Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education
