Selling the War Zbyněk A. B. Zeman, 1982 Selling The War Zbynek Zeman, 1978 Appeal to patriotism Against spies and saboteurs Campaign for war production Promoting the international alliance Allied forces and Nazi propaganda World War II 2 **Art, Propaganda and Aerial Warfare in Britain during the Second World War** Rebecca Searle, 2020-07-23

The War Artists Advisory Committee WAAC were responsible for the production of some of the most iconic images of the Second World War Despite its rich historical value this collection has been poorly utilised by historians and hasn't been subjected to the levels of analysis afforded to other forms of wartime culture This innovative study addresses this gap by bringing official war art into dialogue with the social economic and military histories of the Second World War Rebecca Searle explores the tensions between the documentarist and propagandistic roles of the WAAC in their representation of aerial warfare in the battle for production the Battle of Britain the Blitz and the bombing of Germany Her analyses demonstrate that whilst there was a strong correlation between war art and propaganda the WAAC depicted many aspects of experience that were absent from wartime propaganda such as class divisions within the services gendered hierarchies within industries civilian death and the true nature of the bombing of Germany In addition she shows that propagandistic constructions were not entirely separate from lived experience but reflected experience and shaped the way that individuals made sense of the war Accessibly written highly illustrated and packed with valuable examples of the use of war art as historical source this book will enhance our understanding of the social and cultural history of Britain during the Second World War

The Oxford Illustrated History of World War Two Richard Overy, 2015-04-09 World War Two was the most devastating conflict in recorded human history It was both global in extent and total in character It has understandably left a long and dark shadow across the decades Yet it is three generations since hostilities formally ended in 1945 and the conflict is now a lived memory for only a few And this growing distance in time has allowed historians to think differently about how to describe it how to explain its course and what subjects to focus on when considering the wartime experience For instance as World War Two recedes ever further into the past even a question as apparently basic as when it began and ended becomes less certain Was it 1939 when the war in Europe began Or the summer of 1941 with the beginning of Hitler's war against the Soviet Union Or did it become truly global only when the Japanese brought the USA into the war at the end of 1941 And what of the long conflict in East Asia beginning with the Japanese aggression in China in the early 1930s and only ending with the triumph of the Chinese Communists in 1949 In *The Oxford Illustrated History of World War Two* a team of leading historians reassesses the conflict for a new generation exploring the course of the war not just in terms of the Allied response but also from the viewpoint of the Axis aggressor states Under Richard Overy's expert editorial guidance the contributions take us from the genesis of war through the action in the major theatres of conflict by land sea and air to assessments of fighting power and military and technical innovation the economics of total war the culture and propaganda

of war and the experience of war and genocide for both combatants and civilians concluding with an account of the transition from World War to Cold War in the late 1940s Together they provide a stimulating and thought provoking new interpretation of one of the most terrible and fascinating episodes in world history *The Censored War* George H. Roeder,1993-01-01 Early in World War II censors placed all photographs of dead and badly wounded Americans in a secret Pentagon file known to officials as the Chamber of Horrors Later as government leaders became concerned about public complacency brought on by Allied victories they released some of these photographs of war's brutality But to the war's end and after they continued to censor photographs of mutilated or emotionally distressed American soldiers of racial conflicts at American bases and other visual evidence of disunity or disorder In this book George H Roeder Jr tells the intriguing story of how American opinions about World War II were manipulated both by the wartime images that citizens were allowed to see and by the images that were suppressed His text is amplified by arresting visual essays that include many previously unpublished photographs from the army's censored files Examining news photographs movies newsreels posters and advertisements Roeder explores the different ways that civilian and military leaders used visual imagery to control the nation's perception of the war and to understate the war's complexities He reveals how image makers tried to give minorities a sense of equal participation in the war while not alarming others who clung to the traditions of separate races classes and gender roles He argues that the most pervasive feature of wartime visual imagery was its polarized depiction of the world as good or bad and he discusses individuals Margaret Bourke White Bill Mauldin Elmer Davis and others who fought against these limitations He shows that the polarized ways of viewing encouraged by World War II influenced American responses to political issues for decades to follow particularly in the simplistic way that the Vietnam War was depicted by both official and antiwar forces
