Shrunk Heads and Tales of Spirits Phillip G. Sidoff,1976 The Cannibal Within Lewis F. Petrinovich, The Cannibal Within offers an evolutionary account of the propensity of human beings in extreme circumstances to eat other human beings despite the strong Western taboo against such practices What sets this volume apart from the large body of literature on cannibalism both popular and anthropological is the underlying premise cannibalism as an alternative to starvation is tacitly condoned by the same biological morality that would condemn cannibalism of other sorts in non threatening situations Deep as the taboos may be the survival instinct runs even deeper The title of the book reflects the author s belief that cannibalism is not a pathology that erupts in psychotic individuals but is a universal adaptive strategy that is evolutionarily sound The cannibal is within all of us and cannibals are within all cultures should the circumstances demand cannibalism s appearance and usage Petrinovich s work is rich in historical detail and rises to a level of theoretical sophistication in addressing a subject too often dealt with in sensationalist terms The major instances in which survival cannibalism has occurred convinced the author that there is a consistent pattern and a uniform regularity of order in which different kinds of individuals are consumed In considering who eats whom when and under what circumstances this regularity appears and it is consistent with what would be expected on the basis of evolutionary or Darwinian theory In short he concludes that starvation cannibalism is not a manifestation of the chaotic psychotic behavior of individuals who are driven to madness but reveals underlying characteristics of evolved human beings Lewis Petrinovich is professor emeritus in the Department of Psychology of the University of California Riverside and is currently a resident of Berkeley California Visual Culture and the Holocaust Barbie Zelizer,2001-01-01 A book that looks at both the traditional and the unconventional ways in which the holocaust has been visually represented The purpose of this volume is to enhance our understanding of the visual representation of the Holocaust in films television photographs art and museum installations and cultural artifacts and to examine the ways in which these have shaped our consciousness The areas covered include the Eichman Trial as covered on American television the impact of Schindler s List the Jewish Museum in Berlin the Isreali Heritage Museums Women and Holocaust Photography Internet Holocaust sites and tattoos and shrunk heads the bodies of the dead and of the survivors
