*Mirrors of Self* Jonathan P. Badgett, 2021-10-14 Orthodox Christology maintains that Jesus Christ is both truly God and truly human As such he is the key to knowing both God and self In a series of applications of christological anthropology *Mirrors of Self* develops this epistemic premise in dialogue with a diversity of Christian and secular historical

and modern perspectives Aspects of human personhood including the ever elusive self gain greater clarity and significance in the light of Christ's person and work At the center of individual human subjectivity we encounter a broken sin blinded self in need of renewal and release What healing we find comes to us as Christ's ecological presence works in and through others the mirrors of self whose instrumental agency Christ employs in service to his own redemptive ends      **Art in Motion** Adina Mornell, 2009 Musicians tend to believe that the mystery of their art cannot be objectively studied quantified or explained As a result the term motor learning is rarely used in connection with musicians and an empirical approach to musical performance is more the exception than the rule Sports scientists however show a great interest in musicians because of their advanced skill level and the attentional and emotional demands of the concert stage This work combines knowledge across disciplines Advances toward an understanding of human behavior and cognition offer clues to strategies of motor learning and performance that promote the well being of musicians and athletes This book provides a forum for an interdisciplinary exchange of research laying the groundwork for future projects      **Beyond Well-Being** Martin Dowson, Stuart Devenish, Maureen Miner, 2012-08-01 This volume arose out of a deep concern to assist people in their struggle to lead a flourishing life Fractured stressed relationally broken and spiritually empty people may instinctively reach for the supposed panacea of happiness But happiness is often a transitory state More stable and worthwhile than the pursuit of happiness is leading a flourishing life But what is flourishing Is spirituality necessary for human flourishing and if so in what ways might spirituality provide a unique and important contribution to flourishing The volume provides complementary yet diverse accounts of human flourishing Each account argues that spirituality in general and Christian spirituality in particular are vital contributors to flourishing The volume will be valuable for those who are dissatisfied with popular hedonistic approaches to flourishing Such people are ready for a change in approach but often do not have a clear alternative in view The Volume will provide a clear alternative to popular culture's representation of the flourishing person which is largely vested in conspicuous consumption The book will also be valuable for those who have considered alternatives to popular culture but who lack an informed basis on which to evaluate these alternatives Finally the book will be valuable for those who are committed to Christian spirituality but may not appreciate the rich resources which Christian faith offers for human flourishing Amongst the latter group are included Christian leaders such as priests and pastors voluntary church workers and lay people who may or may not be involved in formal religion but who long to flourish in their own lives and to enable others to do the same      **The Human Person** Thomas L. Spalding, James M. Stedman, Christina L. Gagné, Matthew Kosteletzky, 2019-12-13 This book introduces the Aristotelian Thomistic view of the human person to a contemporary audience and reviews the ways in which this view could provide a philosophically sound foundation for modern psychology The book presents the current state of psychology and offers critiques of the current philosophical foundations In its presentation of the fundamental metaphysical commitments of the Aristotelian Thomistic view it places the human being within the broader

understanding of the world Chapters discuss the Aristotelian Thomistic view of human and non human cognition as well as the relationship between cognition and emotion In addition the book discusses the Aristotelian Thomistic conception of human growth and development including how the virtue theory relates to current psychological approaches to normal human development the development of character problems that lead to psychopathology current conceptions of positive psychology and the place of the individual in the social world The book ends with a summary of how Aristotelian Thomistic theory relates to science in general and psychology in particular The Human Person will be of interest to psychologists and cognitive scientists working within a number of subfields including developmental psychology social psychology cognitive psychology and clinical psychology and to philosophers working on the philosophy of psychology philosophy of mind and the interaction between historical philosophy and contemporary science as well as linguists and computer scientists interested in psychology of language and artificial intelligence
