Anthropological Papers of the American Museum of Natural History ,1921 Ritual and Belief David Hicks,2010-03-15
Ritual and Belief Readings in the Anthropology of Religion is a collection of 41 readings in religion magic and witchcraft The choice of readings is eclectic no single anthropological approach or theoretical perspective dominates the text Theoretical significance scholarly eminence of the author and inherent interest provide the principal criteria and each reading complements its companion chapters which are pedagogically coherent rather than ad hoc assemblages Included among the theoretical perspectives are structural functionalism structuralism Malinowskian functionalism cultural materialism and cultural evolutionism also included are the synchronic and diachronic approaches The book offers a mixture of classic readings and more recent contributions and the world religions are included along with examples from the religions of traditionally non literate cultures As diverse a range of religious traditions as possible has been embraced from various ethnic groups traditions and places *Mind in the Cave: Consciousness and the Origins of Art* David Lewis-Williams,2004-04-17 The breathtakingly beautiful art created deep inside the caves of western Europe has the power to dazzle even the most jaded observers Emerging from the narrow underground passages into the chambers of caves such as Lascaux Chauvet and Altamira visitors are confronted with symbols patterns and depictions of bison woolly mammoths ibexes and other animals Since its discovery cave art has provoked great curiosity about why it appeared when and where it did how it was made and what it meant to the communities that created it David Lewis Williams proposes that the explanation for this lies in the evolution of the human mind Cro Magnons unlike the Neanderthals possessed a more advanced neurological makeup that enabled them to experience shamanistic trances and vivid mental imagery It became important for people to fix or paint these images on cave walls which they perceived as the membrane between their world and the spirit world from which the visions came Over time new social distinctions developed as individuals exploited their hallucinations for personal advancement and the first truly modern society emerged Illuminating glimpses into the ancient mind are skillfully interwoven here with the still evolving story of modern day cave discoveries and research The Mind in the Cave is a superb piece of detective work casting light on the darkest mysteries of our earliest ancestors while strengthening our wonder at their aesthetic achievements **Encyclopedia of Native American Healing** William S.
