

The screenshot displays the Sibelius 7.5 software interface. The main window shows a musical score for the song "The Rose Tree". The score is arranged in three staves: a vocal line at the top, and two guitar accompaniment lines (A. Gr.) below it. The vocal line includes the lyrics "Are you go - ing to Scar - bo-rough Fair? Par-ley, sage, rose - ma - ry and thyme." The guitar lines provide harmonic support with chords and arpeggios. The interface includes a top menu bar with options like File, Edit, and View. A toolbar with various musical notation tools is located below the menu bar. A digital piano keyboard is visible at the bottom of the screen. The status bar at the very bottom shows the current page (Page 1 of 1) and other project details.

Technology and the Gendering of Music Education Victoria Armstrong, 2016-03-09 Critical of technologically determinist assumptions underpinning current educational policy Victoria Armstrong argues that this growing technicism has grave implications for the music classroom where composition is often synonymous with the music technology suite The use of computers and associated compositional software in music education is frequently decontextualized from cultural and social relationships thereby ignoring the fact that new technologies are used and developed within existing social spaces that are always already delineated along gender lines Armstrong suggests these gender technology relations have a profound effect on the ways adolescents compose music as well as how gendered identities in the technologized music classroom are constructed Drawing together perspectives from the sociology of science and technology studies STS and the sociology of music Armstrong examines the gendered processes and practices that contribute to how students learn about technology the repertoire of teacher and student talk its effect on student confidence and the issue of male control of technological knowledge Even though girls and female teachers have technological knowledge and skill the continuing material and symbolic associations of technology with men and masculinity contribute to the perception of women as less able and less interested in all things technological In light of the fact that music technology is now central to many music making practices across all sectors of education from primary secondary through to higher education this book provides a timely critical analysis that powerfully demonstrates why the relationship between gender and music technology should remain an important empirical consideration
