Paradigm Shift G. Udhayakumar, 2024-12-10 A paradigm is a standard perspective or set of ideas. A paradigm is a way of looking at something. The word paradigm comes up a lot in the academic, scientific, and business worlds. A new paradigm in business could mean a new way of reaching customers and making money. To change your opinion of or attitude towards something. The shift may be permanent and not reversible. Paradigm shifts in industry often happen when New Technology is introduced radically alters the production process or manufacturing of a good or service. These shifts are key drivers in many of the processes that a society undergoes such as the American Industrial Revolution or the information revolution since the 2000s. A paradigm shift is a major change in how people think and get things done that upends and replaces a prior paradigm.

**Guidance and Counselling in Schools** Namita Ranganathan, Toolika Wadhwa, 2024-02-27 This book addresses guidance and counselling needs of children and adolescents in school settings. Acknowledging that most issues which children and adolescents face do not reach clinical settings and are often addressed by primary caregivers, the book focuses on specific strategies that primary caregivers can use. With an overview of mental health concerns that arise during these developmental stages, the book focuses specifically on the roles that parents and teachers can play. Home and school together play vital roles in the lives of children and adolescents. The book thus recognises the need for them to work together and uses examples from the field to build contexts in which school children and adolescents grow. This is attempted in the backdrop of theories of psychology and mental health therapies. The volume tries to bridge the gap between theory and practical applications of mental health in everyday life. This book would be useful to the students, researchers, and teachers working in the fields of education, psychology, development studies, social work, and sociology. It would also be an invaluable companion to policy makers, professionals from government and non-government organisations working around education and social development.
