Street-Level Architecture Conrad Kickert, Hans Karssen, 2022-08-04 This book provides the tools to maintain and rebuild the interaction between architecture and public space. Despite the best intentions of designers and planners, interactive frontages have dwindled over the past century in Europe and North America. This book demonstrates why even our best intentions for interactive frontages are currently unable to turn a swelling tide of economic and technological evolution and consolidation into reversion, stratification, and contagious decline. It uses these lessons to offer concrete locational programming, design, and management strategies to maximize street-level interaction and trust between street-level architecture, its inhabitants, and the city. This book demonstrates that designers, developers, planners, and managers ultimately have to create the right preconditions for inhabitants and passersby to bring frontages to life. These preconditions connect architecture to its urban, social, economical, and technological context. Only the right frontage in the

right context with the right design the right inhabitation and the right attitude to the city will become part of the ecosystem of trust and interaction that supports public life This book empowers the many participants in this ecosystem to build inhabit and enjoy truly urbane architecture **Commerce Business Daily** ,1998-11 **The Focal Encyclopedia of Photography** Michael R. Richards,2014-10-28 Transnational Feminist Rhetorics and Gendered Leadership in Global Politics examines the rhetoric surrounding women who hold or have held the highest office of a nation state Heads of state such as Golda Meir Margaret Thatcher Benazir Bhutto Ellen Johnson Sirleaf and Michelle Bachelet have navigated their ascent to executive government in vastly different ways while contending with gendered expectations of leadership especially since most of them are the first woman to occupy their country s highest governmental position This book analyzes how these women rhetorically perform their positions of power discursively visually and physically in a traditionally male leadership role Specifically this project examines how certain rhetorical acts open up and close down the potential to confront the gendered expectations surrounding political leadership When people analyze campaign for or critique a female prime minister or a woman president they are not just talking about one woman but also referencing a collective neoliberal logic that interrupts and reaffirms the belief that the nation state is an eternal inevitable structure Diverse political figures such as Angela Merkel Julia Gillard and Indira Gandhi are continually put in conversation with one another through popular media representations academic scholarship and political analyses This book examines the effect of such comparisons and connections ultimately arguing that many of these gestures reduce or over simplify women s contributions to world politics In order to show this effect this book manifests the transnational connections found in autobiographies organizations political commentaries biographical films and other sources that focus on women who have been heads of state The Year-book of Photography and Photographic News
