Siberian Light:

Siberian Light Robin White,1998-11-10 Against the vivid backdrop of a country replacing corrupt communism with an equally corrupt capitalism the geologist turned mayor of Markovo becomes obsessed with a grisly murder Ordered to investigate Mayor Gregori Nowek no detective soon finds himself in a labyrinth of deception that nevertheless begins to yield clues that point first toward a scientist studying the nearly extinct Siberian tiger the beautiful Dr Anna Vereskaya and ultimately towards an American financed oil exploration venture **Light** ,1924 **Side-lights on Siberia** James Young Simpson,1898 Water-Carbon Dynamics in Eastern Siberia Takeshi Ohta,Tetsuya Hiyama,Yoshihiro Iijima,Ayumi Kotani,Trofim C. Maximov,2019-07-01 This book discusses the water and carbon cycle system in the permafrost region of eastern Siberia Providing vital insights into how climate change has affected the permafrost environment in recent decades It analyzes the relationships between precipitation and evapotranspiration gross primary production and runoff in the permafrost regions which differ from those in tropical and temperate forests Eastern Siberia is located in the easternmost part of the Eurasian continent and the land surface with underlying permafrost has developed over a period of seventy thousand years The permafrost ecosystem has specific hydrological and meteorological characteristics in terms of the water and carbon dynamics and the current global warming and resulting changes in the permafrost environment are serious issues in the high latitude regions The book is a valuable resource for students researchers and professionals interested in forest meteorology and hydrology forest ecology and boreal vegetation as well as the impact of climate change and water carbon cycles in permafrost and non permafrost regions Language Contact in Siberia Bayarma Khabtagaeva,2019-04-09 This monograph discusses phonetic morphological and semantic features of the Altaic Sprachbund i.e. Turkic Mongolic and Tungusic elements in Yeniseian languages Kott Assan Arin Pumpokol Yugh and Ket a rather heterogeneous language family traditionally classified as one of the Paleo Siberian language groups that are not related to each other or to any other languages on the face of the planet The present work is based on a database of approximately 230 Turkic and 70 Tungusic loanwords A smaller number of loanwords are of Mongolic origin which came through either the Siberian Turkic languages or the Tungusic Ewenki languages There are clear linguistic criteria which help to distinguish loanwords borrowed via Turkic or Tungusic and not directly from Mongolic languages One of the main outcomes of this research is the establishment of the Yeniseian peculiar features in the Altaic loanwords The phonetic criteria comprise the regular disappearance of vowel harmony syncope amalgamation aphaeresis and metathesis Besides a separate group of lexemes represents hybrid words i.e. the lexical elements where one element is Altaic and the other one is Yeniseian This book presents a historical etymological survey of a part of the Yeniseian lexicon which provides an important part of the comparative database of Proto Yeniseian reconstructions **The Energy Frontier -The Power and Challenges of Russia's Oil Reserves in the 2020s** Jürgen Drzymalla,2025-04-23 Russia holds the world's eighth largest proven oil reserves mostly concentrated in Western Siberia

Arctic basins and offshore areas Its petroleum industry has been both a source of national power and a geopolitical lever especially during crises like the Ukraine war Sanctions aging infrastructure and environmental challenges have pressured production and export strategies Yet Russia continues to reorient toward Asian markets and invest in Arctic exploration despite climate and technological risks

Russia's Foreign Energy Policy Kenan Aslanli,2023-08-31 This book examines Russia's multidimensional foreign energy policy and the emerging and ongoing conflicts with energy consuming and transit countries Russia's Foreign Energy Policy examines whether the interdependence patterns shaped through various channels such as foreign trade investment finance technology and social interactions between Russia and energy importing countries could prevent energy based conflict Drawing on semi structured expert interviews Kenan Aslanli challenges the one sided conventional wisdom that focusses on foreign policy ambitions and overlooks the peculiarities of the energy dimension Instead Aslanli highlights the complexity of contemporary energy affairs using a holistic approach that goes beyond geopolitics He examines various energy types such as crude oil natural gas and nuclear and considers a diverse range of actors which include energy companies and international organizations Using examples from Europe Asia and the Middle East Aslanli demonstrates how the Russian strategy of using energy resources as a tool or energy weapon for foreign policy goals has a diminishing return in the long run This book will be of great interest to students and scholars of energy policy foreign policy and Russian studies more broadly

