Richard S. Hallam, 2012-04-19 This book looks at how to define persons and selves and the ways in which different disciplines have dealt with this topic White Nativism, Ethnic Identity and US Immigration Policy Reforms Maria del Mar Farina, 2017-09-22 Analysing US immigration and deportation policy over the last twenty years this book illustrates how US immigration reform can be conceived as a psychological legal policy driven tool which is inexorably entwined with themes of American identity national belonging and white nativism Focusing on Hispanic immigration and American born children of Mexican parentage the author examines how engrained historical individual and collective social constructions and

psychological processes related to identity formation can play an instrumental role in influencing political and legal processes. It is argued that contemporary American immigration policy reforms need to be conceptualized as a complex conscious and unconscious White Nativist psychological legal defence mechanism related to identity preservation and contestation. Whilst building on existing theoretical frameworks, the author offers new empirical evidence on immigration processes and policy within the United States as well as original research involving the acculturation and identity development of children of Mexican immigrant parentage. It brings together themes of race, ethnicity and American national identity under a new integrated sociopolitical and psychological framework, examining macro and micro implications of recent US immigration policy reform. Subsequently, this book will have broad appeal for academics, professionals and students who have an interest in political psychology, childhood studies, American immigration policy, constructions of national identity, critical race and ethnic studies and the Mexican diaspora.

Handbook of Identity Theory and Research Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22. Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines, identity researchers remain divided over such enduring fundamental questions as: What exactly is identity and how do identity processes function? Do people have a single identity or multiple identities? Is identity individually or collectively oriented? Personally or socially constructed? Stable or constantly in flux? The Handbook of Identity Theory and Research offers the rare opportunity to address the questions and reconcile these seeming contradictions, bringing unity and clarity to a diverse and fragmented literature. This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches. Contributing authors provide perspectives from psychology, e.g. narrative social identity theory, neo-Eriksonian and from other disciplines, e.g. sociology, political science, ethnic studies, and the editors highlight the links between chapters that provide complementary insights on related subjects. In addition to covering identity processes and categories that are well known to the field, the Handbook tackles many emerging issues including: Identity development among adopted persons; Identity processes in interpersonal relationships; Effects of globalization on cultural identity; Transgender experience and identity; Consumer identity and shopping behavior; Social identity processes in xenophobia and genocide. The Handbook of Identity Theory and Research lends itself to a wealth of uses by scholars, clinicians and graduate students across many disciplines including social developmental and child school psychology, human development and family studies, sociology,

Identity and African American Men Kenneth Maurice Tyler, 2014-07-16 Kenneth Maurice Tyler identifies and describes the multiple identity components of young African American men using theoretical and empirical literatures from education and the social sciences Identity and African American Men Exploring the Content of Our Characterization provides a comprehensive research based account of the ideologies and mindsets of many young African American men The book

critically discusses eight identity components that young African American men begin to negotiate during their adolescent years. These identity components include gender, sexual, racial, ethnic, cultural, socioeconomic, athletic, and academic identity. *Identity and African American Men* makes a unique contribution to the literature by offering a conceptual framework that identifies the multiple identity components possessed by young African American men. Citizenship and Collective Identity in Europe Ireneusz Pawel Karolewski, 2009-12-04. This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union, integrating two fields of research: citizenship and collective identity. Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity. He constructs three generic models of citizenship: the republican, the liberal, and the caesarean citizenship, to which he ascribes types of collective identity. Using a multidisciplinary approach, the book integrates concepts, theories, and empirical findings from sociology in the field of citizenship research, social psychology in the field of collective identity, legal studies in the chapter on the European Charter of Fundamental Rights, security studies in the chapter on the politics of insecurity, and philosophy in the chapter on pathologies of deliberation to examine the current trends of European citizenship and European identity politics. This book will be of interest to students and scholars of European politics, political theory, political philosophy, sociology, and social psychology.
