The Ethnographer's Magic and Other Essays in the History of Anthropology George W. Stocking, 1992 George Stocking has been widely recognized as the premier historian of anthropology ever since the publication of his first volume of essays Race Culture and Evolution in 1968 As editor of several publications including the highly acclaimed History of Anthropology series he has led the movement to establish the history of anthropology as a recognized research specialization In addition to the study Victorian Anthropology his work includes numerous essays covering a wide range of anthropological topics The eight

essays collected in *The Ethnographer's Magic* consider the emergence of anthropology since the late nineteenth century as an academic discipline grounded in systematic fieldwork. Drawing extensively on unpublished manuscript materials, the essays focus primarily on Franz Boas and Bronislaw Malinowski, the leading figures in the American and the British academic fieldwork traditions. According to George Marcus of Rice University, the essays represent the most informative and insightful writings on Malinowski and Boas and their legacies that are yet available. Beyond their biographical material, the essays here touch upon major themes in the history of anthropology: its powerfully mythic aspect and persistent strain of romantic primitivism; the contradictions of its relationship to the larger sociopolitical sphere; its problematic integration of a variety of natural scientific and humanistic inquiries; and the tension between its scientific aspirations and its subjectively acquired data. To provide an overview against which to read the other essays, Stocking has also included a sketch of the history of anthropology from the ancient Greeks to the present. For this collection, Stocking has written prefatory commentaries for each of the essays as well as two more extended contextualizing pieces. An introductory essay, *Retrospective/Prescriptive Reflections*, places the volume in autobiographical and historiographical context; the *Afterword/Postscriptive/Prospective Reflections* reconsiders major themes of the essays in relation to the recent past and present situation of academic anthropology.

Power Tends To Corrupt Christopher Lazarski, 2012-11-15 Lord Acton, 1834-1902, is often called a historian of liberty. A great historian and political thinker, he had a rare talent to reach beneath the surface and reveal the hidden springs that move the world. While endeavoring to understand the components of a truly free society, Acton attempted to see how the principles of self-determination and freedom worked in practice from antiquity to his own time. But though he penned hundreds of papers, essays, reviews, letters, and ephemera, the ultimate book of his findings and views on the history of liberty remained unwritten. Reading a book a day for years, he still could not keep pace with the output of his time and finally dejected, he gave up. Today, Acton is mainly known for a single maxim: power tends to corrupt, and absolute power corrupts absolutely. In *Power Tends to Corrupt*, Christopher Lazarski presents the first in-depth consideration of Acton's thought in more than fifty years. Lazarski brings Acton's work to light in accessible language with a focus on his understanding of liberty and its development in Western history. A work akin to Acton's overall account of the history of liberty with a secondary look at his political theory, this book is an outstanding exegesis of the theories and findings of one of the nineteenth century's keenest minds.

Imprisoned Pain and Its Transformation Joan Symington, 2018-04-17 In this chapter, Anne Alvarez describes how supervision with Sydney Klein played a decisive part in transforming her understanding of the importance of the grammar of interpretation: that not all interpretations have to unmask hidden desires on the negative side but rather can help the evolving process of growth and understanding. This is particularly important in borderline patients in whom such unmasking interpretations may be ego-depleting in that they do not take into account the immediate meaning of the child's communication.
