Diagnostic Hematology Norman Beck, 2008-12-19 The approach described in this book is different from that in most student texts and has been very successful in practice starting almost from scratch but omitting many of the basics such as the details of hematopoiesis laboratory technology and so on which are hardly relevant to the practising clinician and student in the wards and are primarily of interest to the hematologist and sometimes to the clinical specialist Considerable emphasis is given to the clinical history and examination and the interpretation of the clinical patterns thus exposed Hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology

The purpose of this unique title is to provide internal medicine residents and physicians as well as other professionals engaged in internal medicine practice with a single resource of comprehensive abundantly helpful time saving training and practice notes Developed by a now highly experienced hospitalist physician during his three years residency training in internal medicine as well as during his current role as a practicing hospitalist these notes provide a broad framework and tool not only for the learning and practicing of internal medicine after graduation from professional schools and during training but after residency training as well The majority of the notes were presented as one to a few sentences rendering the information succinct and easy to digest The notes also provide simple key information in patient care including but not limited to the workup and management of a wide range of clinical scenarios The book was divided into three general areas 1 daily notes taken during the author s residency training in the format of a diary with the original dates but updated knowledge and information 2 notes for outpatient medicine and clinical subspecialties and 3 notes as a hospitalist The daily notes were based on knowledge and experiences the author learned from actual clinical cases workup medication regimen patient education and sometimes patient and family interactions The notes for outpatient medicine and clinical subspecialties were based on specific topics subspecialties and were heavily clinically oriented with a focus on patient care The addition of notes as a hospitalist was based on the author s duties as a hospitalist which requires knowledge and understanding of acute neurological and neurosurgical issues various types of cancers and some common yet complicated or uncommon clinical scenarios of infectious diseases A major contribution to the internal medicine education literature *Internal Medicine Training Notes and Survival Guide* An Insider s Roadmap for the Journey from Resident to Attending Physician will appeal to a wide readership including resident physicians practicing physicians physician assistants and nurse practitioners in internal medicine **Management of Sickle Cell Pain** Wally R. Smith, Thokozeni Lipato, 2025-02-10 One of the major developmental tasks for all children is to master functioning in the school environment This task can be difficult for children with chronic illnesses Students must be present and engaged to develop positive relationships with same aged peers and succeed academically Children with SCD have been shown to have difficulties both academically and socially in school SCD painful vaso occlusive crises VOCs whether treated in the hospital or at home are unpredictable making it challenging for

students to be present and fully engaged with their educational experience Patients with SCD miss an average of 20 40 days of school per year Approximately 35% of patients miss more than one month of school a rate significantly higher than peers or sibling controls Grade retention rates in adolescents have been reported to be as high as 40% higher than the national average of 5 10% for unaffected students In addition to pain other factors related to SCD such as chronic anemia neurocognitive deficits and stroke can impact school absenteeism and performance Physical changes such as small stature and jaundice combined with activity limitations that are often placed on students can impair social interactions with peers Children with SCD perceive challenges to managing their pain at school and barriers to creating a positive experience in school environment as early as elementary school Academic challenges extend beyond racial and socioeconomic disparities as children with SCD have disproportionately higher rates of grade retention and special education services compared with nonaffected children in the same school district Neurologic complications ranging from overt stroke to subtle neurocognitive changes are among the most common complications of SCD SCD is the most common cause of stroke in children Patients can also have silent strokes and sickle cell related vasculopathy Silent infarcts are associated with cognitive morbidity and increase the likelihood of future overt stroke Patients with normal magnetic resonance imaging results and no history of stroke still may have evidence of neurocognitive decline related to underlying SCD Full scale IQ typically declines by 1 5 points year Markers of disease severity such as low baseline hemoglobin have been shown
