Siberian Curse How Communist Planners Left Russia Out In The Cold:

The Siberian Curse Fiona Hill, Clifford G. Gaddy, 2003 Hill and Gaddy frame the problems of Siberia more clearly and offer policy recommendations which are more concrete and coherent than any previous analyses of Siberia from Russian or foreign sources of which I am aware Robert Cottrell New York Review of Books

Russia Against Modernity Alexander Etkind, 2023-04-04 Putin's war is a special operation against modernity The invasion has been directed against Ukraine but the war has a broader target the modern world of climate awareness energy transition and digital labor By trading oil and gas promoting Trump and Brexit spreading corruption boosting inequality and homophobia subsidizing far right movements and destroying Ukraine Putin's clique aims at suppressing the ongoing transformation of modern societies Alexander Etkind distinguishes between Russia's pompous weaponized paleomodernity on the one hand and the lean decentralized gaiamodernity of the Anthropocene on the other Putin's clique has used various strategies from climate denialism and electoral interference to war and genocide to resist and subvert modernity Working on political cultural and even demographic levels social mechanisms convert the vicious energy of the oil curse into all out aggression Dissecting these mechanisms Etkind's brief but rigorous analyses of social structuration cultural dynamics and family models reveal the agency that drives the Russian war against modernity This short sharp critique of the Russian regime combines political economy social history and demography to predict the decolonizing and defederating of Russia

Science, Geopolitics and Culture in the Polar Region Sverker Sörlin, 2016-04-01 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions

The Russia Balance Sheet Anders Åslund, 2009 Introduction why Russia matters and how Russia's historical roots Political development from disorder to recentralization of power Russia's economic revival past recovery future challenges Policy on oil and gas International economic integration trade policy and investment Challenges of demography and health Russian attitudes toward the West Russia as a post

imperial power Pressing the reset button on US Russia relations Key facts on Russia 2000 2008 *The Challenges for Russia's Politicized Economic System* Susanne Oxenstierna, 2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied *Politics in Russia* Thomas F Remington, 2015-07-22 Highly regarded for its comprehensive coverage up to date scholarship and comparative framework Politics in Russia is an authoritative overview of Russia's contemporary political system and its recent evolution Area specialist Thomas Remington focuses on four areas of change in this text state structure regime change economic transformation and identity to offer a dynamic context for analyzing the post Soviet era With a consistent emphasis on the intersection of politics and economics and the tension between authoritarian and democratic trends no other text guides students through the complexities and ambiguities of Russian politics today like Politics in Russia *A Geography of Russia and Its Neighbors* Mikhail S. Hentschke,2018-09-24 Houses and homes are dynamic spaces within which people work to organize and secure their lives livelihoods and relationships Written by a team of renowned historians and anthropologists and accompanied by original photography by Maurice Weiss To Be at Home House Work and Self in the Modern World compares the ways people in different societies and historical periods strive to make and keep houses and homes under conditions of change upheaval displacement impoverishment and violence These conditions speak to the challenges of life in our modern world The contributors of this volume position the home as a new nodal point between work the self and the world to explore people s creativity agency and labour Houses and homes prove complex and powerful concepts if also often elusive invoking places persons objects emotions values attachments and fantasies This book demonstrates how the relations between houses work and the self have transformed dramatically and unpredictably under conditions of capitalism and modernity and continue to change today **Historical Legacies of Communism in Russia and Eastern Europe** Mark Beissinger,Stephen

Kotkin,2014-07-07 This book takes stock of arguments about the historical legacies of communism that have become common within the study of Russia and East Europe more than two decades after communism s demise and elaborates an empirical approach to the study of historical legacies revolving around relationships and mechanisms rather than correlation and outward similarities Eleven essays by a distinguished group of scholars assess whether post communist developments in specific areas continue to be shaped by the experience of communism or alternatively by fundamental divergences produced before or after communism Chapters deal with the variable impact of the communist experience on post communist societies in such areas as regime trajectories and democratic political values patterns of regional and sectoral economic development property ownership within the energy sector the functioning of the executive branch of government the police and courts the relationship of religion to the state government language policies and informal relationships and practices **Oil and the**

