**Hard Choices** Donald K Emmerson, 2003-08-01 The region's most powerful organization ASEAN is being challenged to ensure security and encourage democracy while simultaneously reinventing itself as a model of Asian regionalism Should ASEAN's leaders defend a member country's citizens against state predation for the sake of justice and risk splitting ASEAN itself Or should regional leaders privilege state security over human security for the sake of order and risk being known as a dictators club Should ASEAN isolate or tolerate the junta in Myanmar Is democracy a requisite to security or is it the other way around How can democratization become a regional project without first transforming the Association into a people-centered organization But how can ASEAN reinvent itself along such lines if its member states are not already democratic How will its new Charter affect ASEAN's ability to make these hard choices How is regionalism being challenged by transnational crime infectious disease and other border jumping threats to human security in Southeast Asia Why have regional leaders failed to stop the perennial regional haze from brushing fires in democratic Indonesia Does democracy help or hinder nuclear energy security in the region In this timely book the second of a three book series focused on Asian regionalism ten analysts from six countries address these and other pressing questions that Southeast Asia faces in the twenty first century

**Difficult Choices** Richard C. Bush, 2021-04-13 How Taiwan can overcome internal stresses and the threat from China Taiwan was a poster child for the third wave of global democratization in the 1980s It was the first Chinese society to make the transition to democracy and it did so gradually and peacefully But Taiwan today faces a host of internal issues starting with the aging of society and the resulting intergenerational conflicts over spending priorities China's long term threat to incorporate the island on terms similar to those used for Hong Kong exacerbates the island's home grown problems Taiwan remains heavily dependent on the United States for its security but it must use its own resources to cope with Beijing's constant intimidation and pressure How Taiwan responds to the internal and external challenges it faces and what the United States and other outside powers do to help will determine whether it is able to stand its ground against China's ambitions The book explores the broad range of issues and policy choices Taiwan confronts and offers suggestions both for what Taiwan can do to help itself and what the United States should do to improve Taiwan's chances of success

Dumont,2014-08-13 Governing cabinets are composed of ministers who come and go even as governments march on They work for the chief executive the prime minister or the president for their parties and for the constituent groups from which

they come They are chosen for their role and dismissed from it for all sorts of reasons that vary across time and country This book examines the process of selection shuffling and removal of ministers in national cabinets around the world Drawing on original data over several decades it offers a series of case studies of countries from around the world with differing institutional and cultural structures including presidential and semi presidential systems and parliamentary unitary and federal systems some of which have experienced periods under authoritarian regimes Featuring 14 case studies on North and South America Asia Africa Australia and New Zealand this book complements the earlier volume *The Selection of Ministers in Europe* Routledge 2009 This volume will be an important reference for students and scholars of political science government executives comparative politics and political parties

*The Oxford Handbook of Political Representation in Liberal Democracies* Robert Rohrschneider, Jacques Thomassen, 2020-07-28 The Handbook of Political Representation in Liberal Democracies offers a state of the art assessment of the functioning of political representation in liberal democracies In 34 chapters the world s leading scholars on the various aspects of political representation address eight broad themes The concept and theories of political representation its history and the main requisites for its development elite orientations and behavior descriptive representation party government and representation non electoral forms of political participation and how they relate to political representation the challenges to representative democracy originating from the growing importance of non majoritarian institutions and social media the rise of populism and its consequences for the functioning of representative democracy the challenge caused by economic and political globalization what does it mean for the functioning of political representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people The various chapters offer a comprehensive review of the literature on the various aspects of political representation The main organizing principle of the Handbook is the chain of political representation the chain connecting the interests and policy preferences of the people to public policy via political parties parliament and government Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research Comparative research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different

