**Selected Papers of Professor Zhang Zhong-jun** Zhong-jun Zhang, Shun-tian Lou, 1990      **Selected Papers II, with Commentaries** Chen Ning Yang, 2013 This book is a collection of Professor Chen Ning Yang's personally selected papers 1971-2012 supplemented by his commentaries. Its contents reflect the professor's changing interests after he reached age sixty. *Selected Papers Of Chen Ning Yang II: With Commentaries* Chen Ning Yang, 2013-05-10 Professor Chen Ning Yang, an eminent contemporary physicist, was Professor at the Institute for Advanced Study Princeton New Jersey from 1955 to 1966 and Albert Einstein Professor of Physics at the State University of New York at Stony Brook until his retirement in 1999. He has been Distinguished Professor at Large at the Chinese University of Hong Kong since 1986 and Professor at Tsinghua University Beijing since 1998. Since receiving his PhD from the University of Chicago in 1948, Prof. Yang has made great impacts in both abstract theory and phenomenological analysis in modern physics. In 1983 he published *Selected Papers 1945-1980 With Commentary*. It has been considered by Freeman Dyson as one of his favorite books. The present book is a sequel to that earlier volume. It is a collection of his personally selected papers 1971-2012 supplemented by his insightful commentaries. Its contents reflect Professor Yang's changing interests after he reached age sixty. It also includes commentaries written by him in 2011 when he is 89 years old. The papers and commentaries in this unique collection comprise a remarkable personal and professional chronicle shedding light on both the intellectual development of a great physicist and on the nature of scientific inquiry.      **Selected Papers of Kun Huang** Bang-fen Zhu, 2000 Professor Kun Huang is widely known for his collaboration with Max Born in writing the classic monograph *Dynamical Theory of Crystal Lattices*. During his years of active research, he has made important contributions to solid state physics. This collection of papers is selected at his own choice as representing his most influential works. Included is his work on the interaction of radiation field with polar lattices and the resulting coupled vibration modes later known as polariton; the systematic development of his theory of radiative and nonradiative multiphonon transition processes associated with lattice relaxation; his early prediction of diffuse X-ray scattering due to crystal defects; and his research works on low-dimensional semiconductor structures and more. Professor Huang has found by his experience that scientists interested in these papers often want to know more particulars underlying the research work, such as background motivation and rationale involved. Thus he was led to write a commentary which is published alongside the papers.      **Large Scale Systems** Bao Liu, Ting Chen, Y. P. Zheng, 1993 Hardbound This volume covering both the theoretical and applied aspects of large scale systems (LSS) presents both the state of the art and current trends of development. Subjects include data and interaction analysis, decomposition, partition, hierarchical and decentralized control, robustness and safety control, structures, reliability, conflict resolution, knowledge-based systems and others.      **Discussion of Cold Damage (Shang Han Lun)** Guohui Liu, 2015-11-21 A major new

[Empire in the Western Ocean](#) Lo Jung-pang, 2023-03-01 In this ground-breaking posthumous study, the late Lo Jung-pang discusses the geographic, political, and commercial factors that led to the emergence of seapower and a navy under the Ming. While Zheng He and his seven expeditions have received some scholarly attention, few understand the long history of maritime engagement which provided the nautical and technical background for these voyages. The evolution of this maritime

engagement and its extension into the Indian Ocean is the focus of Lo's still timely and highly significant work. In addition to detailing the rise of the Ming navy and its extraordinary accomplishments, Lo also examines some of the factors that led to the end of China's first great maritime era. Why did China suddenly seem to turn away from the seas? Were the military defeats in Annam and on the northern borders significant in this? Or were financial pressures key? Empire in the Western Ocean represents the most comprehensive and insightful English language treatment to date of the evolution and activities of the early Ming navy. Moreover, it encourages further inquiry into contemporary questions of China's maritime aspirations. To aid the reader, a Foreword by Richard J. Smith discusses how Lo viewed the early Ming navy not simply in terms of its evolution and military strength but also in terms of the commerce and shipping that it promoted. This history is presented in the context of the centuries-long shift of China's demographic center of gravity from the northwest to the southeast by the Song period (960-1279). In the Afterword, Ming scholar Geoff Wade explains how the Ming rulers, eager to widely display their legitimacy, sent military forces abroad, collected treasure for the imperial court, and urged rulers of all known states to demonstrate their submission to the Ming court. He also shows how this often gave rise to violence during the Ming expeditions.