Cold Water Oil Fiona Polack,Danine Farquharson,2021-12-19 Cold Water Oil Offshore Petroleum Cultures is a collection of essays examining how societies conceive of fossil fuel extraction in the inhospitable but fragile waters of the North Atlantic and Arctic oceans What happens offshore matters Currently over a quarter of the world's oil and gas is produced from beneath the seas The offshore petroleum industry is thus a crucial point of origin for global carbon emissions and other environmental harms Cold Water Oil Offshore Petroleum Cultures illuminates ignored histories influential contemporary narratives and emerging energy and environmental futures The volume centres on North Atlantic and Arctic

regions the continuing but often strongly contested pursuit of oil and gas in frigid tumultuous and environmentally sensitive seas enforces the lengths to which corporations and governments will go to maintain the centrality of fossil fuels The book's contributors focus on the cultural social and ecological implications of oil and gas extraction in the oceanic territories of Canada Norway the UK Russia the US and the Interior of Alaska at a time of profound global uncertainty In conversation with the energy and environmental humanities and critical ocean studies Cold Water Oil considers a region central to debates about climate change and the planet's future Cold Water Oil engages students and researchers interested in climate change energy humanities critical ocean studies and North Atlantic and Arctic issues

Environmental Change in Siberia Heiko Balzter, 2010-07-20 The Siberian environment is a unique region of the world that is both very strongly affected by global climate change and at the same time particularly vulnerable to its consequences The news about the melting of sea ice in the Arctic Ocean and the prospect of an ice free shipping passage from Scandinavia to Alaska along the Russian north coast has sparked an international debate about natural resource exploitation national boundaries and the impacts of the rapid changes on people animals and plants Over the last decades Siberia has also witnessed severe forest fires to an extent that is hard to imagine in other parts of the world where the population density is higher the fire prone ecosystems cover much smaller areas and the systems of fire control are better resourced The acceleration of the fire regime poses the question of the future of the boreal forest in the taiga region Vegetation models have already predicted a shift of vegetation zones to the north under scenarios of global climate change The implications of a large scale expansion of the grassland steppe ecosystems in the south of Siberia and a retreat of the taiga forest into the tundra systems that expand towards the Arctic Ocean would be very significant for the local population and the economy I have studied Russian forests from remote sensing and modelling for about 11 years now and still find it a fascinating subject to investigate

Neiswander, 1928 Oz behind the Iron Curtain Erika Haber, 2017-11-30 Recipient of the 2018 Outstanding Faculty Research Achievement Award in the Department of Languages Literatures and Linguistics at Syracuse University In 1939 Aleksandr Volkov 1891-1977 published *Wizard of the Emerald City* a revised version of L. Frank Baum's *The Wonderful Wizard of Oz* Only a line on the copyright page explained the book as a reworking of the American story Readers credited Volkov as author rather than translator Volkov an unknown and inexperienced author before World War II tried to break into the politically charged field of Soviet children's literature with an American fairy tale During the height of Stalin's purges Volkov adapted and published this fairy tale in the Soviet Union despite enormous sometimes deadly obstacles Marketed as Volkov's original work *Wizard of the Emerald City* spawned a series that was translated into more than a dozen languages and became a staple of Soviet popular culture not unlike Baum's fourteen volume *Oz* series in the United States Volkov's books inspired a television series plays films musicals animated cartoons and a museum Today children's authors and fans continue to add volumes to the *Magic Land* series Several generations of Soviet Russian and Eastern European children grew up with Volkov's writings yet know little about the author and even less about his American source L. Frank Baum Most Americans have never heard of Volkov and know nothing of his impact in the Soviet Union and those who do know of him regard his efforts as plagiarism Erika Haber demonstrates how the works of both Baum and Volkov evolved from being popular children's literature and became compelling and enduring cultural icons in both the US and USSR Russia despite being dismissed and ignored by critics scholars and librarians for many years *Investing in Oil and Gas* Kathy