*Gender Quotas as Game Changers for the Recruitment, Selection, and Performance of Elected Politicians* Andrea S. Aldrich, William T. Daniel, 2025-02-27 As political systems around the world implement gender quotas to balance women and men s elected representation new opportunities and expectations for how both men and women are recruited selected and promoted by political parties are created This book demonstrates that gender quotas positively disrupt all levels of the political system political office political parties and the careers of politicians By focusing on the European Parliament and building upon evidence compiled from new data sources from 28 current and former EU member states 1979 2022 it provides evidence that different quotas affect similar

politicians in different ways As quota implementation changes the pool of political aspirants that parties recruit from the background characteristics that are prioritized in selecting candidates are enhanced to optimise the management of career trajectories at all levels of the system Quotas are therefore not just effective for promoting gender parity but also change the course of women s and men s political careers at subnational national and European levels of office This volume should be seen as leading the conversation about the longterm changes that are achieved by implementing rules that promote inclusivity and increase institutional diversity It is relevant to both academic and policy circles Whereas existing literature has examined how where and why gender quotas arise the book pushes forward conversations about the previously unexplored additional effects for quota implementation from the perspective of the career progression of elected politicians

*Policy Agendas in Autocracy, and Hybrid Regimes* Miklós Sebők, Zsolt Boda, 2021-06-01 Over the past thirty years the comparative study of policy agendas under the aegis of the Comparative Agendas Project CAP has become one of the fastest growing sub field in policy research Yet similarly to policy studies in general most of the agenda setting literature focuses on well established democracies This edited volume offers a ground breaking analysis of a hitherto less examined topic in comparative politics the dynamics of policy agendas in Socialist autocracy and in hybrid regimes We propose that policymaking in authoritarian and illiberal regimes is different from the practices of democracies which we analyse based on a unique historical policy agendas database built by the Hungarian CAP team at the Centre for Social Sciences in Budapest We find that punctuated equilibrium theory offers a good description of policy dynamics regardless of policy regimes yet punctuations are more pronounced in autocratic and illiberal settings These regime types also share a tendency towards centralization a less efficient use of public information and a suppression of democratic participation in the policy process This book may be of interest to scholars and students of policy studies agenda setting and the politics of authoritarianism

*Moral Guidelines for the Selection of Art Works for the Classroom, Based on Neo-Thomism and Experimentalism* John Joseph Gropper, 1971

**Politics of Random Selection** Gil Delannoi, 2025-01-07 What should you do when you have decided to use the drawing of lots in a procedure What practical questions arise What options are available What are the details What advantages and disadvantages should we expect from each option What are the risks to be aware of and the precautions to take The literature on sortition consists of three main genres monographs arguments for and against and the history of the procedure in one or more dimensions This book stands a little apart from this framework Its method is largely deductive and theoretical in reasoning It has a practical purpose which is aimed at specialists as well as naïve users and interested parties precise enough to satisfy an informed public and simple enough to be accessible to citizens and practitioners Gil Delannoi begins with a general theory of political procedures and its relations with the typology of political regimes Sortitive democracy is also studied as a third option distinct from the familiar representative and direct types Sortition is analysed through its main uses effects and objectives Several detailed potential uses are proposed for political actors at the end of the book Treating procedures like delicate flowers or rare birds is far from superfluous To forget this aspect is to stick to generalities and to ignore crucial details

**Re-mapping the Americas** Dr Hamid Ghany, Professor Julián Castro-Rea, Professor W Andy Knight, 2014-04-28 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in

many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn't been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere's recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades

**Presidential Selection** James W. Ceaser, 2020-07-21 Examining the development of the process of presidential selection from the founding of the republic to the present day James Ceaser contends that many of the major purposes of the selection system as it was formerly understood have been ignored by current reformers and modern scholars In an attempt to reverse this trend Professor Ceaser discusses the theories of selection offered by leading American statesmen from the Founders and Thomas Jefferson to Martin Van Buren and Woodrow Wilson From these theories he identifies a set of criteria for a sound selection system that he then uses to analyze and evaluate the recent changes in the selection process Five normative functions of a presidential selection system comprise the author's criteria it should minimize the harmful effects of ambitious contenders for the office promote responsible executive leadership and power help secure an able president ensure a legitimate accession and provide for an appropriate amount of choice and change Professor Ceaser finds that the present system is characterized by weak parties and candidate centered campaigns that lead to the problems of image politics and demagogic leadership appeals He therefore argues for a more republican selection system in which political parties would be strengthened to serve as a restraining force on popular authority public opinion and individual aspirations for executive power
