Translated with a Critical Introduction and Notes by Geoffrey Wagner Gérard de Nerval, Geoffrey Atheling Wagner, 1958 **The Selected Writings of Andrew Lang** Tom Hubbard, 2016-12-08 A novelist poet literary critic and anthropologist Andrew Lang is best known for his publications on folklore mythology and religion many have grown up with the colour *Fairy Books* which he compiled between 1889 and 1910 This three volume set presents a selection of his work in these areas As a companion to the first volume the second is comprised of various case studies made by Lang ranging from *The Aryan Races of Peru* and *The Folk lore of France* to *Irish Fairies* and *The Ballads* Scottish and English Collectively the General Introduction to the set and the Introductions to the individual volumes offer a thorough overview of Lang's work in an astonishing variety of fields including his translation work on Homer and his contributions to historiography particularly Scottish Headnotes to the individual items are of varying length and provide more detail on specific topics and explanatory notes supply unique intellectual comment rather than merely factual information **Dante's New Life of the Book** Martin Eisner, 2021-03-18 Dante's *Vita nuova* has taken on a wide variety of different forms since its first publication in 1294 How could one work have generated such different physical forms Through examining the work's transformations in manuscripts printed books translations and adaptations Eisner reconceives of the relationship between the work and its reception Dante's *New Life of the Book* investigates how these different material manifestations participate in the work drawing attention to its distinctive elements Dante framed his book as an attempt to understand his own experiences through the experimental form of the book and later scribes editors and translators use different material forms to embody their interpretations of Dante's collection of thirty one poems surrounded by prose narrative and commentary Traveling from Boccaccio's Florence to contemporary Hollywood with stops in Emerson's Cambridge Rossetti's London Nerval's Paris Mandelstam's Russia De Campos's Brazil and Pamuk's Istanbul this study builds on extensive archival research to show how Dante's strange poetic forms including incomplete canzoni and sonnets with two beginnings continue to challenge readers Each chapter focuses on how one of these distinctive features has been treated over time offering new perspectives on topics such as Dante's love of Beatrice his relationship with Guido Cavalcanti and his attraction to another woman Numerous illustrations show the entanglement of the work's poetic form and its material survival Eisner provides a fresh reading of Dante's innovations demonstrating the value of this philological analysis of the work's survival in the world *On Psychological and Visionary Art* C. G. Jung, 2025-07-22 The first English translation of Jung's landmark lecture on Nerval's hallucinatory memoir In 1945

at the end of the Second World War and after a long illness C G Jung delivered a lecture in Zurich on the French Romantic poet Gérard de Nerval. The lecture focused on Nerval's visionary memoir *Aurélia* which the poet wrote in an ambivalent attempt to emerge from madness. Published here for the first time Jung's lecture is both a cautionary psychological tale and a validation of Nerval's visionary experience as a genuine encounter. Nerval explored the irrational with lucidity and exquisite craft. He privileged the subjective imagination as a way of fathoming the divine to reconnect with what the Romantics called the life principle. During the years of his greatest creativity he suffered from madness and was institutionalized eight times. Contrasting an orthodox psychoanalytic interpretation with his own synthetic approach to the unconscious Jung explains why Nerval was unable to make use of his visionary experiences in his own life. At the same time Jung emphasizes the validity of Nerval's visions differentiating the psychology of a work of art from the psychology of the artist. The lecture suggests how Jung's own experiments with active imagination influenced his reading of Nerval's *Aurélia* as a parallel text to his own *Red Book*. With Craig Stephenson's authoritative introduction Richard Sieburth's award winning translation of *Aurélia* and Alfred Kubin's haunting illustrations to the text and featuring Jung's reading marginalia preliminary notes and revisions to a 1942 lecture *On Psychological and Visionary Art* documents the stages of Jung's creative process as he responds to an essential Romantic text.

Controlling Time and Shaping the Self, 2011-06-22 This book explores new questions and approaches to the rise of autobiographical writing since the early modern period. What motivated more and more men and women to write records of their private life? How could private writing grow into a bestselling genre? How was this rapidly expanding genre influenced by new ideas about history that emerged around 1800? How do we explain the paradox of the apparent privacy of publicity in many autobiographies? Such questions are addressed with reference to well known autobiographies and an abundance of newfound works by persons hitherto unknown not only from Europe but also the Near East and Japan. This volume features new views of the complex field of historical autobiography studies and is the first to put the genre in a global perspective.

Rogues Jacques Derrida, 2005 *Rogues* published in France under the title *Voyous* comprises two major lectures that Derrida delivered in 2002 investigating the foundations of the sovereignty of the nation state. The term *tat voyou* is the French equivalent of rogue state and it is this outlaw designation of certain countries by the leading global powers that Derrida rigorously and exhaustively examines. Derrida examines the history of the concept of sovereignty engaging with the work of Bodin, Hobbes, Rousseau, Schmitt and others. Against this background he delineates his understanding of democracy to come which he distinguishes clearly from any kind of regulating ideal or teleological horizon. The idea that democracy will always remain in the future is not a temporal notion. Rather the phrase would name the coming of the unforeseeable other, the structure of an event beyond calculation and program. Derrida thus aligns this understanding of democracy with the logic he has worked out elsewhere. But it is not just political philosophy that is brought under deconstructive scrutiny here. Derrida provides unflinching and hard hitting assessments of current political realities and these essays are highly engaged with
