The Past And Future Of Law E.O. Blunsom, 2013-04-10 We live in our nations but what other nations do may affect us and sometimes immensely We are all members of the world community of people living in our dangerous world The purpose of the following book is to consider the laws and practices that govern our nations and through them our world It builds on the premise that unless we change and improve our laws the human race may not survive in the future It is not about any particular nation but about all nations Many citizens believe their nations are ideal providing freedom and justice and with governments representative of the people This may be true in their minds and according to their beliefs but the dangers and sufferings of the world continue They are the concern of us all because they affect all people The world has changed vastly from the past It is technically more advanced but also more dangerous because of nuclear and other deadly weapons and widespread poverty and diseases in overgrown populations The past in spite of its myriad wars and premature deaths has survived Can our present world using the same instruments power nations positive laws strictly enforced retaliations and harsh punishments also survive The answer may be an unequivocal no reverberating through future power wars We need a fresh outlook different laws and a new phase of global society to replace the past Legal philosophers have proclaimed many varieties of laws including eternal laws provided by God and natural laws according to human nature Most are nonenforced laws that they say Ought to be Positive laws are those that exist made and enforced by nations

Wilfrid Bonser, 1957      *Aspar and the Struggle for the Eastern Roman Empire, AD 421-71* Ronald A. Bleeker, 2022-04-07 The first full length biography in English of Aspar the eastern Roman general and statesman this book explores his central role in the history and politics of the fragmenting Roman Empire in the fifth century It also considers what his life and career may suggest as to the differing fates of the eastern and western parts of the empire Taking a chronological approach Bleeker guides us through what is known of Aspar's life and his changing influence in the eastern Roman army and court Born and raised in Constantinople Aspar primarily viewed and presented himself as a Roman general consul and senator Yet he also stood outside the Roman mainstream in two important ways as a member of the empire's barbarian military leadership and as a devout Arian Christian Early chapters treat his formative military experiences with the Persians a Roman usurper in Italy the Vandals in Africa and the Huns of Attila while later chapters focus on Aspar's political role in resolving the two imperial succession crises that struck the eastern Roman empire in the mid fifth century and his extended struggle to control the succession to Leo I Bleeker builds on earlier studies in three ways First previous work has largely concentrated on the role of barbarian generals in the western Roman empire while much less attention has been paid to similar figures such as Aspar in the east Secondly while important recent work has explored the prevalence of child emperors in the late fourth and early fifth centuries this book suggests a further evolution of the imperial role in the mid fifth century Finally while previous studies of

this period have focused on Aspar's late career role in the succession struggles a full study allows us to see how and why his relations with other key figures within and outside the eastern Roman government changed over the course of his lengthy career
