## **Self Society Existence:**

*Self, society, existence* Paul E. Pfuetze, 1973      *Society in the Self* Hubert J. M. Hermans, 2018-03-09 Instead of considering society as a social environment Society in the Self begins from the assumption that society works in the deepest regions of self and identity as expressed in phenomena like self sabotage self radicalization self cure self government self nationalization and self internationalization This leads to the central thesis that a democratic society can only function properly if it is populated by participants with a democratically organized self In this book an integrative model is presented that is inspired by three versions of democracy cosmopolitan deliberative and agonistic democracy with the latter focusing on the role of social power and emotions Drawing on these democratic views three levels of inclusiveness are distinguished in the self personal I as an individual social I as a member of a group and global I as a human being A democratic self requires the flexibility of moving up and down across these levels of inclusiveness and has to find its way in fields of tension between the self and the other and between dialogue and social power As author Hubert Hermans explains this theory has far reaching consequences for such divergent topics as leadership in the self cultural diversity in the self the relationship between reason and emotion self empathy cooperation and competition between self parts and the role of social power in prejudice enemy image construction and scapegoating The central message of this book is reflected in Mahatma Gandhi's dictum Be the change you want to see in the world      **Self and Society** Drew Westen, 1985-10-31 This 1985 book studies the relation between the individual and collective processes which is central to the social sciences      Exploring Self and Society Rosamund Billington, Sheelagh Strawbridge, Jenny Hockey, 1998-06-24 This text addresses contemporary society in an immediate and thought provoking manner and will be a timely and topical introduction to the dynamic and critical dimensions of sociology It adopts a broad social science approach which reflects both the authors' competencies and also the widening and overlaying boundaries of the social sciences Starting with the problem oriented agenda of the social sciences it explores the tensions between structure agency and process via the idea of a structure bound and yet creative and participatory self      **Self, Symbols, and Society** Nathan Rousseau, 2002 Students of social psychology can read in this new text original writings assembled from the founders of sociology in the nineteenth century to the latest influential works by contemporary sociologists today Readers can gain from this book a greater appreciation of social history deeper self knowledge and a heightened sense of civic concern and responsibility Visit our website for sample chapters      *Self and Society* Steven Collins, 2013-07-15 This selection of essays originally published between 1988 and 2010 demonstrates that in the study of Buddhism a concern with detailed accuracy in philological and textual specifics can be combined with an attempt to deal with wider and difficult philosophical and sociological issues The first part Pali Literature deals with the historical formation of the Pali Canon with the continuing oral aspects of Pali texts and looking at the entire range of Pali texts with the question What is Literature in Pali The second part The theory and Practice of Not self looks at the Buddhist denial of self as

both a philosophical position and as a form of practice one in which a process of self transformative behavioral and psychological training is seen to culminate in the realization that there is no self underlying the ever changing moments of experience The third part Buddhism and Society has two essays reflecting on and extending Louis Dumont s comparative theorizing about the individual and society in East and West and a final contemporary treatment of Buddhist nuns mae chi in Thav da Buddhism both in general and specifcally as active in higher education in Bangkok The three essays attempt to build on but go beyond the work of Dumont and behind him Max Weber in thinking about what they would call world renunciation as a phenomenon of society and culture

**Self-Organization and Society** Takatoshi Imada,2008-04-15 Self organization is a generic term describing the capacity of a system to change its own structure by itself while interacting with the environment In this sense self organization is not environment determined or environment adaptive but is self determined and self adaptive The concept of self organization was born in the 1960s and attempts were made to establish a theory based on the logic of a system and its control In contrast the 1980s introduced a view based on the logic of creative individuals and on fluctuations Antithetical differences exist between the two The former regards the system of aggregated individuals as the object of consideration where self organization is the sum of the practices of a system led by control or self control in particular The latter focuses on the practices of individuals deviating from the logic of a system making the existing system fluctuate and transforming its structure This volume attempts to integrate these viewpoints through inquiry into the structure of the self and through self reflexion A new horizon thus opens for the synthesis of planning control action theory and spontaneous performative action theory

*Self and Society* Alexander Kremer,John Ryder,2009 This book is the fourth volume of selected papers from the Central European Pragmatist Forum CEPF It deals with the general question of self and society and the papers are organized into sections on Self and History Self and Society Self and Politics Self and Neopragmatism and an Interview with Richard Rorty The authors are among the leading specialists in American philosophy from universities across the US and in Central and Eastern Europe

*Mind, Self & Society* George Herbert Mead,2015-05-12 This foundational text of social psychology presents the most complete summation of Mead s theory of symbolic interactionism George Herbert Mead is widely recognized as one of the most brilliantly original American pragmatists Although he had a profound influence on the development of social philosophy he published no books in his lifetime This makes the lectures collected in *Mind Self and Society* all the more remarkable as they offer a rare synthesis of his ideas This collection gets to the heart of Mead s meditations on social psychology and social philosophy With wry humor and shrewd reasoning Mad teases out the genesis of the self and the nature of the mind Included in this edition are an insightful foreword from leading Mead scholar Hans Joas a revealing set of textual notes by Dan Huebner that detail the text s origins and a comprehensive bibliography of Mead s other published writings

**The Existential Self in Society** Joseph A. Kotarba, Andrea Fontana, 1987-07-28 The Existential Self in Society explores the ways in which we experience and shape our individuality in a rapidly changing social world Kotarba and Fontana have gathered eleven original essays that form an exciting contribution and an ideal introduction to the emerging field of existential sociology

*The Idea of the Self* Jerrold Seigel, 2005-02-17 What is the self The question has preoccupied people in many times and places but nowhere more than in the modern West where it has spawned debates that still resound today In this 2005 book Jerrold Seigel provides an original and penetrating narrative of how major Western European thinkers and writers have confronted the self since the time of Descartes Leibniz and Locke From an approach that is at once theoretical and contextual he examines the way figures in Britain France and Germany have understood whether and how far individuals can achieve coherence and consistency in the face of the inner tensions and external pressures that threaten to divide or overwhelm them He makes clear that recent postmodernist accounts of the self belong firmly to the tradition of Western thinking they have sought to supersede and provides an open ended and persuasive alternative to claims that the modern self is typically egocentric or disengaged

*Soul, Self, and Society* Edward L. Rubin, 2015-02-17 Morality is not declining in the modern world Instead a new morality is replacing the previous one Centered on individual self fulfillment and linked to administrative government it permits things the old morality forbid like sex for pleasure but forbids things the old morality allowed like intolerance and equality of opportunity