Economy of Russia Nat Moser,2017-10-20 This book examines the development of the Russian economy from tsarist times to the present through the lens of the oil industry It considers the role of the state business state relations foreign participation enterprise performance and technology Besides providing much rich detail on the changing nature of the oil industry the book also puts forward important conclusions including the fact that in the late nineteenth century private enterprise rather than the state was the principal driver of economic development and that after the collapse of the Soviet Union incumbent managers were more effective in running their companies than financier entrants whose main concern was short term gain Sustaining Russia's Arctic Cities Robert W. Orttung,2016-11-01 Urban areas in Arctic Russia are

experiencing unprecedented social and ecological change This collection outlines the key challenges that city managers will face in navigating this shifting political economic social and environmental terrain In particular the volume examines how energy production drives a boom bust cycle in the Arctic economy explores how migrants from Muslim cultures are reshaping the social fabric of northern cities and provides a detailed analysis of climate change and its impact on urban and

industrial infrastructure **Putin's Labor Dilemma** Stephen Crowley,2021-07-15 In Putin s Labor Dilemma Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia Putin boasts he has the backing of workers in the country s industrial heartland but as economic growth slows in Russia reviving the economy will require restructuring the country s industrial landscape At the same time doing so threatens to generate protest and instability from a key regime constituency However continuing to prop up Russia s Soviet era workplaces writes Crowley could lead to declining wages and economic stagnation threatening protest and instability Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment the potentially explosive role of Russia s monotowns conflicts generated by massive downsizing in Russia s Detroit Tol yatti and the rapid politicization of the truck drivers movement Labor protests currently show little sign of threatening Putin s hold on power but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve Putin s Labor Dilemma demonstrates that the Russian economy must either find new sources of economic growth or face stagnation Either scenario market reforms or economic stagnation raises the possibility even probability of destabilizing social unrest

Modernisation in Russia since 1900 Markku Kangaspuro,Jeremy Smith,2006-12-27 Modernisation has been a constant theme in Russian history at least since Peter the Great launched a series of initiatives aimed at closing the economic technical and cultural gap between Russia and the more advanced countries of Europe All of the leaders of the Soviet Union and post Soviet Russia have been intensely aware of this gap and have pursued a number of strategies some more successful than others in order to modernise the country But it would be wrong to view modernisation as a unilinear process which was the exclusive preserve of the state Modernisation has had profound effects on Russian society and the attitudes of different social groups have been crucial to the success and failure of modernisation This volume examines the broad theme of modernisation in late imperial Soviet and post Soviet Russia both through general overviews of particular topics and specific case studies of modernisation projects and their impact Modernisation is seen not just as an economic policy but as a cultural and social phenomenon reflected through such diverse themes as ideology welfare education gender relations transport political reform and the Internet The result is the most up to date and comprehensive survey of modernisation in Russia available which highlights both one of the perennial problems and the challenges and prospects for contemporary Russia

Russia's Arctic Strategies and the Future of the Far North Marlene Laruelle,2015-01-28 This book offers the first comprehensive examination of Russia s Arctic strategy ranging from climate change issues and territorial disputes to energy policy and domestic challenges As the receding polar ice increases the accessibility of the Arctic region rival powers have been manoeuvring for geopolitical and resource security Geographically Russia controls half of the Arctic coastline 40 percent of the land area beyond the Circumpolar North and three quarters of the Arctic population In total the sea and land surface area of the Russian Arctic is about 6 million square kilometres Economically as much as 20 percent of Russia s GDP

and its total exports is generated north of the Arctic Circle In terms of resources about 95 percent of its gas 75 percent of its oil 96 percent of its platinum 90 percent of its nickel and cobalt and 60 percent of its copper reserves are found in Arctic and Sub Arctic regions Add to this the riches of the continental shelf seabed and waters ranging from rare earth minerals to fish stocks After a spike of aggressive rhetoric when Russia planted its flag in the Arctic seabed in 2007 Moscow has attempted to strengthen its position as a key factor in developing an international consensus concerning a region where its relative advantages are manifest despite its diminishing military technological and human capacities

