history and textuality itself

Modernism Between Benjamin and Goethe Matthew Charles, 2019-12-12 Widely regarded as one of the foremost cultural critics of the last century Walter Benjamin's relation to Modernism has largely been understood in the context of his reception of the aesthetic theories of Early German Romanticism and his associated interest in avant garde Surrealism But this Romantic understanding only gives half the picture Running through Benjamin's thought is also a critique of Romanticism developed in conjunction with a positive engagement with the philosophical artistic and historical writings of J W von Goethe In demonstrating the significance of these Goethean elements this book challenges the dominant understanding of Benjamin's philosophy as essentially Romantic and instead proposes that Goethe's Classicism conceived as the counterpoint to Romanticism permits a corrective to the latter's deficiencies Benjamin's Modernist concept of criticism it is argued is constituted in the movement between these polarities of Romanticism and Classicism Conversely placing Goethe's Classicism in relation to Benjamin's practice of literary criticism reveals historical tensions with Romanticism that constitute the untimely indeed it will be argued cinematic Modernism of his work Adopting a transcritical approach this book alternates between Benjamin and Goethe in relation to the experiences of colour language and technology assembling a

The Aesthetic Ground of Critical Theory Nathan Ross, 2015-08-27 Walter Benjamin and Theodor W Adorno are considered today to be the two most significant early theorists in founding critical theory In their works and correspondence both thinkers turn to art and the aesthetic as a vital way for understanding modern society and developing philosophical methods This volume of original essays seeks to understand how they influenced each other and disagreed with each other on fundamental questions about art and the aesthetic The book deals with a variety of key philosophical questions such as How does art involve distinctive modes of experience What is the political significance of modern art What does aesthetic experience teach us about the limitations of conceptual thought How

is aesthetic experience implicated in the very medium of thought language Ultimately the book presents a systematic argument for the foundational significance of the aesthetic in the development of the early critical theory movement

Between Urban Topographies and Political Spaces Fabio Vighi, Alexis Nuselovici, Mauro Ponzi, 2014-04-02 Between Urban Topographies and Political Spaces Threshold Experiences uses the term threshold as a means to understand the relationship between Self and Other as well as relationships between different cultures The concept of threshold defines the relationship between inside and outside not in oppositional terms but as complementaries This book discusses the cultural and social border areas of modernity which are to be understood not as zones in a territorial sense but as spaces in between in which different languages and cultures operate The essays in Between Urban Topographies and Political Spaces identify the dimension in urban topographies and political spaces where we are able to locate paradigmatic experiences of thresholds Because these spaces are characterized by contradictions conflicts and aporias we propose to rethink those hermeneutic categories that imply a sharp opposition between inside and outside This means that the theoretical definition of threshold put forward in these essays whether applied to history philosophy law art or cultural studies embodies new juridical and political stances

Critical Theory to Structuralism David Ingram, 2014-09-11 Philosophy in the middle of the 20th Century between 1920 and 1968 responded to the cataclysmic events of the time Thinkers on the Right turned to authoritarian forms of nationalism in search of stable forms of collective identity will and purpose Thinkers on the Left promoted egalitarian forms of humanism under the banner of international communism Others saw these opposed tendencies as converging in the extinction of the individual and sought to retrieve the ideals of the Enlightenment in ways that critically acknowledged the contradictions of a liberal democracy racked by class cultural and racial conflict Key figures and movements discussed in this volume include Schmitt Adorno and the Frankfurt School Arendt Benjamin Bataille French Marxism Black Existentialism Saussure and Structuralism Levi Strauss Lacan and Late Pragmatism These individuals and schools of thought responded to this modernity crisis in different ways but largely focused on what they perceived to be liberal democracy's betrayal of its own rationalist ideals of freedom equality and fraternity

Narcoepics Hermann Herlinghaus, 2013-02-14 Narcoepics Unbound foregrounds the controversial yet mostly untheorized phenomenon of contemporary Latin American narcoepics Dealing with literary works and films whose characteristics are linked to illicit global exchange informal labor violence bare life drug consumption and ritualistic patterns of identity it argues for a new theoretical approach to better understand these narratives of intoxication Foregrounding the art that has arisen from or seeks to describe drug culture Herlinghaus comparative study looks at writers such as Guti rrez J J Rodr guez Reverte films such as *City of God* and the narratives surrounding cultural villains heroes such as Pablo Escobar Narcoepics shows that that in order to grasp the aesthetic and ethical core of these narratives it is pivotal first to develop an aesthetics of sobriety The aim is to establish a criteria for a new kind of literary studies in which cultural hermeneutics plays as much a part as political

philosophy analysis of religion and neurophysiological inquiry **A Translational Sociology** Esperança Bielsa, 2022-12-29

A Translational Sociology provides an interdisciplinary investigation of the key role of translation in society. There is a growing recognition of translation's intervention in the intellectual history of sociology in the international reception of social theory and in approaches to the global literary and academic fields. This book brings attention to aspects of translation that have remained more elusive to sociological interpretation and analysis, investigating translation's ubiquitous presence in the everyday lives of ordinary people in increasingly multilingual societies and its key intervention in mediating politics within and beyond the nation. In order to challenge a reductive view of translation as a relatively straightforward process of word substitution that is still prevalent in the social sciences, this book proposes and develops a broader definition of translation as a social relation across linguistic difference, a process of transformation that leaves neither its agent nor its object unchanged. The book offers elaborations of the social, cultural, and political implications of such an approach, as a broad focus on these various perspectives and their interrelations is needed for a fuller understanding of translation's significance in the contemporary world. This is key reading for advanced students and researchers of translation studies, social theory, cultural sociology, and political sociology.

The Social Life of Money Nigel Dodd, 2016-02-09 A reevaluation of what money is and what it might be. Questions about the nature of money have gained a new urgency in the aftermath of the global financial crisis. Even as many people have less of it, there are more forms and systems of money, from local currencies and social lending to mobile money and Bitcoin. Yet our understanding of what money is and what it might be hasn't kept pace. In *The Social Life of Money*, Nigel Dodd, one of today's leading sociologists of money, reformulates the theory of the subject for a postcrisis world in which new kinds of money are proliferating. What counts as legitimate action by central banks that issue currency and set policy? What underpins the right of nongovernmental actors to create new currencies? And how might new forms of money surpass or subvert government-sanctioned currencies? To answer such questions, *The Social Life of Money* takes a fresh and wide-ranging look at modern theories of money. One of the book's central concerns is how money can be wrested from the domination and mismanagement of banks and governments and restored to its fundamental position as the claim upon society described by Georg Simmel. But rather than advancing yet another critique of the state-based monetary system, *The Social Life of Money* draws out the utopian aspects of money and the ways in which its transformation could in turn transform society, politics, and economics. The book also identifies the contributions of thinkers who have not previously been thought of as monetary theorists, including Nietzsche, Benjamin Bataille, Deleuze and Guattari, Baudrillard, Derrida, and Hardt and Negri. The result provides new ways of thinking about money that seek not only to understand it but to change it.