Political Theory and Community Building in Post-Soviet Russia Oleg Kharkhordin, Risto Alapuro, 2011-03-07 This book revisits many aspects of current social science theories such as actor network theory and the French school of science and technology studies to test how the theories apply in a specific situation in this case after 1991 in the city of Cherepovets in Russia home of Russia's second biggest steel producer Severstal Using political philosophy to analyse the down to earth details of the real technological scientific problems facing the world the book examines the role of things and urban infrastructure in particular in political change It considers how the city's infrastructure including housing ICT networks the provision of public utilities of all kinds has been transformed in recent years examines the roles of different actors including the municipal authorities and explores citizens differing and sometimes contradictory images of their city It includes a great deal of new thinking on how communities are built how common action is initiated to provide public goods and how the goods themselves physical things are a crucial driver of community action and community building arguably more so than more abstract social and human forces

Brezhnev and the Decline of the Soviet Union Thomas Crump, 2013-11-07 Leonid Brezhnev was leader of the Soviet Union from 1964 1982 a longer period than any other Soviet leader apart from Stalin During Brezhnev's time Soviet power seemed at its height and increasing Living standards were rising the Soviet Union was a nuclear power and successful in its space missions and the Soviet Union's influence reached into all part of the world Yet as this book which provides a comprehensive overview and reassessment of Brezhnev's life early political career and career as leader shows the seeds of decline were sown in Brezhnev's time There was a huge over commitment of resources to the Soviet industrial military complex and to massively expensive foreign policy overstretch At the same time there was a failure to deliver on citizens rising expectations and an overconfident ignoring of dissidents and their demands The book will be of great interest to Russian specialists and also to scholars of international relations and world history

Strategic Partners Jeanne Wilson, 2015-06-11 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states one greatly diminished the other clearly on the rise have found themselves sharing an interest in curbing the power of the United States In analyzing Russia's evolving foreign policy

vis a vis China the author takes into account the legacy of Soviet era precedents the simultaneous processes of economic policy change and integration into global economic structures and military relations By shedding light on the role of political realism decision makers and exogenous factors in Russian foreign policy this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change

Russia's Islamic Threat Gordon M. Hahn, 2007-01-01 Why contemporary Russia is a dangerous seedbed for radicalized Islam and what we should be doing about it The notion that the Chechen led jihad in the North Caucasus is an indigenous affair far removed from the global Islamist jihad is perhaps comforting to Americans and other Westerners but it is a myth Moreover the North Caucasus jihad may be the harbinger of a much larger Muslim challenge to Russia's political stability and state integrity So concludes Gordon M Hahn in this meticulously researched analysis of Russia's emerging Islamic threat Hahn draws an explicit picture of an already sophisticated and effective Chechen jihadist network that is expanding the territorial scope of its operations with inspiration and some assistance from the global jihadist movement Given its proximity to large stockpiles of diverse weapons the expanding population of Russian based Islamist terrorists is particular cause for alarm the author warns The book lifts the veil on the Muslim challenge to Russia's political stability national security and state integrity as well as the potentially grave threat to international and U S security Hahn shows that many of the demographic historical socioeconomic political and religious factors sparking jihadi revolution in Muslim countries are extant in Russia and are driving revolutionary Islamist terrorism there In a penetrating conclusion to the book the author analyzes the policies that have fueled the rise of militant Islam and offers a series of important recommendations for policymakers

The United States and Northeast Asia G. John Ikenberry, Chung-in Moon, 2008 This authoritative book provides a comprehensive and penetrating analysis of the emerging security terrain in Northeast Asia Leading American and Asian scholars explore the shifting power configurations in Northeast Asia represented by China's rise Japan's quest for a normal state North Korea's nuclear ambitions South Korea's projection into a middle power and U S strategic realignments They also examine new flashpoints such as anti Americanism the North Korean crisis and the clash of parochial nationalisms among China Japan and Korea Shedding light on Asia's new order this balanced and systematic volume will be invaluable for a nuanced understanding of this complex and dynamic region

How Russia Is Not Ruled Allen C. Lynch, 2005-01-10 The state remains as important to Russia's prospects as ever This is so not only because as in any society an effectively functioning state administration is necessary to the proper functioning of a complex economy and legal system but also because in Russian circumstances factors of economic geography tend to increase costs of production compared to the rest of the world These mutually reinforcing factors include the extreme severity of the climate the immense distances to be covered the dislocation between European population centers and Siberian natural resource centers and the inevitable predominance of relatively costly land transportation over sea borne transportation As a result it is questionable whether

Russia can exist as a world civilization under predominantly liberal economic circumstances in a unified liberal global capital market large scale private direct capital investment will not be directed to massive outdoor infrastructure projects typical of state investment in the Soviet period
